1 2	1. PHILOSOPHY OF FARM BUREAU
3 4 5 6 7 8 9 10 11 12 13	Illinois Farm Bureau recognizes freedom, the dignity and worth of the individual, equal opportunity, initiative and compensation for accomplishment, as basic concepts responsible for our country's progress and stature among the nations of the world. We believe the strength of every civilized society is the family. The encouragement of the family unit where morals, obligations, responsibilities, and work ethics are exemplified and taught is of paramount importance. This must be considered an individual and local responsibility. We believe in the sanctity of private property and individual rights as provided by the U.S. Constitution, as the basis of American freedom and progress. The principles of our economic system derive from and are consistent with our religious values and goals. Through this system the American people have produced abundant goods and services for themselves and for people of other nations and have enjoyed widespread educational advantages and religious opportunities.
14 15 16 17 18	We believe in incentives, individual responsibility, initiative, freedom and the right to work without governmental dependence. If our organization and our country are to continue to be free and strong, we must act to determine our own destiny.
19 20 21 22 23	Each individual must assume active responsibility for maintaining and strengthening the principles upon which our government was founded and vigorously oppose all programs and policies which erode its foundation. We deplore irresponsible acts of defiance and lack of respect for laws enacted by our elected governmental representatives at all levels.
23 24 25 26 27	Illinois Farm Bureau philosophy must represent the thinking of a majority of its members so their organization can achieve maximum effectiveness and influence. The autonomy of the local unit must be maintained to preserve a strong grass roots organizational base.
28 29 30 31	Illinois Farm Bureau is an organization through which farm people can work together and cooperate with others to strengthen agriculture's role and influence as a vital part of a strong, prosperous economy in a free America.
32 33 34	We will assist members in understanding, influencing, and adapting to the changing realities in production agriculture, the rural economy, and rural family life.
34 35 36 37 38 39	Our national life is founded on spiritual faith and belief in God. We favor leaving "In God We Trust" on coins and currency and "Under God" in the Pledge of Allegiance.
40 41	2. ACTIVATION AND STATUS OF RESOLUTIONS
42 43 44	Policies of the Illinois Agricultural Association are subject to review at any official meeting of the voting delegates.
44 45 46 47	Resolutions adopted at this annual meeting state the current position of the Illinois Agricultural Association.
48 49 50 51 52 53 54 55	The voting delegates authorize the renumbering, placing, and arranging of the resolutions adopted at this annual meeting with the appropriate subject matter for publication in the current resolutions booklet.
56	

1 2	3. COMPETITION/MONOPOLIES						
3 4 5	The rapid consolidation of agricultural businesses that serve farmers is a growing concern. We will seek information on the merger and acquisition of agricultural businesses and how such mergers and acquisitions will help or hinder our members.						
6 7	We su	ipport.					
8	1.	Congress, and the relevant federal agencies, working together to closely monitor the					
9 10		agribusiness sector with the objective that current anti-trust laws are applied and enforced to the fullest extent in order to allow full and fair pricing competition to flourish.					
11 12	2.	Improvements to existing laws and regulations to empower appropriate agencies to conduct expanded anti-trust review and oversight.					
13 14	3.	Anti-trust laws or department operations providing increased protection to competitive markets.					
15 16	4.	Limitations enforced on mergers, acquisitions, and joint ventures by the major competitors in agricultural markets dominated by relatively few firms.					
17 18	5.	Giving the U.S. Department of Justice (USDOJ) broader regulatory authority to include regulation of anti-competitive business behavior to protect farmers as well as consumers.					
19 20	6.	Including the U.S. Department of Agriculture (USDA) in the decision-making procedure with respect to proposed mergers and acquisitions.					
21	7.	The Illinois Attorney General's office to investigate agricultural monopolies in Illinois and					
22 23 24		cooperate with other State Attorneys General and USDOJ in investigating regional monopolies.					
25 26 27 28 29	We oppose mergers, acquisitions, or leveraged buyouts that create a monopoly of production, marketing, and transportation situations or reduce competition in acquiring, pricing, or transporting agricultural commodities and products.						
30 31		4. FARM INCOME AND STRUCTURE					
32 33 34 35 36		conomic well-being of Illinois farmers will continue to be the NUMBER ONE PRIORITY of the Illinois Agricultural Association. We encourage opportunities for all segments of lture.					
37	We su	ipport:					
38	1.	The freedom of individual farmers to make their own economic decisions.					
39	2.	Programs and legislation of an innovative nature which increase net farm income.					
40	3.	Programs and legislation which could include items such as agricultural recapitalization,					
41 42		farm asset transfer plans, lowering input costs through technology, and beginning farmer education and loan programs.					
43	4.	Provisions that will protect farmers' investments, even as unsecured creditors, in prepaid					
44	_	agricultural inputs.					
45	5.	Research and development of new marketing, finance, computer, farm business					
46		management, and personal development programs as needed to improve member income					
47 ∡o	6	and efforts to increase members' use of those programs.					
48 49	6.	Monitoring and encouraging appropriate federal and state agencies, and to monitor the retail-to-farm price spreads for all major agricultural commodities.					
	7.	Open markets to link members with economic opportunities, including cooperative					
51	••	ventures, presented by rapid changes in agriculture.					
52	8.	Facilitating value-added opportunities for farmers.					
53	9.	Monitoring trends affecting farmers and strive to place an increased emphasis on					
54 55		educational programs for farmers on various opportunities available.					
56							

1 2		5. AGRICULTURAL AND VOCATIONAL EDUCATION
3	We su	innort.
4	1.	Continuation of agricultural education programs with emphasis placed on the recruitment
5	••	and training of qualified agricultural instructors.
6	2.	Efforts by county Farm Bureaus working closely with their local school districts to establish
7	2.	and ensure the maintenance, improvement and continuation of agricultural education
8		programs and FFA. High school agricultural education and the FFA are vital programs for
9		development of the talent and leadership needed in farming and agricultural service
10		industries.
11	3.	Vocational and technical programs including post high school training and retraining.
12	4.	Retention of primary administrative responsibility for vocational programs at the state and
13		local levels.
14	5.	Efforts by county Farm Bureaus to work with their school districts to implement an updated
15	0.	agricultural education curriculum to meet the needs of today's agriculture. The curriculum
16		should include agricultural science courses or other classes that would meet the criteria
17		needed to receive credit for a college prep course.
18	6.	The inclusion of agricultural projects in school science fairs.
19	7.	The restoration of state level funding for agricultural education programs.
20	8.	The recognition of agricultural education as a Teaching Shortage Area by the Illinois State
21		Board of Education and/or Illinois General Assembly.
22	9.	Encouraging colleges and universities to offer an internship program as part of their
23		curriculum for students studying to become vo-ag instructors. The purpose of the
24		internship would be to gain real world experience by providing hands-on experience
25		working on a farm, at an agriculture business or for agriculture related organizations. To
26		provide a variety of opportunities the internship should not be limited to any one type of
27		farm operation.
28		
29		
30		
31		6. AGRICULTURE IN THE CLASSROOM
32		
33		pport an effort to enhance the image of agriculture and promote the positive activities of
34		rs and agribusiness. This effort enables students and teachers in the classroom to
35		stand the importance and contribution of American agriculture to the U.S. economy and all
36		zens. We recommend that a higher priority be placed on increasing resources for Illinois
37		Iture in the Classroom programs. Instruction should be directed to all students of all grade
38		about environmental, nutritional, agronomic, and animal agriculture issues, and will
39	correla	ate materials to the standards as prescribed by the Illinois State Board of Education.
40	14/	
41		ncourage all county Farm Bureaus to participate in Illinois Agriculture in the Classroom and
42	in all a	agricultural education activities.
43		
44		
45 46		
40 47		7. COMMUNITY COLLEGES
47 48	We su	innort:
40 49	1.	Requiring the state to provide a major part of the operating funds for the Illinois
49 50	1.	Community College program.
50 51	2.	Special emphasis on vocational, technical and semi-technical training.
52	2. 3.	The charging of tuition as partial support for community colleges.
53	3. 4.	Area-wide representation for Community College Boards.
53 54	ч . 5.	County Farm Bureaus surfacing and supporting candidates from rural areas for
55		Community College Boards.
56		

1 2 3	6.	Efforts to revise current associate agricultural degree programs to make the agriculture curriculum more contemporary.
4		
5 6 7		8. EDUCATION
8 9 10	adequ	nsure quality education for all Illinois children, we endorse the principles of accountability, uacy, and equity and will actively work to include these principles in any commission, task , or legislative proposal.
11 12 13 14		untability is the efficient use of taxpayers' dollars to provide a comprehensive education to ve goals with measurable outcomes.
15 16 17		udes the size and structure of school districts, the operation/administration of school districts performance of school districts in achieving desirable educational outcomes.
18	We s	upport:
19 20	1.	Seeking significant long-term solutions to the problems of financing a quality education for all students through political, legislative, or judicial means.
21	2.	Seeking full funding for general state aid to school districts.
22 23	3.	Timely delivery of meaningful state incentives to support voluntary school consolidation
23 24	4.	and other forms of school district reorganization. Teacher/staff professional development to improve teaching quality and to address
25	ч.	challenges associated with the School Recognition Process.
26	5.	Seeking the removal of tenure and replacing it with a merit program for teacher evaluation.
27	6.	The goal of preserving and strengthening local control of schools.
28	7.	School district reorganization when determined locally by each district and if approved by
29		front door referendum. The requirements of a reorganization vote should consist of the
30		following:
31		A. Either each board of education initiate the reorganization vote or petitions
32		requesting the reorganization vote from 10 percent of the registered voters in each
33		district be required for a referendum.
34 35		B. A majority of those voting on the reorganization be required for passage in either a unit or dual district.
36		C. Referendum consideration should be restricted to general elections only.
37		D. Taxpayers in the proposed consolidation area should be given the property tax
38	•	implications of the proposed consolidation in advance of the referendum vote.
39 40	8.	Efforts to allow school district annexation proceedings to occur through approval of the
40 41	9.	Regional Board of Trustees provided public notice and hearing requirements are met. The formation of co-operative high schools when such co-operatives would broaden and
42	Э.	enhance academic opportunities and will result in economic efficiencies.
43	10.	Innovative pilot efforts that include creative partnerships with business and industry, higher
44		education and government; encourage exploration of new ideas and new approaches to
45		make schools more effective and efficient. Ideas and approaches should include, but not
46		be limited to, Charter Schools, Distance Learning, and new approaches to Vocational
47		Education, Special Education, and transitioning to a new educational model centered on
48		classrooms that emphasize creativity, innovation and teamwork while helping individual
49		students identify their passions earlier in their educational experience.
50	11.	Policies allowing local initiatives to increase academic time such as restructuring the
51 52	10	school day, calendar and schedule.
52 53	12.	County Farm Bureaus to establish programs which assist members in understanding and participating in their schools. Such programs may include meetings with school boards
53 54		and school administration to establish open communications about district operations,
54 55		curriculum development, budgeting and finance.
56		

1	13.	Full funding of state and federal education mandates by the entity proposing the mandate		
2 3 4	14.	and a full review of those mandates every three years. Seeking legislation limiting the requirement for schools to fund special education to the education component only. The State of Illinois should be required to provide student		
5 6 7	15.	housing and medical care within state or federal agencies. Requiring a hearing by local school boards before levying a tax for Life Safety and Energy Conservation bonds if such bond issues exceed \$100,000.		
8 9 10	16.	Evaluating the legislation and rules concerning the waiver of mandates requested by local school districts. The legislature needs to evaluate each request on its own merit.		
10 11 12 13	Adequ progra	acy is financing education at a level sufficient to fund a comprehensive educational am.		
14	We su	ipport:		
15 16 17	1.	The concept of using a foundation level of funding as determined in the Education Funding Advisory Board report. This level should be recalculated annually and be based on the desired level of outcome.		
18 19	2.	The use of prior year Equalized Assessed Valuation (EAV) to provide accurate information for school budgeting and fiscal management.		
20 21 22	3.	Retention of categorical grants that address special needs and allow all schools to benefit. Revenue from other categorical grants, which are competitive, should be included in the general state aid formula.		
23 24 25	4.	A State funded capital program to assist school districts in modernizing existing facilities. This program should include funding for the Americans With Disabilities Act.		
26 27 28	Equity is fairness in educational opportunities for students and fairness in the way education is funded.			
29	We su	ipport:		
30 31	1.	The concept of leveling up (defined as reducing overall variation by increasing the expenditure/revenue per student at the lower end of the distribution).		
32	2.	A local individual income tax for education, by front door referendum. The local income		
33		tax rate should be a fixed flat rate for all school districts. The revenues from such a tax		
34		could be used as local tax effort, to replace property tax revenues, to enrich educational		
35	2	opportunities above the foundation level or some combination thereof.		
36 37	3.	Requiring an equitable local tax effort in every school district as an important part of achieving fairness in educational opportunities for students and fairness in the way		
38		education is funded.		
39	4.	Increased State investment in technology to increase productivity, enhance student		
40		achievement, expand learning time and staff development.		
41	5.	Efforts to improve and expand the curriculum and delivery of services in small and rural		
42		schools through development of a statewide two-way telecommunication system or other		
43	-	means of communication technology.		
44	6.	Cooperation between school districts through inter-governmental agreements.		
45 46	7. 8.	Working with the State Board of Education to simplify grant application requirements.		
46 47	0.	The general concepts of the Education Funding Advisory Board (EFAB) of the Illinois General Assembly relating to property tax relief, adequate funding for schools, and school		
48		reorganization.		
49	9.	Teaching concepts of Science, Technology, Engineering and Math (STEM) in public		
50	•	schools in the State of Illinois. We support amending these teaching concepts to include		
51		agriculture: Science, Technology, Engineering, Agriculture, and Math (STEAM).		
52	10.	Monitoring the work of the Vision 20/20 elementary and secondary education reform		
53		coalition.		
54	11.	Increasing engagement of students in local, state, and federal activities in an effort to gain		
55 56		a better understanding and knowledge of the political process and the importance of civic		
50		engagement.		

1 2 3	We oppose shifting responsibility for the state's contribution to the Teachers Retirement System (TRS) on the local school districts.		
4			
5 6 7		9. HIGHER EDUCATION	
8	We su	pport:	
9	1.	Eligibility guidelines for publicly financed college scholarships, loans and grants to ensure	
10	_	farm youth have equal opportunity.	
11	2.	Retention and enhancement of agricultural curriculum and research at institutions of	
12	2	higher learning.	
13 14	3.	A coordinated long-range plan developed by the state institutions of higher learning to maintain quality agricultural education and research facilities.	
14	4.	Student loans and continued efforts to recover principal and interest from persons who	
16	ч.	have defaulted on their government-backed guaranteed student loans.	
17	5.	Co-Curricular agricultural organizations which allow hands-on experience for students to	
18	•	further develop their leadership skills.	
19	6.	A balance between professors' classroom instruction and research time at institutions of	
20		higher learning.	
21	7.	Continued collaboration between state supported higher education institutions to	
22		implement standardized curricula, including credit hours awarded and requirement fulfilled	
23		for the course, to make it easier for students to transfer between all levels of institutions of	
24	0	higher learning.	
25 26	8.	The continuation of the University of Illinois "South Farms." Further university expansion and community development should not sacrifice the advantages which the "South Farms"	
20		currently provide for the teaching and research needs of agriculture.	
28	9.	The continuation and funding of the existing University of Illinois outlying research centers.	
29	0.	Before any long term changes are made at any of the centers, we encourage seeking	
30		input from local stakeholders at or near the center.	
31	10.	The study of funding quality and cooperation of agricultural programs at institutions of	
32		higher education.	
33	11.	Changing the selection process for all state of Illinois funded public university Boards of	
34		Trustees in order to make the board more accountable to the voters and taxpayers of the	
35		state. We will also seek changes in how these Boards of Trustees conduct their meetings	
36 37		in order to ensure items cannot be added to the agenda and voted on without public debate and input.	
38	12.	Colleges and universities giving significant weight, recognition, and credits where available	
39	12.	to agricultural courses within their admission process.	
40			
41	We op	pose:	
42	1. ·	Efforts of the Illinois Board of Higher Education to mandate additional course requirements	
43		for entrance to Illinois public universities.	
44	2.	The selling and privatization of the Illinois Student Assistance Commission's secondary	
45		market student loan portfolio.	
46			
47 48			
49		10. UNIVERSITY OF ILLINOIS EXTENSION	
50			
51	A viab	le University of Illinois Extension will help individuals, families, farms, businesses, and	
52		unities adapt to change in an increasingly technical world. The University of Illinois	
53	Extens	sion and the Land Grant University system must maintain the expertise needed to train	
54	compe	etent people for programs in agriculture and natural resources, family and consumer	
55			
56			

1		ce, 4-H and youth development, and community and economic development. To meet
2		e goals, the University of Illinois Extension should:
3	1.	Be a conduit for information exchange between the research community, farmers, and the
4		citizens of Illinois.
5	2.	Increase clientele access to and understanding of multi-media data information systems.
6	3.	Assess the needs of their clientele and focus their efforts on these needs.
7	4.	Maintain fair and equal access to the University of Illinois Extension resources,
8		information, and programs.
9	5.	Give counties more flexibility in the hiring practices of educators. The university should
10	0.	develop options where units may join together to hire specialist(s) to help more farmers
10		and individuals at the county level.
	C	
12	6.	Educate the general public that the University of Illinois Extension is a part of the U.S.
13	_	Department of Agriculture.
14	7.	Educate the general public about production agriculture's primary contribution to the food,
15		fiber, nursery and greenhouse growing industries and other U.S. food sources.
16		
17	We s	upport:
18	1.	Continued public funding of the University of Illinois Extension and urge county Farm
19		Bureaus to participate in the development of the University of Illinois Extension as an
20		efficient educational organization in their county and support the continuation of basic
21		agricultural education programs for Illinois families.
22	2.	Requiring a full accounting of all transactions of the Extension Unit to be presented to that
23	۷.	Unit's Advisory Council at each regular meeting.
23	3.	Maintaining the conference judging format in order to ensure maximum 4-H member
	5.	
25		participation and encourage public display of these projects.
26		
27		
28		
29		11. ENERGY
30		
31	We s	upport:
32	1.	The development of a national energy policy to define the energy needs of the nation and
33		how these needs can best be met consistent with the use of natural resources, protection
34		of the environment, sound land use, and the welfare of the people. In addition, this policy
35		should continue to reduce dependency on foreign energy sources with a focus on national
36		energy security.
37	2.	Independent studies that would compare the different energy programs for our nation's
38	۲.	needs (such as the conversion of wind energy to ammonia) and see how these will impact
39		the agricultural community.
40	3.	Working with legislators to enable more U.S. oil and gas production by opening known oil
	5.	
41		and gas reserves in the Arctic National Wildlife Reserve (ANWR), off shore and on the
42		U.S. mainland, exploring for additional oil and gas sites, and building new oil and gas
43		refineries.
44	4.	Efforts to expedite the pipeline permitting process to bring Canadian crude oil to the
45		United States.
46	5.	Promotion of programs encouraging the increased use of Illinois coal as an important
47		component of a national energy policy and source of rural economic development.
48	6.	Energy conservation and development of information programs to encourage conservation
49		of all fuels by all sectors of our economy. We encourage universities and others to
50		institute and conduct appropriate research and education programs designed to inform the
51		public about energy conservation including the design and promotion of more energy
52		efficient equipment.
	7	
53 54	7.	Research, education, and incentives to further the development of methane and
54	0	renewable sources such as wind, biomass energy, and methane digester systems.
55	8.	Renewable Energy Standards to encourage the development of more renewable sources
56		for energy production.
00		

1	9.	The market system as the best long-term means of allocating scarce energy resources
2		and encouraging development of adequate energy supplies.
3	10.	Further research of coal gasification technology.
4	11.	Upgrading the electricity generation and delivery infrastructure to provide consumers
5		access to reliable low cost energy.
6	12.	The basic goals and objectives of the 25x'25 Alliance in promoting renewable energy.
7	13.	Development of electricity delivery systems that are in the best interest of rural and farm
8		residents.
9		
10		
11		
12		12. NUCLEAR ENERGY
13		
14	We su	pport:
15	1.	The use of existing nuclear power generators as a source of needed energy along with
16		adequate safeguards to ensure its safe and environmentally sound use.
17	2.	The construction of a new generation of nuclear power facilities and work to repeal the
18		State of Illinois' moratorium on construction of new nuclear facilities.
19	3.	Programs to provide farmers with adequate protection for themselves, their crops and their
20		livestock from radiation contamination from nuclear plants or nuclear materials.
21	4.	Efforts to insure that utilities operating nuclear reactors maintain the appropriate legal and
22		financial responsibility for damage to property, livestock and personal health caused by
23		the operation or malfunctioning of such reactors.
24	5.	Federal research on the safe development and use of small and efficient reactors to
25		assure the long-term supply of electricity.
26	6.	The proper agencies of the federal government to address immediately the problem of
27		permanent storage or re-use of radioactive waste.
28		
29	We op	pose the siting of nuclear waste facilities near known aquifers where pollution could occur.
30		
31		
32		
33		13. RENEWABLE FUELS
34		
35	We su	
36	1.	Expanding the use of all renewable fuels.
37	2.	Approval and use of greater ethanol blends in high-octane fuels to help automobile
38		manufacturers meet increasing regulatory standards.
39	3.	Making permanent state and federal tax credits and other programs that provide
40		incentives for the use of bio-based fuel additives, renewable fuels, cellulosic fuels, and the
41		renewal of these tax credits.
42	4.	State incentives that stimulate an increase in the demand for ethanol.
43	5.	Local ordinances requiring self-service filling stations to sell mid-grade E-15 fuels.
44	6.	The Renewable Fuels Standard 2 (RFS 2) as passed in the Energy Independence and
45	_	Security Act of 2007.
46	7.	Government-supported research directed toward reducing production costs, improving
47		conversion technology, and developing new feedstocks which shall not be limited to
48	•	cellulosic and biomass renewable fuel production.
49	8.	An increase in the ethanol blending standard.
50	9.	Programs and efforts to increase renewable fuel production in Illinois.
51	10.	Investment in and development of the appropriate infrastructure (including, but not limited
52		to, the funding of biofuel blender pumps and the standardization of all new gasoline
53		dispensers to be UL Certified for a minimum of E-25) to support the expanded use of
54	4.4	renewable fuels.
55	11.	The continuation of a renewable fuels use requirement on all state owned and/or leased
56		vehicles when and where available.

1	12.	The cost of purchasing biodiesel as an allowable expense in the Congestion Mitigation Air
2		Quality (CMAQ) program.
3	13.	Federal research for better performing engines that run on E85 fuels.
4	14.	Research on new uses and markets for co-products of renewable fuels production and
5		investigation of synergistic relationships in renewable fuels production systems and other
6		potential markets.
7	15.	Continued research into ruminant and non-ruminant feed utilization of renewable fuels
8		Distiller's Dried Grains with solubles (DDGs) co-products and farmer education on
9		appropriate use of DDGs in livestock diets.
10	16.	Quality control standards at renewable fuel plants that result in uniform, high quality co-
11		products from renewable fuels.
12	17.	Testing of ethanol at terminals to ensure uniform quality prior to blending.
13	18.	Nationwide adoption and implementation of American Society of Testing and Materials
14	10.	(ASTM) standards for all renewable fuels.
15	19.	Requiring retailers to display the percentage blend of biodiesel blend and its content upon
16	13.	development of accepted standards and accurate tests to measure those blends.
	20	
17 19	20.	Efforts to educate consumers and industry on the benefits of biofuel blends higher than
18	04	ten percent.
19	21.	Federal renewable fuels tax incentives to promote the use of domestically-grown
20	00	commodities for domestically-produced renewable fuels.
21	22.	The American Farm Bureau Federation (AFBF) and other agricultural and allied
22		organizations and industries in aggressive public information campaigns which support
23		renewable fuels and challenge any misinformation.
24	23.	Encouraging farmers, affiliated companies, and other agricultural businesses to use
25		renewable fuels.
26	24.	Renewable fuel use by school districts and units of local government.
27	25.	Development of engines and air-cooled outdoor power equipment using a higher
28		percentage of renewable fuels.
29	26.	Renewable fuels as an octane or cetane enhancer, fuel source, or lubricity agent to
30		improve air quality.
31	27.	Encouraging automakers to produce more flex-fuel vehicles and those that can run on
32		mid-level blends with the goal of eliminating the so-called "blend wall."
33	28.	U.S. Department of Defense adoption and use of renewable fuels.
34	29.	Efforts to expand the use of renewable fuel in commercial aviation, maritime, and other
35		large-volume users.
36		·
37	We op	pose:
38	1. '	Attempts to defund, repeal, or rollback implementation of the RFS.
39	2.	EPA's misuse of its "inadequate supply" waiver authority for the purposes of reducing the
40		amount of renewable fuel blended.
41	3.	Expiration of remaining renewable fuel tax credits.
42	4.	Use of federal renewable fuels tax incentives for imported renewable fuels or renewable
43	••	fuels produced with imported agricultural commodities.
44		nuolo producod mar importod dynodiarar commoditico.
45		
46		
47		14. SOLAR ENERGY
48		14. OOLAN ENENOT
49	We su	innort:
49 50	1.	Solar energy generation as a component of the energy portfolio of the U.S.
50 51	1. 2.	Public and private efforts to develop solar energy projects in the State of Illinois.
52	3.	The establishment of statewide standards for commercial solar energy conversion
53		systems that provide adequate protection of public health and safety, protect private
54		property rights, and allow for reasonable development of commercial solar energy
55		conversion system projects. Such standards should include, but are not limited to,
56		

1		farmland preservation, protection of natural resources, and ensuring adequate funds are in
2		place for decommissioning.
3	4.	Requiring an Agriculture Impact Mitigation Agreement (AIMA) to be filed with the Illinois
4		Department of Agriculture for all commercial solar energy projects.
5	5.	A statewide standard for assessing solar energy projects.
6	6.	Legislation requiring the owner of the solar energy project to pay 100% of the property
7		taxes associated with their solar energy generation at the time they are due.
8	7.	Efforts to locate solar energy projects on marginal or underused lands, including
9		brownfield sites, rather than highly productive, tillable farmland.
10	8.	County Farm Bureau efforts to work with their county officials to develop appropriate solar
11		land use regulations for their county.
12	9.	Legislation allowing the landowner the option to terminate a solar lease agreement if the
13		solar panels fail to produce energy for a period longer than 12 consecutive months.
14	10.	Written notice of intent to construct given to drainage districts and neighbors with tile
15		outlets passing thru the proposed solar farm. Right to repair tile shall be maintained.
16		
17	We op	pose:
18	1.	Giving private solar energy or solar development companies public utility status.
19	2.	Statewide regulations requiring a notice of intent to construct for solar energy projects.
20	3.	Statewide regulations requiring a public hearing prior to the construction of a solar energy
21	0.	project.
22		
23		
24		
25		15. UTILITIES AND PIPELINES
26		
27	We su	nnort:
28	1.	Continuation of work for quality rural telephone, broadband, and electric service with just
29	1.	and reasonable rates.
30	2.	The development of a higher visibility and formal involvement in electric rate issues by:
31	۷.	A. Cooperating with other intervenors in major rate cases involving farmers.
32		 B. Interacting with the Illinois Commerce Commission (ICC) and utilities seeking to
33		modify rate designs to favor agricultural users of electricity.
34		C. Monitoring utilities and the ICC to ensure that "cost of service" rate designs and
35		regulations are not put in place which would economically harm agriculture.
36	3.	
	З.	Building a coalition of groups and organizations with identifiable common interests regarding electric rate issues.
37	4	
38	4. 5	Strengthening the working relationship with the rural electric cooperative system.
39	5.	Working to simplify and streamline the regulation of the utility business while maintaining
40	~	the goal of prompt, effective, and efficient regulation.
41	6.	The Illinois Department of Agriculture (IDOA) to assume the role of arbitrator in certain
42		utility cases involving farmland. Where requested, we will recommend language for
43		inclusion in landowners' right-of-way agreements that would appoint the IDOA, Bureau of
44		Farmland Protection as arbitrator in certain cases where disputes arise. Upon request, we
45		will hold meetings with landowners before and after completion of the project to address
46	-	questions and concerns of landowners.
47	7.	Working with American Farm Bureau Federation (AFBF) to seek federal legislation
48		requiring all federally permitted utility projects to have minimum construction standards in
49	•	place before granting permits to utility companies wishing to construct on farmland.
50	8.	Efforts to encourage electric suppliers in Illinois to participate in the development and
51	•	management of wind and solar power generation.
52	9.	Working with electric and gas suppliers in Illinois to evaluate potential load requirements
53		for agricultural operations and develop a long range plan to upgrade existing infrastructure
54		to handle future demand loads.
55	10.	The appointment of the ICC and encourage the appointment of at least one commissioner
56		who is knowledgeable about agriculture.

1 2	11.	Regulations requiring all pipeline companies to manage existing pipelines shallower than two (2) feet and maintain to a level of five (5) feet of cover from existing grade within one
3 4 5	12.	year of discovery, subject to the landowner discretion. Legislation requiring all future underground pipelines being buried across agricultural lands to follow the contour of the surface maintaining a minimum topcover of 60 inches.
6 7	13.	Action by the ICC to adjust all Illinois utility companies' summer rate time period cut-off dates in order to achieve a statewide September 15 summer ending date.
8 9	14.	Legislation that would provide for some form of constitutional taxation of underground pipelines by the State of Illinois and payment in lieu of taxes to benefit local units of
10 11 12	15.	government where pipelines are located. Regulatory oversight of anhydrous ammonia pipelines by the Surface Transportation Board due to the monopolistic nature of the industry.
13 14	16.	Legislation that would create a surcharge or a fee-based "Pipeline Fund" to address potential environmental problems caused by abandoned pipelines.
15 16	17.	Legislation requiring pipeline companies to remove abandoned or obsolete pipelines from the ground and to ensure that the affected areas be returned to the original productivity.
17 18 19	18.	Efforts to assess telecommunication needs in rural areas and ensure that telecommunication providers in partnership with rural communities meet those identified needs.
20 21	19.	Legislation requiring utility companies to remove municipal taxes from bills of rural residences.
22 23	20.	Requiring appropriate landowner, trustee, or tenant notification in all utility easement agreements.
24 25	21.	Requiring all utilities installing equipment on the right-of-ways to inform the adjacent property owner at least 30 days prior to the proposed change so the landowner can inform
26 27		the utility of field drainage tiles, and if needed, watch the work conducted to make sure that the field tile is not damaged. If damaged, the utility should be required to properly fix
28 29		any damage as soon as possible or within 90 days at the discretion of the landowner or tenant.
30 31 32	22.	Seeking to develop a positive approach, to protect farmland, farm owners, and operators from losses caused by utility installations. The utilities should be constructed in a manner to cause the least possible interference with agriculture.
33 34	23.	Seeking the requirement, that upon notice to a utility company that owns or controls underground utilities, including fiber optic equipment and lines, by an individual or entity
35 36		who is planning on excavating under or over such lines, the utility company shall excavate a minimum area to expose such line. This minimum area excavated by the utility
37 38		company shall be large enough to allow the individual or entity planning on excavating to conduct their needed work in a way as not to damage the line.
39 40	24.	Seeking legislation requiring all utility and pipeline projects that are constructed/buried across agricultural land complete an Agricultural Impact Mitigation Agreement (AIMA) with
41 42 43	25.	the IDOA before landowners are contacted about the project. Seeking legislation that requires pipelines and utilities to enter into an AIMA agreement with the IDOA and allows for the enforcement of the AIMA by the IDOA when the
44		agreement has been violated by a utility or pipeline company and the project can be
45 46	26.	stopped until the project violation has been corrected. Seeking legislation to establish an obligation on the part of the ICC to require a finding
47 48	07	from the IDOA that minimum construction standards are required for any proposed utility projects before companies are granted permits to construct improvements.
49 50 51	27.	Seeking further study on the proper means to compensate farm owners affected by utility installations. This should require certain minimum standards for compensation agreements or annual payments for certain structures. Compensation should include cost
52		of repairs to damaged infrastructure and crop losses as a result of damaged infrastructure.
53 54 55	28.	Seeking legislation to require all utilities, proposing acquisition of rights-of-way for utility projects, to send written notice of intention to acquire such right-of-way to landowners and lessees at least 90 days prior to any personal contact with the landowners and lessees for
56		purposes of negotiating such right-of-way acquisition.

1	29.	Legislation that any blanket easement created after January 1, 2018, (or other appropriate
2		future date) shall be void and considered against public policy and wholly unenforceable.
3	30.	Seeking legislation to amend the Expedited Review provisions of the Illinois Public Utilities
4		Act to better protect the property rights of landowners who may be impacted by utility
5		projects. Also remove the 45-day deadline the ICC must follow when ruling on eminent
6		domain requests for electric transmission line projects filed under expedited review and
7	04	instead, request a reasonable timeline for the ruling.
8	31.	Seeking to eliminate the practice of Citizens Utility Board (CUB) literature being inserted in
9	22	vehicle license renewal notices.
10	32.	Establishing minimum setbacks for overhead transmission lines from sensitive structures
11 12		(private and public schools, licensed daycare facilities, residences, hospitals, agricultural irrigation systems, and agricultural livestock production facilities) of at least the following
13		distances unless waived by agreement from the edge of respective power line
14		easements for new electrical transmission line projects.
15		A. 100 feet for 50-138 kV line.
16		B. 150 feet for 139-339 kV line.
17		C. 250 feet for 340 kV or larger line.
18		
19		
20		
21		16. WIND ENERGY
22		
23	We su	pport:
24	1.	Wind energy generation as a component of the energy portfolio of the U.S.
25	2.	Continuation of the current property tax assessment method and rate for commercial wind
26		turbines in Illinois.
27	3.	The establishment of statewide standards for commercial wind energy conversion systems
28		that provide adequate protection of public health and safety, protect private property
29		rights, and allow for reasonable development of commercial wind energy conversion
30		system projects. Such standards should include, but are not limited to, property setbacks,
31		other siting issues, performance bonds, and ensuring adequate funds are in place for
32		decommissioning.
33		
34		
35 36		17. ABOVEGROUND FUEL STORAGE TANKS
37		17. ADOVEGROUND FOLE STORAGE TANKS
38	We su	pport revisions to rules regarding aboveground fuel storage tanks to allow each farm to
39		enough aboveground fuel storage to receive a transport load of each specific fuel.
40		······································
41		
42		
43		18. AGRICULTURAL ENVIRONMENTAL PROTECTION
44		
45	We su	
46	1.	Agricultural practices that recognize economic benefits and the ability to manage risks
47		involved with production agriculture.
48	2.	Working with other interested agencies and organizations to assure pollution standards
49		and tolerances are scientifically formulated and economically feasible.
50	3.	Farmer participation in voluntary, third-party environmental assessments as a means to
51		demonstrate compliance prior to an Illinois Environmental Protection Agency (IEPA)
52		inspection as a means to meet IEPA requirements.
53	4.	A farmer's right to build livestock buildings and other agricultural structures without the
54		threat of litigation as long as they abide by current regulations and guidelines at the time of
55		site approval.
56		

1 2 3	5.	Efforts to provide adequate funds to state and federal agencies for the purpose of aiding in the construction of agricultural pollution control devices and implementation of other agricultural practices to meet mandated standards.
4 5	6.	Working closely with IEPA to develop communication strategies to livestock farmers that are not intimidating, do not involve media or press releases, and develop reasonable
6 7 8	7.	timelines to address enforcement issues. Modification of the Superfund Amendments and Reauthorization Act (SARA) to exclude forme from the provisions of the Act. Departing and patification requirements in SARA are
9	0	farms from the provisions of the Act. Reporting and notification requirements in SARA are too stringent and inappropriate for farming operations.
10 11 12	8.	Efforts to exempt farmers and others who have legally disposed of materials from liability provisions of the Comprehensive Environmental Regulatory Cleanup and Liability Act (CERCLA).
13 14	9.	Research and information examining the effects of crop protection and animal health products on the food chain and the environment.
15	10.	The development of an overall rating system to measure the acute and chronic effects of
16 17	11.	oral and dermal exposure to crop protection and animal health products. Exempting property owners from financial responsibility for pollution that resulted from
18 19	12.	previously-accepted farming practices. The removal of setbacks on chemical application in conjunction with tile inlet structures
20 21	13.	unless proven necessary by scientific data. Changes in the Worker Protection Standards so posting of field entrances does not unduly
22 23	14.	alarm consumers about the use of certain crop protection products. Legislation which will require a verified name and address from the complainants on all
24 25	15.	pollution complaint reports. Increased government funding to ensure that landowners are adequately compensated
26 27		whenever farmland is used for purposes intended to achieve the government's natural resource goals.
28 29	16.	Increased dollars for educational, promotional, incentive-based, and technical assistance programs and developing the guidelines for the implementation of programs at the local
30 31		level. We also support developing a separate source of funding either under conventional agricultural conservation programs or U.S. Department of Agriculture (USDA) Rural
32 33	17.	Development for the establishment of buffers. Legislation indemnifying farmers and farm owners for the cost of clean-up and other
34 35	18.	damages arising from the pollution of their land by the willful or negligent acts of others. Congress setting specific guidelines and restraints on federal agencies charged with
36 37	10.	implementing and enforcing federal law. We believe that Congress should provide for
38		strong congressional oversight of regulatory and significant agency actions as well as a willingness to override unacceptable agency actions. We support congressional scrutiny
39		of agencies to prohibit regulatory agencies from administering laws, to deter adoption of
40 41		agency rules and actions that circumvent statutory intent. Specific efforts should be made to oversee and to reform the inspection and rule-making authority of the U.S.
42		Environmental Protection Agency (US EPA).
43	19.	Environmental regulations clarifying that any discharge occurring prior to the operation of
44		a livestock farm does not require the owner/operator of the farm to obtain a National
45		Pollutant Discharge Elimination System (NPDES) permit for the operation of the
46	20	Concentrated Animal Feeding Operation (CAFO).
47 48	20.	Efforts by the IDOA to protect pollinators that involve farmer stakeholders and arrive at reasonable solutions that protect both crops and pollinators.
49	21.	The planting of milkweed for Monarch Butterfly habitat in parks, wildlife preserves, urban
50	21.	gardens and other non-linear areas that will not create a problem for production
51		agriculture.
52 53	22.	The planting of pollinator habitat on land currently enrolled in USDA programs.
54	We o	ppose:
55	1.	Efforts to place restrictions or moratoriums on a farmer's ability to manage his or her
56		farming operation in a manner consistent with BMPs. Existing operations should not be

1 2 3 4 5 6 7 8 9	2. 3. 4. 5.	restricted from expansion nor have undue limits placed upon them due to the encroachment of others. Regulations for septic systems that are not science-based and do not take into consideration the economic impacts on the homeowner and on the local government. Requiring a NPDES permit for pesticide applications when the applicator complies with the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). The requirement of a CAFO to need an NPDES permit if it does not discharge. Efforts by the IEPA to regulate stored hay as a stored feed.
10 11		
12 13		19. ATMOSPHERIC QUALITY
14	We su	nnort [.]
15 16	1.	Policies that keep agriculture viable and address the costs and benefits of those programs using sound, economic analysis.
17	2.	Alternative energy sources which will minimize atmospheric pollution.
18 19	3.	Providing incentives to industries seeking to become more energy efficient or to reduce emissions of identifiable atmospheric pollutants.
20 21 22	4.	Cooperation of organizations and governments, foreign and domestic, to develop better understanding and research on the implications of atmospheric pollution and the means of preventing it.
23	5.	Providing incentives to individuals seeking to reforest fragile lands that are currently in
24	6	agricultural production.
25	6.	The development of engines that utilize affordable technology to reduce pollution.
26	7.	Requiring the Illinois Environmental Protection Agency to use science-based methods
27	0	when identifying violations for atmospheric pollution.
28	8.	Passage of a Congressional resolution which strips the Environmental Protection Agency
29	•	of its authority to regulate greenhouse gases.
30	9.	Research on greenhouse gases.
31		
32	We op	
33	1.	Restrictions on existing off-road equipment emissions.
34 35	2.	Any changes in the Corporate Average Fuel Economy (CAFE) standards that reduce the availability of trucks.
36 37		
38 39		20. DISPOSAL OF WASTE
40		
41	We su	
42	1.	Waste volume reduction at the source. Every effort should be made to avoid generating
43		waste products.
44	2.	Recycling and reuse. We encourage manufacturers to develop cost-effective uses for
45		recyclable products. We will work towards the development of incentives to create
46		additional markets and uses for these recycled products.
47	3.	Retailers and consumers using returnable, recyclable, and degradable containers.
48	4.	Research on voluntary recycling options for agricultural plastics.
49	5.	Source separation, which includes:
50		A. Incentives for the return of all glass, plastic, or metal beverage containers.
51		B. Local recycling programs.
52		C. Composting. We support research on the effects of using yard waste on
53		agricultural land.
54	6.	Research on the effects of energy recovery from incineration.
55	7.	Combustion for volume reduction. Where it can be shown to be economically feasible and
56		environmentally safe, incineration of solid waste before disposing in a landfill.

1	8.	Landfilling as a final alternative.
2	9.	Legislation specifying that publication requirements for public hearings on the siting of
3		solid waste disposal facilities be the same as those of the Illinois Truth in Taxation Act.
4	10.	The ability of a municipality to reject the location of a landfill within 1 1/2 miles of the
5		municipality's boundary.
6	11.	Appropriate local governments providing refuse disposal services at a reasonable cost to
7		residents within their area if no private services are available.
8	12.	Efforts for more stringent local enforcement of littering laws.
9	13.	Improvement of regulations to ensure safe transportation of hazardous waste.
10	14.	Enforcement of existing laws and regulatory programs which require environmentally safe
11		waste disposal systems.
12	15.	Encouraging county Farm Bureaus to actively monitor permit applications for siting of non-
13		agricultural pollution control facilities submitted to their County Boards.
14	16.	Delegation agreements granting counties authority to regulate landfill operations within
15		their jurisdiction, including hours of operation and the height of landfills.
16	17.	Efforts to impose appropriate fines and penalties on waste disposal violations.
17	18.	Reasonable disposal fees on residential waste to help avoid dumping in rural areas.
18	19.	Allowing local governments to charge a higher fee, tax or surcharge on special waste and
19		out-of-area waste than on local residential waste.
20	20.	Efforts to have Illinois classify out-of-state waste as stringently as its classification in the
21		state of origin.
22	21.	Regular and thorough inspection of waste disposal sites.
23	22.	"Landfarming" of contaminated soils to preserve limited space available in landfills.
24	23.	Research into laser gasification for mining of landfills and disposal of garbage.
25	24.	Allowing farmers to burn or bury old agricultural buildings and brush on existing sites.
26	25.	Allowing the burning and burying of building debris in cases of natural disasters.
27	26.	Changes to the laws and policies regarding used tire collections, including:
28		A. An increase in the number of times an individual can participate in a tire clean-up
29		event.
30		B. Allowing non-governmental organizations to sponsor a used tire collection
31		program.
32		C. The Illinois Environmental Protection Agency (IEPA) setting up drop off areas for
33		used tires.
34	27.	Investigation into alternative methods for disposal of urban sludge containing heavy
35		metals and continued research on the safe application of urban sludge on agricultural
36		farmland. Agencies should make research results on immediate and long-term effects of
37		sludge application available to farmers.
38	28.	An environmentally safe and financially acceptable method to dispose of or recycle used
39		oil and unwanted farm and home chemicals.
40		
41	We op	
42	1.	Transportation of solid waste over long distances for disposal.
43	2.	Efforts which lead to the importation of solid waste into rural areas without proper
44		consideration being given to residents neighboring the disposal site.
45	3.	Attempts to weaken the role of local governments or the criteria by which the sites are
46		judged in the siting of non-agricultural pollution control facilities.
47		
48		
49		
50		21. DRAINAGE AND STORMWATER MANAGEMENT
51		
52		Drainage
53	We su	
54	1.	More coordination among drainage districts and other government entities in a common
55		watershed.
56		

	0	
1	2.	Landowners within an inactive drainage district to reactivate the district or to consolidate
2		the district with that of an active neighboring drainage district. In the event that
3		reactivating or consolidating a drainage district is not feasible, we encourage all property
4		owners, including state and federal entities, to maintain drainage systems on their
5	2	property.
6	3.	Uniform interpretation of regulations to allow stream and drainage ditch maintenance
7		practices consistent with good husbandry, such as removing silt, trees, restoring stream
8 9		banks, and restoring drainage ditches to their optimal condition without the requirement of
9 10	4.	a permit. Better coordination among the various district offices of the U.S. Army Corps of Engineers
11	4.	(Corps) serving Illinois to foster more fair and consistent administration of the Clean Water
12		Act and other laws and regulations.
13	5.	Working with other groups to develop appropriate means to resolve drainage problems
14	5.	arising from land development and road construction. Such means should include holding
15		developers financially responsible for damages done to agricultural drainage.
16	6.	Mandating that units of local government require developers to provide surety bonds to
17	0.	guarantee full compliance with the drainage law in regard to land development and road
18		construction.
19	7.	Techniques and voluntary programs through agencies such as the Natural Resources
20	••	Conservation Service (NRCS) that put more emphasis on stabilization of stream banks.
21	8.	Enforcement of the concepts within the Illinois Drainage Code which prevent all
22		governmental agencies from using public right-of-way to channel drainage water onto
23		private land without considering the volume of water being drained or the absorption rate
24		of the soils receiving the water.
25	9.	A requirement that soil erosion control be considered as a part of all drainage plans.
26	10.	A reasonable use standard for management of agricultural drainage.
27	11.	Making NRCS the lead agency in determining if a drainage project needs a 404 permit
28		and providing the local contact for that permitting process. If a 404 permit is needed, we
29		support making the Corps the only agency in charge of issuing a permit for drainage
30		projects.
31	12.	Means to require any incorporated area or drainage district with a population of 5,000 or
32		more to pay downstream drainage districts for maintenance and expansion of waterways
33		that receive the accumulated increase in water flow.
34	13.	Drainage districts as independent units of local government and their right to retain
35		control.
36	14.	Educational programs for drainage district commissioners concerning their duties, state
37		and federal regulations impacting them, and the need to properly and routinely maintain
38	45	the district's drainage facilities.
39 40	15.	Drainage commissioners' authority to accumulate or build up a fund which shall not
40	16	exceed an amount equal to the total of five years annual maintenance assessment.
41 42	16.	Efforts to exempt prior constructed waterways to drainage channels from archaeological study requirements.
42 43	17.	Efforts to remove beavers and their structures when they alter drainage resources.
44	17.	Lifetts to remove beavers and their structures when they alter drainage resources.
45	Weo	ppose:
46	1.	Unwarranted interference with drainage work.
47	2.	Legislation that would forcibly diminish or usurp the power and authority of drainage
48		districts.
49		
50		Stormwater Management
51	We s	upport:
52	1.	Requiring money collected for stormwater management be used exclusively for control of
53		runoff in the watershed where it was collected, not in an unrelated watershed.
54	2.	Representation on any county stormwater management commission to have mandated
55		broad based makeup, including municipal, engineering, agricultural, industrial,
56		commercial, and homeowner voting members.

1	3.	Requiring municipalities to integrate stormwater management control structures and plans
2		into any new or existing development.
3	4.	The use of tax credits, abatements, or incentive payments to property owners who
4		construct, maintain, and use approved stormwater management devices (e.g. catch
5		ponds, lagoons, holding basins, terraces, contour farming, pasture land, timberland).
6	5.	Efforts requiring that new commercial and residential developments be planned for
7	-	anticipated runoff and constructed with the structures necessary to control it.
8	6.	Encouraging local governmental units to unite to solve stormwater problems stemming
9	0.	from impervious surfaces in watersheds within their jurisdictions so long as the power and
10		authority of drainage districts are not forcibly usurped or diminished. For purposes of
11	7	stormwater management, farmland would not be considered an impervious surface.
12	7.	Efforts to amend the Soil and Water Conservation District Act to expand the role of the
13		Soil and Water Conservation Districts to address urban wetland and stormwater
14		management problems. The Soil and Water Conservation Districts should make every
15		effort to coordinate and cooperate with other organizations and agencies within the district
16		to achieve these goals.
17	8.	Amendments to the enabling legislation of stormwater management agencies that would
18		explicitly exempt agricultural land and practices.
19	9.	Reducing the amount of taxes and fees assessed against property for stormwater
20	•	management purposes by the amount of taxes and fees assessed against that property by
21		a drainage district.
22		
23	We op	poco:
23		Granting any stormwater management authority the power to regulate farmland drainage.
25	1.	
	2.	The establishment of a county stormwater runoff management planning commission
26	•	without voter approval.
27	3.	The use of eminent domain by a stormwater commission except for specific and
28		immediate use for stormwater runoff control.
29	4.	The involuntary dissolution of agricultural drainage districts and their administration and
30		taxing levy being assumed by the county stormwater commission.
31	5.	Any efforts to require agriculture to pay for more than its fair share of any taxing plan or
32		any effort to force agricultural lands to receive excessive and unobstructed runoff caused
33		by upstream development that lacks reasonable stormwater management structures.
34		
35		
36		
37		22. DUE PROCESS
38		
39	We su	nnort:
40	1.	Requiring all governmental agencies to notify landowners and farm operators of possible
40	1.	violations in writing, stating specific findings and charges on all farm visits.
	0	
42	2.	Landowners and farm operators be given a reasonable amount of time to correct the
43	_	possible violations before legal action is taken by the governmental agency.
44	3.	Governmental agencies being required to prove intent to violate as a part of every
45		prosecution.
46	4.	Any conviction being based on due process, including trial by jury.
47	5.	Governmental agencies, should they lose a court case, being held accountable for court
48		costs and associated costs to landowners and farm operators.
49		
50		
51		
52		23. ENDANGERED SPECIES
53		
54	We su	pport:
55	1.	A moratorium on additional listings under the Endangered Species Act (ESA) in its current
56		form until such time as it is amended and updated to accommodate the needs of both

1		endangered and threatened species and humans with complete respect for private
2		property rights within the framework of the United States Constitution.
3	2.	Endangered and threatened species protection that is achieved through providing
4		incentives to private landowners and public land users rather than by imposing land use
5		restrictions and penalties.
6	3.	The burden of proof for listing being on the petitioner, the United States Fish and Wildlife
7		Service or the National Marine Fisheries Service (together, the Agencies), rather than on
8		the general public.
9	4.	Scientific and peer-reviewed data being used as the basis for listing a species, as well as
10		the basis for the development of regional or state conservation plans involving those
11		species.
12	5.	A legitimate state-level process of involving stakeholders, including farm organizations, the
13		Illinois Department of Agriculture, and agricultural representatives, in discussions around
14		listing decisions and conservation planning.
15	6.	A more efficient process for the delisting of species that allows the Agencies to achieve
16		the stated objectives of the ESA: to recover and delist species.
17	7.	Reasonable assurance mechanisms at the federal and state level that allow farmers to
18		conduct normal farming activities without fear of liability under the ESA and Illinois'
19		Endangered Species Protection Act.
20		5
21	We o	ppose:
22	1.	The recognition of species that are considered under threat versus endangered to be a
23		factor in liabilities to private landowners.
24	2.	A definition of critical habitat that includes areas without the current presence of an
25		endangered species.
26	3.	The listing of the monarch butterfly as a threatened or endangered species.
27	4.	Any group that receives funding pursuant to the ESA or as a result of litigation associated
28		with the ESA, from being able to petition, support or encourage the listing of a species.
29		
30		
31		
32		24. FARMING METHODS
33		
34	We s	upport farming methods that result in:
35	1.	Profitability.
36	2.	Environmental stewardship.
37	3.	The production of a safe food supply.
38	4.	An adequate supply of high quality agricultural commodities to meet current and future
39		demand.
40		
41	We s	upport:
42	1.	Research aimed at reducing overall inputs needed to sustain a profitable farming
43		operation.
44	2.	Incentives that encourage farmers to accept the risk of testing non-traditional means of
45		farming.
46	3.	Efforts to provide information to farmers on proven means of improving the efficiency of
47		inputs.
48	4.	Research to study soil health and its future productivity.
49	5.	The use of an integrated pest management program to control pests in crop production.
50		
51	We o	ppose any attempt to mandate low input methods of farming.
52		··· · · · · · · · · · · · · · · · · ·
53		
54		
55		
56		

1	25. FORESTRY
2	
3 4 5 6 7 8	 We support: Incentives for the development of private forest resources in Illinois. The planting of trees on land that is unable to meet conservation compliance standards to help control soil erosion and increase timber resources.
9 10	26. GLOBAL CLIMATE CHANGE
11	147
12 13 14	 We support: 1. Science-based research, not consensus, to conclusively determine the causes and impact of global climate change.
15 16 17 18	 Scientific research to document the regional value of agricultural practices in carbon sequestration. The U.S. Department of Agriculture should be the lead agency on researching carbon sequestration values for agriculture.
19 20 21 22	We oppose any regulations or treaties relative to global climate change that will unfairly impact U.S. agriculture and the U.S. economy.
22 23 24	27. HIGHLY ERODIBLE LAND
25	
26	We support:
27 28 29 30 31	1. Efforts to alter Highly Erodible Lands (HEL) determination and classification to reflect the applied permanent conservation practices (i.e. terraces and diversions) that reduce the soil loss factor on soils that would normally be highly erodible. If the reduction in soil loss makes the land NON-HEL, the land should be so classified and remain so classified as long as the permanent conservation practices are maintained as designed.
32 33 34 35	 Variances in conservation practices for livestock farmers so they can utilize crops or crop residue without jeopardizing conservation compliance regulations. These practices should include, but not be limited to, pasturing livestock, chopping silage, harvesting crop residues, and manure incorporation.
36 37 38 39 40	3. Local Natural Resources Conservation Service (NRCS) personnel working directly with farmers in coordinating the repair of damage from normal farming practices to fields with an HEL designation. The NRCS should consider field condition limitations before imposing penalties for non-compliance.
41 42	
42 43	28. MINED LANDS
44	20. MINED EANDS
45	We support:
46	1. Working with private, county, state, and federal groups and agencies in the development
47 48	and strict enforcement of regulations for mined and undermined lands which will give proper consideration to needs and priorities of agriculture as well as energy and which will
49 50 51	 protect and restore agricultural lands. Working with other interested groups in developing reasonable solutions to problems of subsidence and means to minimize subsidence in future mining operations. The
52 53	 Iandowner shall receive fair compensation for any subsidence which occurs. The Office of Mines and Minerals to include irrigation and other agricultural wells in the
54 55 56	protection clauses under Illinois regulations concerning subsidence from underground mines.

1	4.	A bonding requirement for coal companies that receive fly ash from coal combustion
2		plants to address groundwater concerns and cleanup.
3 4	5.	Developing an educational program on mineral and subsidence rights for landowners and support mining methods that maintain property values.
5 6 7	6.	The review of the impact of mining activity and how it affects the market value of property. Should this effect be negative, we will seek legislation to compensate landowners for this loss.
8	7.	Requiring mine operators to compensate landowners and tenants for production losses.
9	8.	Requiring mine operators to compensate landowners and tenants for increased cost of
10 11 12	9.	federal crop insurance when the farmland has been rerated due to mining operations. County Farm Bureaus becoming involved in reviewing proposed reclamation plans prior to the issuance of mining permits and to closely monitor such reclamation plans after mining
13 14		to see they are being properly implemented.
15		
16 17		29. MINERAL INTERESTS
18		
19		ipport:
20 21	1.	A requirement that data from core tests of coal and fluorspar exploration be made available to the public after one year in the same manner that data on oil and gas wells
22 23	2.	are made available to the public. Legislation to require the owners of oil and gas interests that have been severed from the
23 24	Ζ.	existing surface ownership to provide to the surface owner:
25		A. A 30-day notice before entry is made onto the surface for oil and gas exploration
26		and recovery.
27 28		B. Compliance with minimum reclamation standards to minimize surface impacts of such operation and full clean-up of oil and gas sites.
29		C. Complete compensation payable to the surface owner or tenant for damages
30		incurred during such operation and annual production losses incurred by the
31		presence of roads, tank batteries, well heads, and oil and gas production
32 33		equipment. D. Complete compensation for the loss in land value due to drilling operations.
33 34	3.	Legislation requiring the operator of an oil and gas well to bury all electrical lines to a
35	0.	depth not less than 36 inches from the surface unless otherwise agreed to by the
36		landowner.
37	4.	Continued efforts to strengthen and clarify existing rules and regulations relating to oil and
38		gas well site reclamation, well capping and well waste disposal, and to inform members of
39	_	those regulations.
40	5.	Establishing regulations for hydraulic fracturing and horizontal drilling on site preparation,
41 42		drilling, well-casings, pipelines, waste-storage, and other appropriate safeguards in order to protect land and water resources.
43	6.	Legislation requiring all new underground flow lines constructed as part of a high volume
44	0.	horizontal fracturing well site, production facility, or any oil or gas drilling operation which
45		crosses agricultural land, shall be buried following the contour of the surface with a
46		minimum of 60 inches of topcover.
47	7.	Legislation which requires an operator of an oil or gas well to post and maintain a
48 49		performance bond to protect the surface owner in the event that the operator abandons drilling, fails to plug the well(s) or restore the surface; or fails to provide complete
50	_	compensation to the landowner for damage.
51	8.	Legislation requiring individuals or companies seeking to acquire oil and gas mineral
52		interests from landowners to provide the landowner a written summary of the landowner's
53 54		legal and property rights relating to the actual exploration and production of oil and gas prior to any negotiation for the lease or purchase of such mineral interests.
54 55	9.	Efforts by government agencies or private sector to address salt water contamination from
56	0.	abandoned oil wells.

1 2	10.	A dedicated fund to address environmental problems related to abandoned oil and gas wells. Consideration should be given to additional funding for these activities.
3 4	11.	Efforts by government agencies or the private sector to create and maintain an accurate and current listing of mineral rights owners for each tract of ground.
5 6 7	12.	Legislation that would revert ownership interests of coal, oil, gas, and all other minerals (if unclaimed, unused, or dormant for a period of up to 20 years) back to the surface estate owner.
8 9 10	13.	Landowners and owners of rural property being justly compensated by coalbed methane operators when landowner's property is being drilled upon in the absence of an agreement with the landowner.
10 11 12 13	14.	Legislation that would revert ownership rights of utility, pipeline, and underground gas storage easements or leases back to the surface owner if unused, abandoned, or dormant for a period of 20 years.
14 15 16 17 18 19	15.	Efforts by the Illinois County Assessment Officers Association to require oil and gas operators and first purchasers of oil and gas to report well production with accuracy to county assessing officials within a workable timeframe each year, or be subject to a fine for failure to report. This would include each county assessing official, where oil and gas production occurs, receiving an annual free copy of all pipeline reports.
20	We o	ppose:
21	1.	The transfer or production of mineral rights or related rights (including subsidence rights)
22		by any public body without first offering those rights back to the current owner of the
23		surface estate.
24	2.	Any moratorium on horizontal drilling and hydraulic fracturing in Illinois.
25		
26		
27		
28		30. ORGANIC NUTRIENT MANAGEMENT
29		
30

Ongoing research should be encouraged to determine air quality and odor parameters that provide scientifically-proven levels for livestock health and worker safety. There must be no direct discharge from manure storage systems or livestock facilities to surface waters, drainage ditches, or field tiles due to negligence, poor management, and faulty structural design. Direct discharges due to natural causes should be exempt from civil and punitive penalties and damages. Research on manure management is a high priority including such topics as odor reduction, waste and nutrient management, and artificial wetland remediation of nutrients. Some flexibility should be allowed in wetlands management. Any proposed law, rule, or regulation which would restrict a farmer's nutrient management plan shall only be implemented if consistent with Best Management Practices (BMPs) developed at the state level with the cooperation and assistance of our state land grant institutions with considerations given for local conditions. Government agencies must utilize proven scientific practices and cost/benefit analyses when developing policies concerning organic nutrient management facilities and application of manure. Additional government cost-share funding should be made available to farmers for constructing manure handling facilities to correct existing problems. That the development and enforcement of organic nutrient management standards are

1 2 3 4		generally-accepted agricultural BMPs and should comply with the above points. The authority for enforcement and implementation of these standards should be clearly defined to protect farmers from differing interpretations by state or federal agencies.
5 6 7	We si 1.	upport: Programs to educate farmers on techniques regarding properly-managed organic nutrient systems.
8 9	2.	A public relations program to emphasize methods by which farmers protect the environment by using properly-managed organic nutrient systems.
10 11 12 13	We o	ppose requiring livestock operations to obtain permits for application of livestock manure.
13 14 15 16		31. PESTICIDE APPLICATION, EDUCATION, AND RECORDKEEPING
17 18	Prope	er understanding and handling of crop protection products is important to every farmer.
19	We si	upport:
20 21	1.	The pesticide applicator certification as a means to assure society that farmers and other licensed applicators are trained and knowledgeable.
22 23	2.	Encouraging pesticide applicators to be aware of liabilities for drift to all crop and non-crop land that is pesticide-sensitive.
24 25	3.	Encouraging non-agricultural users of pesticides to become better educated on their safe use and potential environmental impacts.
26 27 28	4.	Urging the Illinois Department of Agriculture (IDOA) to review any incorrect Illinois Pesticide Applicators' License exam answers to give applicants the opportunity to become more knowledgeable.
29 30	5.	Giving individuals the option of either taking training and testing of all license categories online or in the classroom.
31 32	6.	Amending current private applicator license procedures to create a license that is valid for five years.
33 34	7.	Federal law that mandates U.S. Environmental Protection Agency to use university data and other credible agricultural industry sources to determine actual pesticide usage levels.
35 36	8.	Restricted use pesticide recordkeeping that protects the interests and confidentiality of farmers and their records.
37 38	9.	Making IDOA the lead state agency to implement and administer all pesticide recordkeeping.
39 40 41	10.	Increased funding for the United States Department of Agriculture (USDA) to increase credible information on pesticide use collected by the National Agricultural Statistics Service (NASS).
42 43 44 45	11.	A change in statute and/or regulations that would allow a custom applicator service to be assigned the responsibility of keeping pesticide application records for landowners and operators.
46 47 48 49		ppose any pesticide recordkeeping requirements that create additional farmer liability for ing pesticides according to label instructions.
50 51		32. RIVER CONSERVANCY DISTRICTS
52		
53		upport:
54 55	1.	Legislation requiring petition signatures containing at least 10 percent of the registered
55 56		voters within a proposed district be secured in order to place the question of creating a new district on the ballot.

1 2	2.	Legislation providing means for disconnecting lands not benefited from an established district.
- 3 4	3.	Legislation requiring wider publication and notice of public hearings.
5		
6		
7		33. RIVERS, LEVEES AND FLOODPLAINS
8 9		Rivers
10	We su	
11	1.	The ability of Congress to earmark discretionary funds for specific projects in a transparent
12		way that identifies the purpose and intended beneficiaries.
13	2.	Pursuing actions in Congress and appropriate federal and state agencies to ensure that
14		we have an efficient and competitive transportation system through which we can
15	0	effectively move agricultural and commercial products.
16 17	3.	Working with other interested groups to improve the lock and dam systems on the
18		Mississippi and Illinois Rivers. As a part of that effort, we support construction of 1,200- foot locks on the Mississippi River at least at Keokuk and below and on the Illinois River at
19		least at Peoria and below.
20	4.	A Midwestern, multi-state effort to review results of existing river and related studies and
21		identify impacts of associated state and federal regulations. Based on these studies, we
22		will promote a multiple-use strategy for the Upper Mississippi River and its navigable
23		tributaries to serve agriculture, industry, recreation, transportation, and the environment.
24		A comprehensive plan must be fair, clear, and equitable for all counties adjacent to or
25		affected by river flooding. Money appropriated for projects should be used by that project
26	F	if at all possible.
27 28	5.	The development of a balanced and comprehensive river management plan by the U.S. Army Corps of Engineers (Corps) under the auspices of the Mississippi River Commission
29		(MRC).
30	6.	Encouraging the MRC to use its authority to promote improvements to navigation,
31	-	economic development, flood control, recreation, and environment within the Upper
32		Mississippi River basin.
33	7.	Seeking representation on the MRC to include at least one member from the Upper
34		Mississippi River area.
35	8.	Encouraging members of Congress to become actively involved in the Mississippi River
36 37	9.	Congressional Caucus. Efforts to increase the Operations and Maintenance budget to maintain navigation,
38	э.	recreation, and flood control systems.
39	10.	Encouraging the consideration of Public Private Partnerships (P3) as a way to capitalize
40		Corps of Engineers' infrastructure projects.
41	11.	An analysis of the effects of changing the hours of operations of any lock and dam. This
42		analysis should look at the effect on the Corps, local communities, and the businesses
43		who use or are affected by the lock and dam. Public input should be sought.
44	12.	Appropriations for the maintenance and operation of the Kaskaskia River lock and dam.
45	13.	Requiring government agencies to send notification about new streambank initiatives to
46 47		landowners whose property is adjacent to and may be impacted by those initiatives.
48		Levees
49	Illinois	has greatly benefited from the construction of flood control levees and their associated
50		is along its rivers. Many have now exceeded their life expectancy and flooding poses a
51		ant threat to surrounding property.
52	-	
53		lieve federal and state government agencies should be committed to assisting with the
54		repair and maintenance of levees on the main rivers and their tributaries. After a disaster
55	occurs	, repairs should be made in "emergency" mode. We believe adequate funds should be
56		

1 2 3		available to the Corps, Natural Resources Conservation Service, and other appropriate es to assist in the repair of levees on the main rivers and their tributaries.
4 5 6	protec	orps of Engineers should be the lead agency for setting standards used to certify levees as ting against certain levels of flooding. These standards should include provisions to allow hable flexibility in administration of the rules such as:
7 8	1.	If the capacity of the levee is found deficient, adequate time should be allowed for repairs before decertification.
9 10	2.	Rules should account for acceptable levels of permeability in sand levees and the capability to bolster levees during flood fights.
11		
12	We su	
13 14	1.	Efforts to remove silt from rivers and to promote the use of that material behind the levee
14 15	2.	for strengthening the levee system. Efforts to secure federal and state funds for constructing certified levees and associated
16 17 18 19 20	Ζ.	systems on major rivers. To evaluate the appropriateness of that funding, we support the concept of using Risk Informed Decision Framework (RIDF) that would address four evaluation areas: national economic development, environmental quality, regional economic development, and other social effects. The RIDF approach should recognize the potential for future economic development.
20	3.	The use of regional economic development benefit:cost ratios in addition to other
22	0.	considerations in determining support for waterway and flood control projects.
23	4.	Equitable treatment of intangible benefits in calculating the benefits of levee construction
24		projects. We encourage the Corps to fully restore damaged levees to no less than pre-
25		existing conditions in a timely fashion. Those levees that are purposely destroyed by the
26		Corps should be fully restored prior to the next normal high water season.
27	5.	Efforts to allow drainage and levee districts to restore a levee to its highest approved flood
28		frequency design and/or profile without being limited by water level mitigation
29		requirements.
30	6.	A uniform federal floodplain standard (also adopted by the states) allowing a one-foot rise
31		in floodwater height for flood protection projects on major rivers and other bodies of water
32	7	bordering two or more adjoining states.
33	7.	Streamlining the process of permitting the repair and/or construction of levees and other
34		flood control devices while maintaining the strict adherence to that section within the
35		Illinois Rivers, Lakes and Streams Act that requires permitting prior to repair and/or construction.
36 37	8.	Using hydrology studies and other pertinent information developed within the
38	0.	Comprehensive Plan to expedite the permitting process for flood control projects within the
39		scope of the plan. A timeline should be developed to establish target beginning and
40		completion dates for each project within the Comprehensive Plan to help move those
41		projects along in a more efficient and timely manner.
42	9.	Legislation that provides the Corps the authority and funding to develop and construct
43	0.	streambank and shoreline protection projects to prevent erosion damages to
44		infrastructure.
45	10.	Adoption of Base Flood Elevation impact mitigation standards for construction within the
46		floodway in Illinois similar to those in lowa or Missouri so that the same level of activity can
47		occur on the Illinois side of the Mississippi River as does in those adjoining states.
48	11.	The Corps' Comprehensive Plan with the following conditions:
49		A. The Plan must include reconstruction of existing levees and ancillary flood
50		reduction system components to ensure they function at their approved design
51		capacity.
52		B. Existing levees within the reach of the Plan that are of sufficient height but lack
53		other necessary features (such as seepage wells and proper slope) should be
54		allowed to be improved to qualify for Federal Emergency Management Agency
55		(FEMA) certifiable 100-year flood frequency protection.
56		

1		C The Lon Small Loves and Drainage District should be incorporated as part of the
1 2		C. The Len Small Levee and Drainage District should be incorporated as part of the Plan. It should enjoy the same right to pursue improvement and rehabilitation as is
3		afforded other levee districts not eligible for 500-year flood frequency protection.
4		D. All acres currently protected by levees should maintain at least their current level of
5		protection.
6	12.	Federal funding for improvement to levees to maintain the existing level of flood frequency
7		protection when induced increases in floodwaters occur due to the adoption of a
8		Comprehensive Plan for Flood Control.
9	13.	Urging the Corps to adopt water flow management policies that avoid the flooding of
10		farmland situated below any reservoir, dam, or behind any levee system managed or
11	11	controlled by the Corps.
12 13	14.	Urging state and federal agencies to provide timely assistance to local levees during a crisis.
13	15.	Eliminating the duplication of levee inspections with resulting cost savings to be used for
15	15.	levee improvements.
16		
17		Floodplains
18	The N	lational Flood Insurance Program (NFIP) should be designed to provide insurance, not
19	regula	ate land use. It should not be designed to revert the floodplain to its (historic, former)
20		veloped state. Furthermore, rules and regulations regarding floodplain management should
21	not sı	upersede private property rights.
22	. .	
23		ulture in a floodplain should be given recognition as providing positive benefits to the
24 25		onment and the public good. These intangible benefits should receive the same deration in benefit: cost analysis as do other environmental benefits.
25 26	CONSI	deration in benefit. Cost analysis as do other environmental benefits.
27	A one	e-size-fits-all approach to floodplain regulations does not accommodate the unique physical
28		ences among floodplains. Regulations, including NFIP, should recognize those differences,
29		range from the expansive floodplains of major rivers to narrow riverines to non-riverine
30		essions.
31		
32		ill seek revisions in FEMA regulations to:
33	1.	Fund and allow the Army Corps of Engineers to coordinate all flood fighting efforts.
34	2.	Increase efforts to improve the coordination and cooperation of FEMA and other
35 36		government agencies in order to streamline the process to deliver emergency assistance in a timely manner during a disaster and the disaster recovery process.
37	3.	Allow the limited issuance of certain construction permits by units of local government
38	0.	where the applicant has assumed all risk for flood damage to the structure without
39		jeopardizing the receipt of NFIP funds and other federal monies for those who wish to
40		participate in federal insurance, disaster, and loan programs.
41	4.	Provide NFIP and disaster payment eligibility for production agriculture facilities and farm
42		residences protected by a levee, including levees that provide protection from less than
43		100-year floods. The insurance offered for such structures should be at a rate which
44	_	reflects the degree of protection provided by the levee.
45 46	5.	Allow structures located in a floodplain that are "substantially damaged" by means other
46 47		than a flood to be rebuilt without regard to NFIP regulations and to maintain flood
47 48		insurance eligibility.
49	Wesi	upport:
5 0	1.	Amendments to federal regulations and policy that would require dewatering of agricultural
51		land as part of flood recovery efforts.
52	2.	FEMA interim guidelines for wet flood-proofing of agricultural structures and efforts to
53		make them permanent.
54	3.	Allowing the replacement construction costs of a structure to be used instead of market
55		value to measure the damage to a structure for purposes of determining whether
56		"substantial damage" has been done.

16study17and m18Struct	Revising NFIP regulations to allow counties and municipalities, at the local unit's discretion, to sell to private owners those properties bought out by FEMA. In such cases, the property should include an easement restricting surface development rights but allowing normal agricultural practices. Continuation of NFIP exemption of property behind properly designed, built, and maintained 100-year certified levees, dams, and other flood control infrastructure. Efforts to educate and inform legislators, regulators, media, farmers, environmental leaders, and the public about the economic and societal benefits and issues associated with the agricultural and commercial use of expansive floodplains. Working to preserve statewide permits authorized by the Illinois Department of Natural Resources-Office of Water Resources for certain construction, transportation, and infrastructure maintenance projects in floodplains at no cost to individuals, businesses, or units of government.
20 21	
22 23	34. SOIL CONSERVATION
	rosion is a threat to the long-term productivity of agriculture. Farmers and landowners d strive to implement soil conservation practices.
28 We su 29 1. 30 31 2. 31 2. 33 34 35 36 37 38 3. 39 40 41 42 4. 43 44 5. 46 47 6. 48 49 7. 50 51 8. 52 53 54 55 56 56 56	Import: Efforts to maintain local Soil and Water Conservation District (SWCD) offices, while improving efficiencies, to provide technological assistance and project certification. Soil conservation programs using education, voluntary compliance, financial incentives and other non-punitive means to encourage compliance. Farmers should not be penalized for a "first offense" failure to meet residue requirements if they have made a good faith effort to follow their conservation plan, or for failure to obtain mandated residue cover following crop failure. Any penalties for subsequent violations should not exceed the farm program benefits on the tract number in violation. The provision of cost sharing by government agencies must be a prerequisite to any compliance program. Increasing funding and technical support for various state and federal programs to assist farmers, landowners, and drainage districts in controlling erosion and runoff, including streambank stabilization. Available resources should be targeted to those areas where greatest problems exist and programs are being implemented. Using available funding sources, such as the Regional Conservation Partnership Program or Illinois EPA Section 319 grants, to support SWCD efforts. Inclusion of conservation practices that address soil erosion, sediment control, and water quality concerns brought on by community development in the Natural Resources Conservation Services' (NRCS) National Handbook of Conservation Practices. Urrestricted technical and educational services of NRCS to municipalities, other local governments, and non-governmental entities within funding parameters. Legislation that would protect landowners from liability resulting from the malfunction of terraces and structures constructed according to NRCS guidelines. Amendment of the election process currently used by Soil and Water Conservation Districts (SWCDs) to allow SWCD directors to be elected with the stipulation that the election be structured so that no more than one director may be elected

 Research on the concept of economic benefits of green payments to farmers. Concepts would include guaranteeing farmers a payment for implementing new conservation practices. This could be initiated through a public/private partnership program. Including funding for technical assistance in the overall costs to implement government programs addressing natural resource or environmental issues. Adequate state and federal funding for updating soil surveys. Amending the Prevailing Wage Act so it does not apply to state funded conservation incentive payments. Public/private partnerships to provide consumer education programs on conservation practices. Encouraging local governments and developers to utilize all practical means to control non-farm soil erosion. Bencouraging local governments and developers to utilize all practical means to control non-farm soil erosion. We oppose the use of state or federal conservation funds for conservation practices on land that is in the process of being developed. The SWCD and/or the NRCS shall require monies to be returned if land is converted to non-production agriculture use in ten years or less after receipt of state or federal funds. This may include land that has been platted or sold to a developer. A preservation habitat program should: Be voluntary. Provide the ability for the landowner to terminate the agreement. Not use eminent domain. Not use eminent domain. Sud scientific peer-reviewed data being used as the basis for treatment of non-point sources under the Clean Water Act or other similar water quality laws at the federal or state level. Funding research on best management practices (BMPs) of agricultural crop production products. The involvement of agriculture, including county Farm Bureaus and drainage districts, in watershed group planning efforts.	1 2 3	9.	Maintaining county SWCDs under the administration of the Illinois Department of Agriculture and funding for SWCD staff at compensation levels comparable to that of state employees.
6 conservation practices. This could be initiated through a public/private partnership program. 7 12. Including funding for technical assistance in the overall costs to implement government programs addressing natural resource or environmental issues. 7 Adequate state and federal funding for updating soil surveys. 7 14. Amending the Prevailing Wage Act so it does not apply to state funded conservation incentive payments. 7 15. Public/private partnerships to provide consumer education programs on conservation practices. 7 16. Encouraging local governments and developers to utilize all practical means to control non-farm soil erosion. 7 We oppose the use of state or federal conservation funds for conservation practices on land that is in the process of being developed. The SWCD and/or the NRCS shall require monies to be returned if land is converted to non-production agriculture use in ten years or less after receipt of state or federal funds. This may include land that has been platted or sold to a developer. 7 35. Encouraging local governments and developers to utilize all practical means to control
 35. VOLUNTARY ECOSYSTEM PRESERVATION We believe there is an opportunity to preserve in a natural condition at least a portion of Illinois ecosystems. We are willing to work with others to accomplish this goal. A preservation habitat program should: Be voluntary. Provide the ability for the landowner to terminate the agreement. Not use eminent domain. Not use eminent domain. Not rely on property taxes. Have no negative impact on adjoining property owners. 36. WATER QUALITY AND WATERSHED PROJECTS We support: Sound scientific peer-reviewed data being used as the basis for treatment of non-point sources under the Clean Water Act or other similar water quality laws at the federal or state level. Funding research on best management practices (BMPs) of agricultural crop production products. The involvement of agriculture, including county Farm Bureaus and drainage districts, in watershed group planning efforts. Increased funding for comprehensive watershed planning and voluntary, incentive-based implementation of BMPs as a result of the planning. Programs to educate farmers and the general public of the need to protect and/or improve water quality and the various BMPs to accomplish those goals. Farmer adoption of the Nutrient Loss Reduction Strategy (NLRS) through voluntary implementation of BMPs. The development of new and the enhancement of existing incentives for adopting 	18 19 20	is in ti returr	he process of being developed. The SWCD and/or the NRCS shall require monies to be ned if land is converted to non-production agriculture use in ten years or less after receipt of

		7.	

1 2 3	8.	Policies made regarding the Gulf of Mexico hypoxic zone to be backed by reliable, broad- based, scientific research. We should unite with other like-minded stakeholders to form a coalition on the issue to:
4 5		A. Coordinate a plan of action.B. Communicate with each other, the general public, elected officials, and members
6 7		regarding the hypoxia area.C. Evaluate current research data and encourage further research on the hypoxic
8		area and issues related to it.
9		D. Use all means at our disposal to address the issue in a way that gives proper
10	0	consideration to the impact it has on agricultural production.
11 12	9.	A portion of water consumption fees collected from any user of water from a drinking water
12		supply lake be used for payments to landowners and tenants who adopt conservation practices within the watershed of the lake.
13		
15	We op	nose.
16	1.	Using mandatory methods to address agricultural, non-point source issues related to Total
17		Maximum Daily Loads (TMDLs) of pollutants in streams.
18	2.	Any increased regulation on tile drainage from farm fields, including designating water flow
19		from farm fields through or over conveyances, such as drain tile or grass waterways, as a
20		point source of pollution under the Clean Water Act.
21	3.	Fines, assessments, and penalties on non-point source pollutions allegedly caused by
22		agriculture but not confirmed by sound scientific peer-reviewed data.
23	4.	Water management programs that restrict the ability of landowners to provide effective
24		drainage and flood control in rural and urban areas.
25		
26		
27		
28		37. WATER WITHDRAWALS
29		
30		lieve that the ability of a landowner to reasonably use water on or beneath his property is a
31		be enjoyed. This right should not be taken without due process of law. Just
32 33	diminis	insation should be given to those regions or individuals whose ability to use the water is
33 34	ummis	
35	Wa ha	lieve agricultural uses must receive a high priority in the allocation of water supplies.
36		leration should be given to businesses or consumers which would feel an economic impact
37		ater restrictions.
38		
39	We be	lieve it is the duty of all users to conserve water to avoid waste of a critical natural
40		ce. Conservation programs should encourage use of water recycling where feasible.
41	Industi	y should be encouraged to use recycled effluent water produced by local municipal
42	wastev	vater treatment facilities in the production process.
43		
44	We su	
45	1.	The establishment of water authorities by referendum of affected property owners, for the
46		purpose of managing the water resource. Water authorities should be established within
47		aquifers or recharge lines and be governed by elected or appointed directors who are
48		resident landowners representing the various water users in the district. Regulations,
49		developed by authorities, should be based upon the availability of supply and needs and
50	2	desires of affected property owners.
51 52	2.	Soil and Water Conservation Districts and Illinois Department of Agriculture (IDOA) should receive support to implement provisions of the Water Use Act to collect necessary data on
52 53		water wells.
53 54	3.	Water wens. Water withdrawal regulations recognizing the responsibility of all users to construct and
55	0.	maintain proper wells. Illinois Department of Public Health regulations provide the
56		

1		guidelines for well construction, and should be based on facts and research data collected
2		from scientifically valid groundwater studies.
3	4.	Continuing research on groundwater availability, recharge and the efficient use of water
4		resources. Such research should be designed to develop a conservation program with
5		emphasis on individual, local and state participation.
6	5.	Local, state, and federal appropriations to bring about groundwater research and technical
7		assistance from state agencies to assist local water planning and management efforts.
8	6.	The Illinois State Water Survey monitoring groundwater movement in aquifers to
9		determine where water shortages may potentially arise.
10		
11	We op	ppose the granting of eminent domain authority for water resource exploration.
12		
13		
14		
15		38. WEED CONTROL
16		
17	We su	ipport:
18	1.	Seeking to improve the enforcement of the Illinois Noxious Weed Law.
19	2.	Efforts by the United States Department of Agriculture (USDA) and the Illinois Department
20		of Agriculture (IDOA) to restrict the importation and sale of viable Niger Thistle seed.
21	3.	Providing information to counties on the process by which weeds can be classified as
22		noxious.
23	4.	Seeking to improve the purity of crop and bird seed and sterilization of all weed seed
24		included in bird seed to deter the spread of viable weed seed.
25	5.	Working with the Farm Service Agency and other governmental agencies in developing an
26		effective eradication program for multiflora rose.
27	6.	The development of a control program for autumn olive and bush honeysuckle, and seek
28		the necessary funds from the state and federal government to adequately eradicate the
29		weed.
30	7.	Legislation to require all governmental agencies to develop, coordinate, and implement
31		proper management practices to control the population and spread of noxious and other
32		weeds on all their properties.
33	8.	Working to add Shattercane, Bull Thistle, Tall Thistle, and Poison Hemlock to the Illinois
34		Noxious Weed List.
35	9.	Encouraging the IDOA to notify the county boards whenever there is a change to the
36		Illinois Noxious Weed Law and/or rules.
37	10.	USDA requiring that seed for program acres be free of pesticide resistant weed seed such
38		as Palmer Amaranth.
39		
40		
41		
42		39. WETLANDS
43		
44		cognize that while our country has had a history of programs encouraging the conversion of
45		nds to uses considered more productive, public opinion now sees significant benefits in
46		ting wetlands. We agree wetlands provide certain benefits and support reasonable efforts
47		courage their conversion. However, this should not mean that in all instances wetland
48		rsion is unnecessary or that private landowners should solely bear the cost of protecting
49		nds. Any effort to protect wetlands should recognize the rights of private property owners
50	and di	rainage districts.
51	14/-	num aut.
52		ipport: A definition that requires all three bonchmarks of hydric sail, hydrophytic verstation, and
53	1.	A definition that requires all three benchmarks of hydric soil, hydrophytic vegetation, and
54		standing water during a predominance of the growing season, supported by a minimum of
55		three consecutive years of sampling data, before a wetland designation is made. Any
56		definition should be subject to public review and legislative approval.

1	2.	Scientific soil vegetation sampling on all lands that are to be designated a wetland. Data
2 3		should be made available to the landowner and be maintained by the Natural Resource Conservation Service (NRCS) as long as that parcel continues to be designated a
4		wetland.
5	3.	An equitable wetland designation appeals process for landowners.
6	4.	A mapping program, as a prerequisite to regulation, which:
7		A. Accurately identifies land which has a predominance of hydric soils, hydrophytic
8		vegetation and standing water.
9		B. Has been subject to the review of locally affected landowners and operators.
10		C. Has a standard interpretation from the state NRCS office which ensures equality
11		across county lines.
12	5.	The exemption from regulation under Section 404 of the Clean Water Act and
13		Swampbuster of prior converted cropland and any land that has been cropped in at least
14		six of the last ten years.
15	6.	Compensation to property owners when their ability to make management decisions as to
16		the best economic use of their property is restricted by laws or regulations aimed at
17	_	protecting wetlands.
18	7.	The ability for private wetland landowners to be able to mitigate wetland conversion on an
19	-	acre-for-acre or value-for-value basis.
20	8.	Compensation to local units of government which lose tax revenue due to governmental
21	0	development or acquisition of wetland areas.
22	9.	Education programs which seek to inform landowners of the benefits of wetlands and to
23 24	10.	urge voluntary conservation of wetland areas. State regulatory control of wetlands programs if they are administered through the Illinois
24 25	10.	Department of Agriculture (IDOA). State regulations should be no more restrictive than
26		federal regulations.
27	11.	The ability to maintain existing drainage structures and tile lines without prior permits or
28		permission.
29	12.	The United States Department of Agriculture (USDA) NRCS being responsible for
30		identification and regulations of all wetlands.
31		U
32	We op	pose the delineation of these areas as linear wetlands:
33	1.	Man-made drainage ditches.
34	2.	Fence lines.
35	3.	Either existing waterways or land previously used for natural drainage.
36		
37		
38		
39		40. WILDLIFE MANAGEMENT
40	W/a ha	lieve environteurs meinteine e vitel vele in encouring e cefe feed comply for future reportions
41 42		lieve agriculture maintains a vital role in ensuring a safe food supply for future generations. le of farmers in this system is to be responsible managers of the land and the business
42 43		ions. In order to achieve these goals, effective wildlife management is essential.
44	operat	ions. In order to achieve these goals, enective windine management is essential.
45	The fo	llowing basic principles are key to effectively implementing wildlife management:
46	1.	Programs that strengthen a landowner's and operator's ability to control wildlife that cause
47		damage on property they own or operate.
48	2.	Educational and informational programs for landowners and operators that promote
49		wildlife management and provide additional income opportunities.
50		
51		Hunting and Trapping
52	We su	
53	1.	Quality wildlife management based on economic, biological, and sociological practices.
54	2.	Hunting and trapping because we recognize their vital role in wildlife management, their
55		economic benefit to the state and its citizens, and that they are a legitimate form of
56		recreation that provides positive influences in our society.

1	3.	Streamlining the Illinois Department of Natural Resources (IDNR) licensing and permitting
1 2	5.	process to make it more efficient and beneficial for the landowner.
3	4.	Programs to control wildlife populations on public lands and in urban areas, including
4	4.	agricultural land within urban areas, where problems exist.
5	5.	Expanded access, with the landowner's permission, to public and private lands to allow
6	5.	more hunting opportunities.
7	6.	Efforts to extend all firearm, muzzle loading, and late winter antierless-only deer seasons.
8	0. 7.	The IDNR issuing combination permits consisting of one antiered and two antierless deer
9	1.	and bonus doe-only permits to hunters to control over-population of deer and reduce
10		health and safety concerns.
11	8.	Encouraging the IDNR to pursue enterprising methods, such as youth or handicap hunts,
12	0.	to control wildlife in areas where problems exist.
13	9.	The opportunity for agricultural landowner participation in the initial decision-making
14	5.	process to release wildlife that would have potential impact on agriculture. We also
15		support the requirement for public notification and public hearings in the proposed release
16		area 90 days prior to the final decision concerning this wildlife release. Landowners
17		should have the right to stop a release on their property.
18	10.	Encouraging IDNR to allow landowners/tenants to purchase additional firearm deer and
19	10.	turkey permits without having to surrender their landowner/tenant free permits.
20	11.	Encouraging the IDNR to allow the harvest of both hens and toms during any turkey
21		season in those counties where population control is necessary.
22	12.	The establishment of an additional fall firearm season for hen-only after the regulation
23	12.	turkey season is complete in those counties where population control is necessary.
24	13.	Legislation or administrative rule to allow landowners to assign free landowner/tenant
25		permits for deer or turkey to family members outside of the household.
26	14.	The IDNR providing landowner's extra free doe permits for firearm and archery seasons.
27	15.	Legislation requiring the IDNR to amend the permitting process allowing for fair, non-
28		preferential access and earlier permit acquisition (February or March) at reasonable fees
29		to non-resident hunters. We also support requiring the IDNR to eliminate the cap on non-
30		resident archery permits and to issue all permits allowed by law. We will aggressively
31		pursue legislation to eliminate the cap on non-resident archery permits.
32	16.	The ability of landowners to lease their land for hunting. Landowners should not be
33		required to have a minimum number of acres or be required to become an outfitter.
34	17.	Programs that encourage and educate youth on hunting and retain hunters in order to
35		enhance the economic viability of agriculture.
36	18.	Eliminating the law requiring landowner(s) and immediate family members to purchase
37		habitat stamps to hunt on property they own or operate.
38	19.	Legislation to allow individual members of farm partnerships and non-resident landowners
39		to obtain free landowner deer and turkey permits.
40	20.	The ability of landowners to obtain a muzzleloader permit without going through the lottery
41	_0.	system.
42	21.	An increase in the number of resident and non-resident firearm permits issued in each
43		county.
44	22.	An increase in bag limits for the turkey season and also support an extension of the paid
45		permit season.
46	23.	A year-round season for Illinois residents to hunt, trap, or dispatch resident Canada
47		geese.
48	24.	The removal of resident geese from protection under the Migratory Bird Treaty Act of
49		1916.
50	25.	Assisting the University of Illinois Extension to develop a basic fee hunting lease
51		agreement.
52	26.	Requiring that deer and turkey hunting permits be issued without charge to the lineal
53		descendants of an Illinois resident who owns at least 40 acres of Illinois land, provided
54		that the lineal descendants hunt only upon that landowner's land.
55	27.	The late winter antierless-only deer season shall be open in those counties with a firearm
56		or muzzleloader season.

1 2 3	28.	Amending the rules for issuance of firearm deer and turkey hunting permits to allow landowners/tenants the ability to buy a hunting permit and be eligible for the first drawing of hunting permits
4 5 6	29.	Continue to work with IDNR and others to monitor and fine tune the definition of outfitters, the registration program, and the guidelines for outfitters.
7		Nuisance Programs
8 9 10 11 12 13	1.	 upport: A wildlife nuisance permit program that embodies three elements to control nuisance animals causing damage to crops and property. Those elements are: A. Harvest time and management flexibility. B. Transferability of permits. C. Sufficient permits to reduce property damage.
14 15	2.	Assisting members in utilizing the law which provides for an IDNR permit to control wildlife where it is causing damage to crops or property.
16 17 18	3.	The American Farm Bureau Federation in seeking landowner authority to control federally regulated wildlife that is creating a nuisance.
19	14/	Assistance/Incentives for Landowners
20 21	vve s 1.	upport: Assistance for landowners and operators in implementing management practices that
21 22 23 24	1.	enhance wildlife populations conducive to the economic well-being of landowners and operators. We support legislation or administrative rule changes, including those that govern controls in urban/adjacent agricultural areas, in order to achieve these goals.
25 26	2.	Incentive programs to enhance wildlife habitat, especially on environmentally-sensitive areas.
27 28 29 30 31 32	3.	Efforts to compensate landowners and operators for damage to agricultural crops, property, and livestock arising from wildlife especially on private property near areas managed by IDNR and the U.S. Fish and Wildlife Service (FWS) and acknowledgement by IDNR as well as FWS in the vital role of farm owners and operators in the feeding of the various forms of wildlife present on lands under our control. This should include compensation to owners/operators for the value added to wildlife community present on
33 34	4.	our lands. Providing incentives to hunters through the Sportsmen for Hunger program and various
35		other means to help manage the doe population.
36	5.	Serving as a source of information for landowners on how they can benefit from voluntary,
37 38		fee-based programs for recreational activities on their land, how landowners can participate in these voluntary programs, what programs (such as Access Illinois Outdoors)
39		currently exist, and further investigate other possibilities.
40		
41		Trespassing
42		upport:
43 44	1.	Efforts to protect rights of farmers and farm owners with problems of trespassing or unauthorized entry by individuals and to require potential users to ask for written
44 45		permission from landowners or tenants before using the land.
46	2.	Legislation that would make trespassing, when associated with deer driving, a class C
47		misdemeanor.
48 49 50 51 52 53 54	We o	ppose the release of elk in Illinois.
55 56		

1		41. EMINENT DOMAIN
2		
3		ill seek legislation providing:
4 5	1.	That a public hearing be held before any land could be optioned or purchased by a public body for any purpose.
6	2.	That property owners' rights should be fully explained at the hearing.
7	3.	That at least 60 days prior to the hearing, the public body proposing the acquisition send
8		written notice of its intentions to property owners whose land would be taken or damaged.
9	4.	For a cause of action and standing for nearby landowners in court cases involving eminent
10		domain. This should allow landowners in the impacted area the opportunity to seek
11 12		monetary damages when their property values are adversely affected by such acquisitions.
13 14	5.	The elimination of eminent domain being used to acquire property for recreational uses.
15	We su	ipport:
16	1.	Legislation to restrict the use of eminent domain to acquire property for wetlands
17 18		mitigation, buffer zones, water diversion, or retention as part of a river flood management plan.
19 20	2.	Restricting the use of eminent domain by a public utility for the installation of pipelines and other utilities.
21	3.	Legislation in which fair market value compensation of private property taken as a part of
22	0.	an eminent domain proceeding receives an exemption from capital gains taxes.
23		
24	We op	opose:
25	1.	The granting of quick-take powers to economic development authorities.
26	2.	The use of eminent domain to acquire properties intended for future sale.
27	3.	The use of eminent domain in the taking of private property for the purpose of economic
28		development by private parties.
29 30	4.	The use of eminent domain for the purposes of economic development when the project in question has not received approval for construction.
31 32 33		
34 35		42. FARMLAND OWNERSHIP
35 36	The ty	pe of domestic ownership of farmland, farm facilities, or farm commodities should not
37		e on the economic opportunities of the individual farmer.
38 39	Wee	ipport:
40	1.	Insisting that all foreign investors be required to conform to all local, state and federal tax
41	••	laws.
42	2.	Continuing to monitor the effect of foreign investment in agriculture, food distribution,
43		banking, insurance and other businesses in the United States.
44	3.	The continuation of programs to require the reporting of foreign ownership of farmland in
45		the United States.
46	4.	State and national programs and policies which encourage and facilitate the ownership of
47		farmland by farmers and those directly involved with the practice of farming.
48	5.	Continuing to monitor the effects of the entry of non-agricultural entities into farming or
49		farm ownership.
50		
51		ppose preferential tax treatment of foreign investments in agricultural land under federal tax
52	law or	treaty provisions.
53		
54 55		
55 56		
00		

1 2		43. GOVERNMENTAL PROPERTY ACQUISITION AND OWNERSHIP				
3		Ve support legislation:				
5 4 5 6 7 8	1.	Preventing any involuntary net loss of private property ownership in any state. All future forced acquisition or sanctioning of property by federal, state, or local government agencies except by universities for agricultural research must be balanced by disbursement or sales of property of equivalent value from government inventories within the state.				
9 10 11	2.	To prohibit additional purchases of real estate for recreational or preservation purposes by any level of government unless the property remains on local tax rolls at the prevailing tax rates and prevailing assessed value of similar local properties.				
12 13 14 15	3.	Providing for a method of compensating units of local government by the state or federal government where the amount of land taken by the state or federal government severely reduces property tax revenues or where the demand for local services related to the state or federal-owned or managed property is substantially increased.				
16 17 18 19	4.	Requiring governmental units maintaining highways, parks or other areas which increase road use or require added police or fire protection or other emergency services to compensate the appropriate local bodies maintaining those roads or providing such services.				
20 21 22 23	5.	Providing for a hearing and a referendum of registered voters in the county or counties in which land is sought by a local governmental unit for recreational, forest or conservation purposes. Existing public lands should be developed for the purpose for which it was purchased before additional property is acquired.				
23 24 25	6.	Providing that agricultural land owned by local governmental units may be rented for agricultural purposes until developed.				
26 27 28	7.	To ensure that those government-owned lands, which are commercially farmed and produce a cash crop, should not be farmed by government, but instead are leased to farmers with the exception of those used for agricultural research.				
29 30 31 32 33 34 35 36	8.	Requiring the governmental unit to offer land for resale to the previous owner or their heirs at the lower of the original purchase price or current market value if the property acquired by an agency will not be used for the original purpose for which it was acquired or to adjacent landowners if the original landowner or their heirs do not exercise the right to purchase. If the original or adjacent landowner does not exercise the right to purchase within one year of the offer to sell, then the governmental unit should be allowed to sell such property to other interested parties. We support a sunset time limit of ten years for the property to be used as intended or the buy-back provisions go into effect.				
37 38 39	9.	Providing that on land owned by the State or local taxing authority where benefits from barter or income are received from such land, a portion of this income or exchange will be returned to the county in which the land is located in lieu of taxes.				
40 41 42	10.	Requiring units of government acquiring railroad right-of-way property (i.e. for trails) to follow the same provisions for fencing and farm crossings as the railroad was required to follow.				
43 44 45 46	11.	Requiring public bodies making acquisition of property for public purposes to make financial settlement within 60 days of the date that the purchase price is determined or be required to pay the property owner the prime interest rate plus 2 percent interest per year on the purchase price until final settlement is made.				
47 48 49	12.	To limit state and federal agencies in their purchase of additional recreational or wildlife habitat until existing sites, other than farmland, are developed and maintained for the purpose for which they were intended.				
50 51 52	13.	That would require governmental agencies to document the impact on agriculture of any infrastructure projects, show whether that impact is justified, and if so take all reasonable steps to reduce or eliminate any negative impact.				
53 54 55 56	14.	That clearly defines scenic easements, establishes parameters on the use of such easements, and restricts the ability of the government to use federal highway funds to purchase scenic easements.				

1	We oppose:		
2 3	1.	Any effort to establish buffer areas around parks, preserves, or other areas being protected for their environmental or ecological value without just compensation to affected	
4		landowners.	
5	2.	The formation of any state or federal wildlife refuges, recreational or conservation areas	
6		until such time as the boundaries of such projects are clearly defined and the property	
7		targeted for acquisition is clearly identified.	
8	3.	The creation or expansion of local, state, and federal refuges, recreational or conservation	
9		areas when the aggregate acreage of such proposed focus areas account for more than	
10		two percent of the county's farmland.	
11	4.	The formation of state or national wildlife refuges, recreation, or conservation areas that	
12		impede the existing natural and artificial drainage systems of landowners in the	
13		watershed.	
14	5.	The continued encroachment of federal and state agencies and local governments on	
15		agricultural and forest lands.	
16	6.	The closing of Illinois State parks and state historic sites since they are valuable assets for	
17		the social and economic survival of rural Illinois.	
18			
19		I work with state and federal agencies to allow the farming of lands acquired under the	
20		ands Trust or other federal or state grant programs. Applications for Open Lands Trust	
21		o be used for wetlands or riparian areas must include a mosquito abatement and	
22		ement plan. The timetable for development of the land acquired through such grant	
23	progra	ms shall be established by the unit of local government, but is not to exceed ten years.	
24			
25		courage public universities to utilize more equitable and risk-sharing adjustable rate leases	
26		than a competitive bidding cash rent lease process on university-owned farmland. All	
27	lessee	s of Illinois farmland controlled by public Illinois universities shall be Illinois based farmers.	
28		and the fame lange and initial and fameland arms of by the Ulain main of Ula sis and other	
29		evaluating farm lease policies on farmland owned by the University of Illinois and other	
30 31		universities, the long term land stewardship commitments, the full potential local effects on ommunities and their economies, and future university relations with possible land donors	
32		be considered in addition to the immediate economic benefits for the universities.	
32 33	Shoulu		
34	When	determining farmland lease policies, the public institutions should consider taking the	
35		unity to use best management practices on the universities' owned farmland consistent	
36		e information being provided through the University of Illinois Extension Service.	
37	With the		
38			
39			
40		44. HERITAGE AREAS AND CORRIDORS	
41			
42	We op	pose heritage areas and corridors, heritage rivers, scenic byways, and any other such	
43	federa	l or state programs that:	
44	1.	Have regulatory authority.	
45	2.	Have the power of eminent domain.	
46	3.	Are involuntary.	
47	4.	Are not grassroots, consensus-based programs that actively involve agricultural interests	
48	_	in their creation, development, and execution.	
49	5.	Do not provide a means for a private property owner, a county, or other state or municipal	
50		authority to opt out of the program.	
51			
52			
53 54			
54 55			
55 56			
00			

1 2		45. LAND USE AND FARMLAND PRESERVATION			
3	Municipal Annexation We support:				
4 5 6 7	vve s 1.	upport: Legislation requiring notification of landowners by the petitioners via certified mail at least 90 days prior to any formal petition to incorporate their land into a municipality as defined in Illinois Statutes.			
8 9 10	2. 3.	Legislation that allows only the landowners in a territory being considered for annexation to be allowed to sign and submit a written petition to the corporate authorities. Efforts to reduce the impacts of municipal annexation on agriculture by reducing to 10			
10 11 12 13	0.	acres the size of the parcel that may be forcibly annexed, and/or establishing a fixed minimum period of time during which agricultural practices may continue.			
13 14	We o	ppose:			
15	1.	Strip and excessive annexation by municipalities.			
16 17 18	2.	Non-contiguous annexation agreements and the ability of municipalities to apply their ordinances to parcels that have not been annexed.			
19 20 21	uninc	never the governing body of any municipality has adopted a resolution to annex any corporated area of land, such municipality shall, before proceeding, present at a public ng the following information:			
22	1.	A map and description of the area to be annexed.			
23	2.	Evidence that such annexation is reasonable and necessary to the proper development of			
24		the municipality.			
25	3.	Evidence of the ability to furnish normal municipal services to the unincorporated area at			
26		the time of annexation.			
27		Foundational Device and the second			
28	\ A /I= :I =	Farmland Preservation			
29 30	1.	e protecting the constitutional rights of landowners, we support:			
30 31	1.	Legislation to broaden the legal basis for farmland preservation approaches and efforts to implement and utilize the following farmland preservation tools:			
32		A. Purchase of Agricultural Conservation Easements (PACE) to be implemented at			
33		the state, county, or local levels or in collaborative arrangements between entities.			
34 35		 B. Transfer of Development Rights (TDR) to be supported and implemented at the state, county, or local levels. 			
36		C. Growth Management Laws including limited annexation rights for municipalities			
37 38		where prime agricultural land is involved and agricultural protection zones based on referendum secured from encroachment of conversion.			
39 40		D. Mitigation standards requiring that conversion of farmland to a non-farm use be considered only if an equal amount of equal quality land is protected by an			
41		agricultural conservation easement.			
42	2.	Efforts to encourage preservation of appropriate lands for agriculture and open space			
43		uses through land use programs which include:			
44		A. A policy statement by all counties to:			
45		1) Preserve Class I and II farmland as defined by the Natural Resources			
46		Conservation Service.			
47		2) Conserve Class III and IV farmland.			
48		 Protect all classes of farmland from indiscriminate conversion to non-farm 			
49 50		use. B. Establishment of a review process with local involvement prior to acquisition of real			
51		property by public agencies for public uses.			
52		C. Identification of the various classes of farmland in all counties.			
53		D. Identification of land in each county appropriate for development because of class,			
54 55		size or location. E. The concept of agricultural areas as found in the Illinois Agricultural Areas			
55 56		E. The concept of agricultural areas as found in the Illinois Agricultural Areas Conservation and Protection Act. We will take a strong leadership role in			
00		Conservation and Frozenion Act. We will take a strong leadership fore in			

1 2		strengthening the Act to ensure that it becomes an effective farmland preservation tool.
2 3	3.	Requiring consideration of the impact on agriculture and the local tax base and the desires
4	0.	of local voters in proposals to take agricultural lands for any public use.
5	4.	Encouraging counties and municipalities to implement boundary and land use agreements
6		that protect farmland. Boundary agreements should not be used as a tool in lieu of the
7		purchase of development rights.
8	5.	Seeking legislation that limits the term of county/municipal boundary agreements to five
9		years in length and subjects such agreements to public notice and public hearing.
10	6.	Maintaining involvement in reviewing federal, state and local proposals to convert
11		farmland to non-farm purposes.
12	7.	Monitoring actions by state agencies regarding implementation of the Farmland Protection
13	0	Act.
14 15	8.	Working with major urban interests to develop policies and programs which will encourage
15 16		compact cities and discourage conversion of farmland. We support the concept of cluster
17		development if the remaining property in the original parcel of property will be preserved for agricultural or conservation purposes.
18	9.	Cooperating with other organizations on farmland preservation issues.
19	10.	Encouraging municipalities to explore all possible avenues to redevelop areas within their
20		borders before annexing farmland.
21	11.	The consideration of impacts on farmland in the development of Environmental Impact
22		Statements as being as significant as the impacts to other environmentally sensitive areas
23		(i.e., historical sites, wildlife/waterfowl refuges, and publicly owned parks and recreational
24		areas). We will work with state and federal agencies to develop an Environmental Impact
25		Statement methodology that increases the contributory value of farmland to the public
26	40	good.
27	12.	Legislation authorizing a graduated conversion fee program for agricultural land that is
28		converted to non-agricultural use based on the parcel's Land Evaluation score. The
29 30		collected fees would support local PACE programs.
31	We or	ppose the use of condemnation by governmental bodies to acquire farmland for farmland
32		rvation.
33	p.000	
34	The fe	ederal government should assist in funding the purchase of agricultural conservation
35		nents for agricultural purposes from willing sellers as a means of preserving farmland
36		t intruding on private property rights. Information about federal, state, local, and private
37		to acquire private property using tax money should be catalogued and publicized through a
38	state-	level clearinghouse.
39		
40	\//a a.	Planning & Zoning
41 42	vve su 1.	upport: Requiring members of a county zoning Board of Appeals to reside within the area covered
42 43	1.	by the county zoning ordinance.
44	2.	Making it mandatory that County Boards require zoning Boards of Appeal to read and
45	۷.	include the report of the Soil and Water Conservation District concerning all zoning
46		applications in the hearing and in the report on the application which is made to the
47		County Board.
48	3.	Basing the extent of the municipality's extraterritorial jurisdiction (ETJ) and zoning
49		capability outside its boundaries on the population of the municipality. The smaller the
50		municipality, the smaller its reach of ETJ and authority should be. No ETJ and
51		municipality's zoning authority should extend beyond 1 1/2 miles.
52	4.	Limiting the ETJ and zoning capabilities of a municipality to either a municipality's utility
53	F	boundary or corporate limits, whichever lies closer to the city core.
54 55	5.	Removing the veto power of municipalities over proposed agricultural areas within their 1
55 56	6.	1/2 mile jurisdiction. Assisting counties and municipalities in considering adoption of zoning.
50	0.	Assisting obtinities and municipalities in considening adoption of zoning.

1	7.	Assisting counties and municipalities in considering the adoption of a comprehensive land				
2		use plan.				
3	8.	Encouraging zoned counties to design and implement land use and zoning techniques to				
4		protect the integrity of agricultural practices including the option of strict agricultural				
5	~	protection zones.				
6	9.	Establishing reverse setbacks, comparable to those in the Livestock Management				
7	10	Facilities Act, for new rural residences built near established livestock facilities.				
8 9	10.	Ensuring local land use administrators have the resources necessary to properly develop and implement land use plans which accommodate production agriculture and ensure the				
10		effective and efficient administration of the plan.				
11	11.	Incorporating the use of a Land Evaluation and Site Assessment (LESA) system in				
12		evaluating the suitability of land for agriculture/development.				
13	12.	Incorporating the principles of the Land Use Evolution and Impact Assessment Model				
14		(LEAM) and encourage its use in planning efforts.				
15	13.	Developing legislation giving counties protest rights over municipal zoning and planning				
16		proposals within the unincorporated area of a county, thus requiring a municipality to have				
17		a supermajority vote.				
18	14.	Requiring municipalities to have at least one voting representative from the 1 1/2 mile				
19		extraterritorial jurisdiction (ETJ) on their planning commission with the possibility of				
20		additional representatives from the ETJ based on the population of the municipality.				
21	15.	Maintaining active involvement in county planning and zoning and in the establishment of				
22		agricultural areas as tools to guide development and limit farmland conversion.				
23	16.	Encouraging the State of Illinois to develop a statewide zoning model that can be used by				
24		county boards and municipal corporate authorities in adopting and amending zoning				
25 26		ordinances that accommodate agriculture and agricultural tourism. Such a model should				
26 27	17.	account for current agricultural-related federal and state laws and regulations. The provisions of the Local Legacy Act and the Local Planning Technical Assistance Act				
28	17.	and work to secure state funding for them by reallocations within the Department of				
29		Commerce and Economic Development.				
30	18.	Supporting legislation that would exempt agriculture from zoning imposed by				
31		municipalities within the extraterritorial area outside municipal boundaries.				
32	19.	Encouraging county Farm Bureaus to develop relationships with local zoning boards to				
33		allow an exchange of information on proposed zoning changes that will impact agriculture				
34		on the county level.				
35	20.	Seeking legislation requiring 30 days advanced written notification of all landowners and				
36		governmental entities whose property or district boundary is within 1 1/2 miles of any				
37		parcel in an unincorporated area for which a zoning change is proposed or on which a				
38		special use permit is sought. If a petition of protest from 20 percent of those landowners				
39 40		or a written notice from that governing board opposing the change or permit is presented,				
40 41		the amendment shall not be passed nor the special permit issued except by the favorable vote of 3/4 of all the members of the county board. Landowners also need to be given 30				
41		days written advance notice of any new or proposed changes to municipal future planning				
43		area or land use.				
44	21.	Seeking legislation that strengthens the Illinois Counties Code to limit the arranging of "by-				
45	21.	right" lots between a proposed rural subdivision and neighboring property owners in a				
46		manner intended to extinguish the neighbors' protest rights.				
47	22.	Encouraging townships with planning commissions to have township government				
48		approved land use plans or goals with corresponding policies that reflect a consensus of				
49		the townships' residents. These plans, goals, and policies should be used as a basis for				
50		recommendations to the county board.				
51						
52		Other				
53		upport: Marking with white of least government to enact "Dight to Form" and increase or recelutions				
54 55	1.	Working with units of local government to enact "Right to Farm" ordinances or resolutions.				
55 56						
00						

1 2 2	2.	Efforts to disclose to potential buyers of rural residential property those conditions associated with living in an agricultural or rural area. These efforts should include state			
3 4	3.	legislation linking such notice to the Residential Real Property Disclosure Act. Encouraging county Farm Bureaus to distribute The Code of Country Living to potential			
5 6	4.	new residents of rural areas so that they better understand rural living.			
6 7	4.	Seeking changes in the process of development of Greenway Plans or other related Illinois Department of Natural Resources plans.			
8		A. Where proposed passive or active greenways are targeted, the landowners should			
9		have direct input on the creation of the plan.			
10		B. Before their county board votes on a plan, the board should be given sufficient time			
11 12		to study the plan and get input from citizens of the county. C. If a county board has approved a plan, there should be the option the county can			
13		withdraw from the plan in the future.			
14		D. If a plan is developed, it should include provisions to ensure that greenways remain			
15		voluntary.			
16					
17 18					
18		46. PRIVATE PROPERTY RIGHTS			
20					
21		elieve in the sanctity of private property and individual rights as provided by the U.S.			
22		titution, as the basis of American freedom and progress. Private property should be defined			
23	to inc	lude all land, timber or other valuable considerations associated with land ownership.			
24 25	Wes	upport:			
26	1.	Developing and seeking legislation defining how private property rights are impacted by			
27		government regulations and takings. Such legislation should provide for compensation to			
28		affected property owners for a total or reasonably measurable partial loss of use of			
29		property resulting from governmental regulations and takings including expanded setback			
30 31	2.	requirements. Efforts to assist landowners when the rightful ownership of land is questioned by an			
32	۷.	organized group outside the control of the state in which the land was originally deeded.			
33		This assistance should include legal and financial assistance from the State of Illinois.			
34	3.	Allowing landowners to select who does the field tile repairs, at the cost of the utility			
35		company or government entity, on their land when private or public projects go through			
36 37	4.	and damage their tile lines. Legislation reforming Illinois law on the partition of property owned by heirs to provide due			
38	4.	process protections like the Uniform Partition of Heirs Property Act.			
39	5.	The requirement that an individual must indicate how they are directly impacted by an			
40		issue when filing public comments on legislation, regulation, or related rules, to the county,			
41		to the State of Illinois, the U.S. Government, and/or their agencies.			
42 43		ppogo;			
43 44	1.	ppose: Any effort to take away or transfer the right of a landowner to grant or deny easements			
45	••	especially on land where easements have previously been given for other purposes.			
46	2.	Legislation allowing the public access to private property without the consent of the			
47		property owner.			
48					
49 50					
51		47. AGRICULTURAL COOPERATIVES			
52					
53	We s	upport:			
54	1.	Voluntary participation in cooperative marketing to better serve Illinois Agricultural			
55 56		Association and county Farm Bureau members, study and develop successful marketing			
50					

1		programs consistent with good business practices and encourage affiliates to follow these
2 3	2.	guidelines. Encouraging and assisting cooperatives to expand member information and involvement
4 5	3.	programs. Encouraging all agricultural cooperatives to have an aggressive revolving stock
6		redemption policy.
7 8	4.	Evaluating processing or further integration into the marketing of farm products as a means of increasing members' income.
9	5.	Encouraging co-ops to play a larger role in the meat industry by building or acquiring
10		packing house/processing cooperatives.
11	6.	Encouraging cooperatives to resist entry into production agriculture that would directly
12 13	7.	compete with cooperative farmers. Encouraging farmers, when direct competition in production agriculture is involved, to
14		resolve disputes through their cooperative boards (including discontinuation of enterprises
15		that compete with the individual stockholder). In the event voluntary efforts are
16		unsuccessful to provide resolution to these competitive issues, we will seek avenues to
17		equitably resolve disputes between cooperatives and their shareholders/members when
18 19		the issue is whether the cooperative is directly competing with any shareholder/member in production agriculture activities. Such avenues may include arbitration or mediation.
20		A. The following competition guidelines should be addressed:
21		1) Competition could exist between a cooperative and its members if:
22		a) A cooperative purchases or rents ground for the sole purpose of
23		producing agricultural commodities.
24 25		b) A cooperative engages in custom farming service.
25 26		 A cooperative owns livestock or grows out livestock owned by others.
27		2) If a cooperative member decides to enter a venture in competition with the
28		cooperative he/she does not have cause to find fault if the cooperative was
29		already engaged in that activity.
30		3) Competitive production activities should not include seed sales, grain
31 32		trucking, the application of plant health products such as fertilizer, lime and crop protection products (e.g. pesticides).
33		B. The following guidelines of remedy should be considered:
34		1) Member must make a written request to the cooperative that it cease
35		production activity.
36		2) The cooperative shall have a specific period of time to resolve the dispute.
37 38		 If the dispute cannot be resolved with the cooperative board, the member may seek to be released from the cooperative. Upon release, the member
39		shall receive the retained earnings allocated plus any outstanding stock,
40		patronage or otherwise, which is held by the member seeking release. The
41		only earnings considered are those on the books of the cooperative that are
42		specifically credited to the account of the named member/patron.
43 44		 The cooperative may refuse services to released members and/or require them to reinvest to obtain future convises
44 45		them to reinvest to obtain future services.Provisions should be made to allow members to legally waive their rights of
46		redemption and release.
47		C. Promoting ongoing personal contact between state and county Farm Bureaus and
48		local cooperatives to raise issues and to resolve problems.
49 50		D. A federated cooperative structure whereby the regional cooperative continues to
50 51		assist local cooperatives in serving their farmer members.
52

1		48. AGRICULTURAL RESEARCH						
2								
3 4	vve s 1.	support: The meaningful involvement of food and agriculture stakeholders in priority setting,						
5	1.	funding, and accountability for federal and state food and agricultural research, extension,						
6		and education programs.						
7	2.	Determining the need and financing necessary to provide appropriate incentives for						
8		building and maintaining a critical mass of well-trained scientists in the public sector to						
9		support and ensure that the U.S. remains the leader in global agricultural production.						
10	3.	A national council with an emphasis on food and agricultural research.						
11	4.	Research funding efforts for the Illinois Council for Food and Agricultural Research (C-						
12	-	FAR).						
13	5.	Redesigning the system of research farms and other pilot scale research facilities to						
14 15		assure that new information and technologies generated in public and/or private efforts around the world are rapidly selected for and adapted to Illinois conditions.						
16	6.	Awarding some federal special grants on a competitive basis that address high-priority						
17	0.	objectives identified by stakeholders and requiring large-scale, well-coordinated efforts by						
18		federal and state institutions and agencies working in cooperation with food and						
19		agriculture organizations and firms.						
20	7.	Annual increases in the federal investment in public food and agriculture research,						
21		extension, and education programs to adjust for inflation in costs.						
22	8.	Federal investment in research that provides a mix of formula, competitive, and special						
23		grants.						
24	9.	Continued federal funding for Cooperative State Research, Extension and Education						
25		Service (CSREES) programs to support but be limited to the broad scope of research,						
26		extension, and education programs that reflect activities in the U.S. food and agriculture						
27 28		sector. Research, extension, and education programs should be tailored to the unique situations of regions, states, and locales. We support the use of both federal and state						
20 29		funds to support basic, developmental, and adaptive research and technology transfer.						
30	10.	Allocation of funds based upon scholarship and quality of science in determining who						
31	10.	should receive funds to carry out federal, state, and local research, extension, and						
32		education programs.						
33	11.	A major personnel building effort in Illinois to restore and improve its public institutional						
34		capacity for food and agriculture research, extension, and education.						
35	12.	A major capital program in Illinois to provide modern facilities and equipment for its food						
36		and agriculture research, extension, and teaching programs.						
37	13.	The integration of research, extension, and education programs to ensure an effective and						
38	4.4	efficient transfer of knowledge and technology to farmers.						
39 40	14. 15.	Funding for the Plant Genome Research Project.						
40 41	15. 16.	Reauthorization of the competitive research facilities program for land grant universities. Maintaining viable, competitive regional agriculture research centers.						
42	17.	Securing foreign investment in U.S. agriculture research where foreign countries stand to						
43		benefit from the outcomes derived from such research.						
44	18.	Programs to educate consumers about the necessity of research and its integral position						
45		in the creation of a long-term, competitive, desirable agricultural growth industry.						
46	19.	Land grant colleges keeping research facilities in the public sector.						
47	20.	An increase of research dollars in the public and private sector dedicated to the						
48		development of new domestic uses of agricultural products and commodities.						
49	21.	Production research on efficient nutrient uptake, water quality and usage, and improved						
50	00	pest and disease resistance for crops and livestock.						
51	22.	An increased role for the Illinois Nutrient Research and Education Council (NREC) in						
52 53		reaching the 25% phosphorus reduction goal stated in the Illinois Environmental Protection Agency (IEPA) nutrient reduction strategy. We advocate facilitating this activity						
53 54		by restructuring the NREC research committee to include a representative from the						
55		southern region of the Illinois Wheat Association and a farmer producer from the southern						
56								

1 2 3	region appointed by Illinois Farm Bureau. This enables input from parties familiar with conditions and opportunities in the priority phosphorus watersheds.							
4								
5								
6	49. AGRICULTURAL TOURISM							
7 8 9 10		ecognize that agricultural tourism serves as an important marketing strategy and also helps ucate the public about where and how food and farm products are grown.						
11	We s	upport:						
12	1.	Recognizing agricultural tourism as an economic development tool for rural areas and						
13		support public policy that encourages the growth of agricultural tourism.						
14	2.	Continuing to build a working relationship between agricultural tourism operations, state						
15		agencies, and other associations.						
16	3.	Encouraging the development and implementation of a statewide strategic plan for						
17		agricultural tourism with industry input and support.						
18 19	4.	Promoting collaborative projects to raise the awareness of the importance of agricultural						
20		tourism to the state's economy and expand growth opportunities in agricultural tourism for Illinois farms including maintenance of appropriate existing databases and websites.						
20	5.	Encouraging the insurance industry to offer insurance policies for agricultural tourism						
22	0.	farms that provide farm owners with coverage for nuisance lawsuits, property damage,						
23		and liability, including liability for injuries to visitors invited to the farm.

50		response plan from a focus on eradicating infected animals to implementing a widely-
51	-	available vaccination control program.
52	5.	State and federal disease eradication programs for livestock, and research designed to
53 54	6.	develop and utilize swift and accurate tests to diagnose these diseases. The quarantine of animals from herds and flocks known to be infected with reportable
54 55	0.	diseases and the destruction of animals which are infected with zoonoses which may
56		enter the human food chain.

	_		
1	7.		A assistance for farmers with infected herds and flocks to develop an approved plan
2			ean up or depopulate their herds and flocks within a reasonable period of time.
3	8.		eral legislation, regulations or programs which will:
4		Α.	Encourage greater uniformity and reciprocity among states for the health
5			requirements necessary for interstate transportation of livestock.
6		В.	Provide, at the state and federal levels, a voluntary management program for
7			Johne's Disease.
8		C.	Encourage beef, dairy, goat, sheep, and cervid farmers to test their animals for
9			Mycobacterium paratuberculosis, the causative organism for Johne's Disease.
10		D.	Encourage cooperation between livestock farmers and the Animal and Plant Health
11			Inspection Service in identifying animals from herds originating from nations which
12			have confirmed cases of Bovine Spongiform Encephalopathy (BSE).
13		E.	Provide for regionalization by Animal and Plant Health Inspection Service (APHIS)
14			to modernize animal movement regulations.
15		F.	Work with stakeholders to develop a process which provides assurance among
16			livestock producers, veterinarians, and packers which will allow for the timely
17			marketing of animals from herds that have been infected with a non-reportable
18			disease, yet are deemed safe to travel, will not spread the disease, and will not
19			negatively impact the food supply.
20		G.	Allow farmer/owner consumption of fallen stock.
21		Н.	Allow slaughter of injured stock at either a federal inspected packing house or a
22			state inspected local slaughter plant to be used for human consumption.
23	9.		ementation of an animal disease traceability program that:
24		Α.	Does not create a burdensome cost to livestock farmers.
25		В.	Encourages uniformity between states.
26		C.	Can quickly and accurately trace an animal in the event of a disease outbreak.
27		D.	Initially uses minimal standards for identification and tracking.
28		E.	Meets the expectations of foreign governments and our customers overseas.
29		F.	Places a high priority on ensuring the U.S. reputation as a reliable supplier of meat
30 31		G.	to foreign markets.
32		G.	Uses low-cost tags and a "bookend" approach (the times an animal enters commerce and harvest) to track an animal's movements and allows for the
32 33			replacement of lost tags.
34		H.	Allows for private sector incentives and disincentives for livestock that are uniquely
35		11.	identified.
36		I.	Requires all exhibition livestock in Illinois to have a unique identification number
37		••	(appropriate for each species) and premises number before allowing the animal to
38			show.
39	10.	Enco	buraging the Illinois Department of Agriculture to appoint a food animal practitioner to
40			position of Illinois State Veterinarian.
41	11.		puraging USDA's Animal Plant Health Inspection Service (APHIS) to make any
42			puncements related to BSE testing after the markets have closed.
43	12.		buraging the use of electronic animal health papers with the ability to include actual
44			al photos of the animal for relevant species.
45	13.		buraging producers to take advantage of educational opportunities regarding biological
46			management (BRM), and implement these procedures in their operations.
47			
48			
49			
50			52. APICULTURE
51			
52			and encourage legislation or administrative rules for Illinois beekeepers, regarding
53			ng and marketing of honey, that are no more stringent than those of neighboring
54	states	5.	
55			
56			

1		53. BIOSECURITY
2 3		inport:
3 4 5	1.	upport: Department of Homeland Security (DHS) placing agricultural screening and inspections as a high priority with its Customs and Border Patrol officers.
6 7	2.	State and federal legislation to establish an indemnity program and contract relief when acts of terrorism result in losses in production and/or marketability of agricultural products.
8 9	3.	Import and export protocols that prevent the introduction of foreign animal and plant diseases.
10 11	4. 5	The concept of looking at animal health issues beyond our own borders and examining them as "North American" issues.
12 13 14	5. 6.	Educational programs for farmers that will assist them in the early identification, treatment, and required reporting of animal and plant diseases. The testing and development of crops that are resistant to diseases not currently present
14 15 16 17	o. 7.	in the United States. The research should be conducted in non-sensitive areas so that the spread of diseases would not cause any loss of value to U.S. agricultural production. Continuing to work with state agencies such as the Illinois Environmental Protection
18 19 20		Agency, Illinois Department of Public Health, and Illinois Department of Agriculture to establish and implement uniform biosecurity protocol for all personnel to follow that is consistent with scientific biosecurity guidelines.
21 22 23		
24 25		54. BIOTECHNOLOGY
26 27 28 29	mainta effecti	ill actively encourage and educate farmers to be good stewards of biotechnology in order to ain the integrity and image of the U.S. food and grain supply, ensure technology remains ive through regulatory compliance, and preserve opportunities for future biotech products rocesses.
30		
31		upport:
32 33	1.	Increased efforts through biotechnology to more rapidly develop traits which have recognized consumer benefits in order to:
34 35		A. Increase the marketability of our products.B. Enhance the environment.
36		C. Increase net farm income.
37 38		 D. Improve product quality. E. Enhance U.S. agriculture's competitiveness in the world market.
39 40	2.	F. Ensure worldwide consumers of stable, ample, safe, and nutritious U.S. products. The coordinated analysis of biotechnology products by United States Department of
41	۷.	Agriculture (USDA), Food and Drug Administration (FDA), and Environmental Protection
42 43	3.	Agency (EPA) before they are approved for domestic use and commercialization. Utilizing science, including unbiased research such as feeding trials, on the development
44		and use of biotechnology enhanced products.
45 46	4. 5.	Ongoing monitoring of the process of biotechnology product research and approval. Increased efforts to educate the public worldwide regarding the safety and benefits of
47		products developed through biotechnology.
48 49	6.	Maintenance of U.S. export markets by securing foreign regulatory acceptance of biotechnology products, including the following priorities:
50		A. Manufacturers of biotechnology enhanced products must assume major
51 52		responsibility for this acceptance. B. Companies offering biotechnology enhanced products for commercialization in the
53		U.S. must first have approval for most major uses and markets, domestic and
54 55		international.
56		

1		C. Companies must provide adequate and accurate information on acceptable
2		markets and market restrictions in writing to farmers prior to purchase of the
3		original input product.
4		D. An ongoing, written reporting system should be maintained for informing farmers
5 6		what markets do not accept or might be adversely affected by currently
6 7		unapproved varieties.
8		E. Responsible production, marketing, and delivery of agricultural products by those growing varieties not approved for all major uses in all major markets.
9	7.	Global commercialization and production of biotechnology-enhanced crops provided that
10	••	U.S. farmers are not disadvantaged by business practices compared to our foreign
11		competitors, and continued monitoring and reporting of biotechnology fees in the U.S. and
12		other countries.
13	8.	Seed tags on packages of agricultural seed stock that clearly indicate the varietal (and
14		genetic) purity of seed contained therein. We will also support legislation which allows
15 16		farmers to recover all damages in those instances where the seed does not conform to the
16 17	9.	genetic purity indicated on the seed tag. New or enhanced marketing methods for biotech and non-biotech seeds provided that
18	9.	they do not restrict market options and offer farmers:
19		A. Improved cropping options.
20		B. More cost-effective inputs.
21		C. Better transportation, handling, planting, and yields.
22		D. Uniformity in unit size (seed count per unit).
23	10	E. Uniformity in seed size.
24	10.	Efforts to establish specific standards for biotechnology enhanced and non-biotechnology
25 26	11.	enhanced product certifications. Adequate testing methods for all commercialized crops in order to protect farmers from
20	11.	liability and ensure the integrity of our grain supply, moreover:
28		A. Tests should keep pace with the latest technology and product introductions.
29		B. Sufficient competition should exist in the testing market to ensure cost-
30		effectiveness.
31		C. Tests should be accurate, verifiable, and acceptable to end users.
32		D. The first-purchaser should be responsible for testing upon taking delivery.
33	10	E. The cost of testing should be shared along the agri-food chain.
34 35	12.	Harmonization of international standards for biotech and non-biotech content, testing, adventitious presence, etc. via the World Trade Organization and Codex Alimentarius.
36	13.	Strict adherence to contracts and sales agreements covering the production, marketing,
37	10.	and use of biotechnology products.
38	14.	The strict enforcement of 100 percent quarantine for the research, production, and
39		processing of pharmaceutical and industrial crops that are not approved for food and feed
40		use in the United States in order to protect the commercial grain industry and food safety.
41	15.	Full compensation to farmers for market losses due to lack of enforcement of 100 percent
42	40	quarantine on experimental crops.
43	16.	Biotechnology products that are coming off patent to have:
44 45		A. A product development clause allowing researchers to work with that trait, with proper stewardship restrictions, before the patent expires. This product
46		development clause should allow for continued product development and the
47		seeking of export market approvals so products can be brought to market as soon
48		as patents expire.
49		B. A system to provide timely access to data collected by the patent holder for the
50		biotechnology regulatory process. The patent holder should receive fair
51		compensation for sharing its data.
52		
53 54		
54 55		
56		

1 2		55. COMMODITY CHECKOFFS			
2 3	We support:				
3 4 5 6	1.	Voluntary checkoffs for market promotion, development and research that are collected only once from individuals, marketing agencies or Commodity Credit Corporation (CCC) loans when forfeited and only if the farmer can have his checkoff refunded.			
7 8	2.	Legislated mandatory checkoffs for market promotion, development and research if such checkoffs contain provisions calling for:			
9		A. The program to be voted in or out by the farmers affected;			
10		B. Control of the program by an independent committee of farmers;			
11 12 13		 C. A full refund of monies upon request to farmers until such time as a refund referendum (not a poll) is approved/disapproved by a majority of farmers voting; D. The monies to be used only for purposes intended; 			
14		E. The checkoff to apply to all imported products;			
15 16		 F. Checkoff-funded research grants for end-user products that have royalty or licensing agreements, where feasible, signed with the research institution. 			
17 18	3.	Providing information to farmers which supports the need for increased funding of programs designed to expand domestic and foreign markets for commodities and			
19 20	4.	commodity products. The use of technology to increase voting participation.			
20 21	4. 5.	Working with commodity checkoff groups to emphasize value-added benefits to farmers			
22	5.	and to focus on higher net returns for farmers.			
23 24	6.	Efforts to revise rules and regulations governing election of directors of commodity checkoff boards.			
25 26					
27					
28 29		56. COMMODITY EXCHANGES			
29 30	Wesi	upport:			
31	1.	The integrity of the Chicago Mercantile Exchange (CME) Group as a pricing mechanism			
32		for commodities.			
33	2.	Regulation of the commodity futures business by the Commodity Futures Trading			
34		Commission (CFTC).			
35 36	3.	Encouraging the commodity exchanges to have an active and viable agriculture advisory committee that meets on a regular basis.			
37 38	4.	Monitoring expanded trading regulations and encourage Illinois Agricultural Association representation on advisory committees to the Commodity Exchanges.			
39 40	5.	Urging the CFTC to minimize price manipulation and ensure the markets are effective as a price discovery mechanism.			
41 42	6.	Reviewing price-setting mechanisms and make recommendations for the most effective price-discovery systems for identity-preserved grains.			
43	7.	Encouraging the CFTC to work with the CME Group to provide accessibility, usability, and			
44		affordability of river terminals, and to increase the number of terminals to be used as			
45		delivery points to fulfill hedged grain contracts. This should result in a means to force			
46		convergence between the cash and futures market at expiration of the contract.			
47	8.	Encouraging the CME Group to offer "mini" energy and fertilizer futures contracts to better			
48		allow farmers and others to hedge their input costs.			
49 50 51 52	We op	opose new or unnecessary fees being imposed on market price information.			
53					
54 55					
55 56					
00					

1		57. COMMODITY GROUPS
2 3		inport.
4 5 6	1.	Upport: Working closely with commodity groups operating in the state and encourage county Farm Bureaus to work closely with local representatives of commodity groups. In addition, we encourage increased cooperation between these commodity groups in Illinois.
7	2.	Offering contractual relationships to those commodity groups desiring such assistance and
8 9	3.	services. Scheduling and holding a regular meeting or meetings with representatives of commodity
10	5.	groups affiliated or contractually related to Illinois Agricultural Association for purposes of
11		exchanging information and coordinating legislative and regulatory positions and actions.
12	4.	Encouraging all commodity groups to pool resources to create and continue a direct
13		concentrated effort to educate consumers on the facts associated with the production of
14 15		livestock and other agricultural commodities using accepted best management practices.
15 16		
17		
18		58. CONTRACT PRODUCTION AND MARKETING
19		
20		upport:
21 22	1.	Monitoring the current changes in marketing practices for many farm commodities, which are moving from farmer to buyer without entering the open market, but are being produced
22		and marketed by contractual specifications.
24	2.	The representation of agriculture and assistance in the area of contract marketing. We
25		support the assignment of staff to research contracts being considered and provide
26		education, information, and advice to attorneys representing farmer members about the
27		ramifications of contracts being entered into and ensure that farmers engaging in contract
28 29	3.	production and marketing are adequately protected. Seeking measures to ensure that adequate price discovery remains in place for all
30	5.	noncontracted farmers.
31	4.	An improved United States Department of Agriculture (USDA) commodity price reporting
32		system based upon required price reporting by first purchasers.
33	5.	Seed and chemical companies to include local elevators in the premium structure, thus
34 25	6	making specialty crops available to more farmers.
35 36	6.	Individual member farmers in their efforts to negotiate fair and equitable production contracts by developing an information clearinghouse and glossary of terms for production
37		contracts.
38	7.	Educating farmers about the risks involved with buyers call provisions and ensuring that
39		these provisions include:
40		A. Specific delivery periods with negotiated final delivery date.
41 42		B. Payments to seller if delivery period exceeds original contracted delivery period or if buyer "calls" for delivery prior to the contracted delivery period.
42		C. Pricing ability to and beyond delivery.
44	8.	Working to develop contract language that will limit farmer liability for grain quality or type
45		to the initial point of delivery.
46		
47		
48 49		59. DAIRY MARKETING
49 50		
51	We su	upport:
52	1.	Input from leaders of the dairy industry and jointly search for solutions to dairy problems
53		which are satisfactory to both our organization and the dairy industry. We urge the
54 55		
55 56		
00		

1		American Farm Bureau Federation to work constructively on a national dairy policy that
2		can jointly be supported. Such policy should include a program that:
3		A. Is market oriented, reflect current marketing conditions, and send the appropriate
4		signals to dairy farmers to cause adjustments in the production of milk components
5		according to market needs. It should allow farmers to look to the marketplace for
6		their long-term economic prosperity.
7		B. Enhances net farm income and ensure an adequate supply of milk.
8		C. Provides for a worldwide free trade policy.
9		D. Continues the present purchase based price support program.
10		E. Maximizes the use of the Dairy Export Incentive Program (DEIP).
11		F. Does not include dairy quota-type marketing concepts.
12		G. Does not include state or regional dairy compacts.
13		H. Supports risk management tools that will protect dairy farmers from catastrophic
14		swings in feed and milk prices.
15		I. Would not place limits on a farmers' growth or production.
16		J. Encourages development of new products targeted towards the export market.
17	2.	Changes in milk content standards on a national basis under the Pasteurized Milk
18		Ordinances so as not to interfere or obstruct interstate movement of milk.
19	3.	The principle whereby Boards of Directors of dairy cooperatives can vote for their
20		members in milk marketing and state promotion plans. However, each farmer, whether or
21		not a member of a cooperative, should have the right to cast his own ballot in any
22		referendum.
23	4.	The increased use of dairy products by the school lunch program and by the armed
24		forces.
25	5.	Working with the dairy industry to coordinate federal and state inspections to eliminate
26		duplication and to continue to allow the shipment of milk between states.
27	6.	Implementing a performance based system that would allow for fewer inspections of dairy
28		farmers that are achieving high ratings from the Illinois Department of Public Health.
29	7.	Monitoring the potential for dairy processor closures or losses of markets and work to
30		inform our membership on alternatives for milk marketing.
31	8.	The pasteurization of raw milk for sale to the public. We also recognize there is a
32		segment of consumers that prefer to purchase raw, unpasteurized milk. For those farmers
33		who sell unpasteurized milk to consumers, the following guidelines should be followed:
34		A. Sales occur directly from farmers on the farm to consumers provided they
35		bring their own containers.
36		B. No wholesalers, retailers, grocery stores or third parties be allowed to sell these
37		products.
38		C. Farmers receive a raw milk permit from the Illinois Department of Public Health to
39		produce and sell raw milk, subject to semi-annual inspections.
40		
41		
42		
43		60. BIG DATA, E-COMMERCE, PRIVACY, AND OWNERSHIP
44		
45	We su	pport:
46	1.	Efforts to better educate stakeholders regarding utilizing new technology or equipment that
47		may receive, record and/or transmit data and the opportunities and risks associated with
48		big data and e-commerce.
49	2.	Requiring companies that are collecting, storing, and analyzing data to provide full
50		disclosure of their intended use of the data.
51	3.	Development of an alternative dispute resolution system for internet transactions.
52	4.	Industry discussions regarding development of industry wide protocols including, but not
53		limited to proper disclosure, privacy and use agreements.
54	5.	Encouraging participants in data sharing use agreements to recognize the value
55		associated with data allowing farmers to receive fair compensations.
56		

1	6.	Efforts to educate farmers about the utilization and impacts of Global Positioning
2		Systems/Geographic Information Systems (GPS/GIS).
3	7.	Uniform ownership standards for the collection, use and release of GPS/GIS data and
4		other forms of data so it becomes the private property of the person who paid for it or
5		whose assets are being utilized.
6	8.	Requiring the consent of the farmer for the release of all personal and farm data.
7	9.	Standardization of formats and protocols developed and used by industry for GPS/GIS
8		applications.
9	10.	Efforts to prevent the use of personal and farm data for illegal activities.
10	11.	Research to determine the appropriate role of government in the implementation of
11		GPS/GIS systems.
12	12.	The neutral and fair transfer of legal data between users by internet service providers.
13	12.	The field and fair databler of logar data between deere by internet corvice providere.
14		
15		
16		61. DEVELOPMENT OF NEW USES AND NEW MARKETS
17		01. DEVELOPMENT OF NEW 03ES AND NEW MARKETS
18	W/o c	upport:
19	1.	Developing innovative uses for and increased consumption of farm commodities and co-
	١.	
20	2	products.
21	2.	Developing promotional programs for businesses and restaurants that use U.Sproduced
22		commodities in their daily business and efforts to develop programs which encourage
23	2	consumption of Illinois-grown farm products.
24	3.	The right of restaurants to market and sell agricultural products and prepared menu
25		choices, without restrictions by local units of government, provided the products are legally
26		produced using best management practices and industry standards.
27	4.	Efforts to develop and procure financing for processing, distribution, and marketing
28		systems for value-added farm commodities with added emphasis on streamlining and
29	_	expediting the approval process for farmer-owned projects.
30	5.	Efforts to develop new local marketing points for specialty crops.
31	6.	Cooperation with farmer-invested checkoff groups, organizations, and agencies seeking
32		expanded domestic and export markets, placing special emphasis on value-added
33		products.
34	7.	Increased funding of grants and guaranteed loan programs to foster research and
35		development of farm commodity and livestock value-enhanced initiatives. A majority of
36		those funds should be targeted to enable farmers to form farmer-owned processing
37		cooperatives.
38	8.	Research on existing and proposed identity-preserved processes in order that government
39		entities may lend their credibility to voluntary industry standards for certification of identity-
40		preserved agricultural products.
41	9.	Promoting the use of Illinois-grown produce in Illinois schools and state-funded
42		institutions.
43	10.	An expanding sheep wool, goat hair, and other animal fiber (e.g. angora, mohair, alpaca,
44		llama) industry in Illinois and recognize the need for continued promotion and
45		development of value-added processing and marketing.
46		
47		
48		
49		62. DIRECT FOOD MARKETING
50		
51		munity Supported Agriculture (CSA) is a program where a farmer grows food for a group of
52	share	cholders who contract to buy a portion of the future crop in a direct marketing relationship.
53		
54	We s	upport:
55	1.	Farms disclosing to shareholders whether products will originate from a single farm or
56		multiple farms.

 Farms, in the event of any product substitution, notifying shareholders by providing a list of products and the physical address of the originating farm of where the product was grown. Farms maintaining records per applicable law including origin of all products, physical address and contact information to ensure traceability of CSA shares for a period of five years. 63. EQUINE AGRICULTURE 63. EQUINE AGRICULTURE We support: Relationships with entities that would allow establishment, access, and maintenance for equine trail activities on publicly-owned recreational trails. Simplifying the process allowing volunteers to assist state/federal workers in trail maintenance and camping areas and to accept donations of items to enhance trails and camping areas. Education programs to promote a viable and growing equine industry. Such programs may include: responsible ownership, animal husbandry, regulations affecting the equine industry, and disease awareness. Efforts to provide insurance and liability coverage that is accessible and reasonable for equine owners and participants involved in equine related activities. Seeking legislation allowing equine harvesting in llinois. Options for end-of-life alternatives for equine harvesting facilities. The expansion and economic welfare of the horse racing industry. Encouraging equine owners to sowrk with veterinarians in practicing regular equine health standards. Performing an annual Coggins Testing to identify Equine Infectious Anemia (EIA). Administering vaccinations, relevant to travel, and exposure to regional disease and infection. Seeking legislation allowing equine haves tracing industry. Performing an annual Coggins Testing to identify Equine In	1	2.	Farms utilizing Good Agriculture Practices and abiding by any state or federal statutes
 products and the physical address of the originating farm of where the products physical address and contact information to ensure traceability of CSA shares for a period of five years. 63. EQUINE AGRICULTURE 63. EQUINE AGRICULTURE We support: Relationships with entities that would allow establishment, access, and maintenance for equine trail activities on publicly-owned recreational trails. Simplifying the process allowing volunteers to assist state/federal workers in trail maintenance and camping areas. Education programs to promote a viable and growing equine industry. Such programs to provide insurance and like years. Education programs to promote a viable and growing equine industry. Such programs may include: responsible ownership, animal husbandry, regulations affecting the equine industry, and disease awareness. Efforts to provide insurance and liability coverage that is accessible and reasonable for equine owners and participants involved in equine related activities. Seeking legislation allowing equine harvesting an limots. Options for end-of-life alternatives for equine including humane harvesting and processing for human consumption, or other uses to produce marketable products, provided all state and federal guidelines are observed. Continued full funding of federal meat inspectors for equine harvesting facilities. Broeyansion and ecconomic weffare of the horse racing industry. Performing an annual Coggins Testing to identify Equine Infectious Anemia (EIA). Administering vaccinations, relevant to travel, and exposure to regional disease and infection. Country Farm Bureaus creating and maintaining county and/or multi-county equine parasites. Seeking legislation clossifying equine as livestock. Merey a countis schedule and strategy for treating and preventing internal eq	2	0	regarding food safety to prevent any food safety risk, including contamination.
 Farms maintaining records per applicable law including origin of all products, physical address and contact information to ensure traceability of CSA shares for a period of five years. 63. EQUINE AGRICULTURE 63. EQUINE AGRICULTURE 83. EQUINE AGRICULTURE 84. Relationships with entities that would allow establishment, access, and maintenance for equine trail activities on publicly-owned recreational trails. 84. Simplifying the process allowing volunteers to assist state/federal workers in trail maintenance and camping areas and to accept donations of items to enhance trails and camping areas. 85. Education programs to promote a viable and growing equine industry. Such programs may include: responsible ownership, animal husbandry, regulations affecting the equine industry, and disease awareness. 86. Options for end-of-life alternatives for equine related activities. 87. Seeking legislation allowing equine harvesting in Illinois. 88. The expansion and economic welfare of the horse racing industry. 99. Encouraging equine owners to work with veterinarians in practicing regular equine health standards. 90. Encouraging equine owners to work with veterinarians in practicing regular equine health standards. 91. Contitued full funding of federal meat inspectors for equine Infectious Anemia (EIA). 91. The expansion and economic welfare of the horse racing industry. 91. Contrued full schedule and strategy for treating and proventing internal equine parasites. 91. Contrust of a execution and maintaining county and/or multi-county equine committees. 91. Seeking legislation classifying equine as livestock. 92. Seeking legislation classifying equine is livestock. 93. Contrust Farm Bureaus creating and maintaining county and/or multi-county equine committees. 94. Efforts to		3.

FARMER PROTECTION FOR PAYMENT OF GRAIN
 The review of civil and criminal penalties to determine if they are adequate and enforced to the full extent of the law. Changes in the U.S. Warehouse Act which would allow any state which has a warehouse law which is more restrictive and more protective than the federal law, to require warehouses operating in the state to comply with the state's provisions rather than the federal statute. 	48		
 to the full extent of the law. Changes in the U.S. Warehouse Act which would allow any state which has a warehouse law which is more restrictive and more protective than the federal law, to require warehouses operating in the state to comply with the state's provisions rather than the federal statute. 	49	We su	upport:
 52 2. Changes in the U.S. Warehouse Act which would allow any state which has a warehouse 53 law which is more restrictive and more protective than the federal law, to require 54 warehouses operating in the state to comply with the state's provisions rather than the 55 federal statute. 	50	1.	The review of civil and criminal penalties to determine if they are adequate and enforced
 law which is more restrictive and more protective than the federal law, to require warehouses operating in the state to comply with the state's provisions rather than the federal statute. 	51		to the full extent of the law.
 law which is more restrictive and more protective than the federal law, to require warehouses operating in the state to comply with the state's provisions rather than the federal statute. 		2.	Changes in the U.S. Warehouse Act which would allow any state which has a warehouse
54 warehouses operating in the state to comply with the state's provisions rather than the 55 federal statute.			
55 federal statute.			
	56		

1 2 3	3.	The maintenance of the current state powers of licensing of warehouses and grain dealers, and general regulation of the grain industry, as embodied in the Illinois Grain Code, and oppose federal preemption of state authority.
4	4.	Educating farmers of the potential risks involved in selling grain to unlicensed parties and
5 6 7	5.	how to better identify licensed grain buying facilities. The concept that farmers who buy more than 100,000 bushels of grain on an annual basis from other farmers for use as seed or feed, and use price-later contracts, must provide a
8		bond to the Illinois Department of Agriculture (IDOA) to guarantee payment for all
9 10		purchases of grain, except no bond shall be required in those situations where a tenant purchases, from his landlord, grain produced by the tenant.
11	6.	The requirement of a reminder notification being made by licensee to the farmer no less
12		than 30 days prior to the end of the 365-day period of coverage for price-later contracts.
13	7.	Continuing educational programs to inform members of potential problems of marketing
14 15		grain under priced later or deferred price contracts. Farmers should be encouraged to request prompt payment available to them under laws and regulations. Farmers should
16		be informed of the risks and costs involved in selling grain without receiving payment.
17	8.	Maintaining the target balance of the Illinois Grain Insurance Fund at a level that is
18	•	commensurate with the cash value of Illinois grain commodities.
19 20	9.	Legislation requiring that arbitration be voluntary on the part of both parties to a grain contract. This should be accomplished by specifying that both parties to a grain contract
20		must agree to arbitration in writing after the dispute arises, as opposed to allowing farmers
22		to be forced to give up their right to use the courts as part of a take-it-or-leave-it contract.
23	10.	Continuing active dialogue and cooperation with IDOA to ensure it has inspectors and
24 25		examiners in adequate numbers to fulfill the regulatory obligations of the Illinois Grain Code.
26

1 2	13.	Changes to have processors and elevators show documented economic justification, including actual cost of correction, for all discount rates concerning grain quality
3		degradation, i.e., test weight, off-color, odor, or moisture.
4	14.	Basing moisture and drying schedules for grain based on one-tenth increments of actual
5		moisture recorded over the allowable moisture content instead of the current practice of
6		rounding up to the nearest one-half point.
7	15.	15 percent grain moisture for corn to be recognized as the industry standard for all
8	15.	disposition excluding storage.
o 9		disposition excluding storage.
10		
11		
12		66. INDUSTRIAL HEMP PRODUCTION
13		
14	We su	
15	1.	Legislation which would remove industrial hemp from being classified as a controlled
16		substance.
17	2.	The production, processing, commercialization, and utilization of industrial hemp.
18		
19		
20		
21		67. LIVESTOCK PRICING AND MARKETING
22		
23	We su	ipport:
24	1.	Legislation, on a state and national basis, establishing the Grain Inspection Packers and
25		Stockyards Administration (GIPSA) as the overall authority and provider of oversight to
26		ensure livestock contracts are clearly-written, confidentiality concerns are addressed,
27		investments are protected, and contractors honor the terms of contracts.
28	2.	Providing GIPSA with the authority to enforce contract standards that enhance price
29	۷.	transparency and price discovery with livestock contracts.
30	3.	Including monthly slaughter capacity reporting in mandatory price reporting by packers.
31	3. 4.	GIPSA be provided enforcement authority to ensure that all instruments used in
	4.	
32		quantifying quality factors for value determination for livestock are performing to a set standard.
33	F	
34	5.	The inclusion of time and date stamp for reporting prices of livestock.
35	6.	The United States Department of Agriculture (USDA) and industry representatives
36		examining the practicality of an industry wide, uniform grading system for pork that
37	_	includes a quality grade.
38	7.	The development and implementation of value-based marketing systems which convey
39		the value of product quality from the retail market to the farm.
40	8.	Farmers fully understanding the risks involved with using but not participating in a market
41		to set a price.
42	9.	Cooperating with the USDA, livestock groups, and university researchers to develop and
43		utilize alternative price discovery methods.
44	10.	Illinois Department of Agriculture seeking the most efficient method for sale barns to report
45		prices for distribution to farmers.
46	11.	Working with the CME Group, other industry groups, and livestock packers to develop a
47		market mechanism that allows for improved forward pricing contracts and flexible pricing
48		opportunities for farmers.
49	12.	The CME Group and the Commodities Futures Trading Commission (CFTC) recognizing
50		packing plants as delivery points to fulfill livestock contracts, resulting in means to bring
51		convergence between the cash and futures market at expiration of the contract.
52	13.	The Illinois Livestock Development Group working with livestock packers in order to
53		facilitate the expansion of livestock buying stations in Illinois.
54	14.	All efforts to improve the livestock price reporting system.
55	15.	All reporting system changes that will generate reported market prices calculated on
56		premium prices paid as well as price lows in the quality range.

1 2 3	16. 17.	Livestock packers securing at least 20 percent of their purchases from the cash market. Additional funding from USDA needed to enable GIPSA to conduct these activities.
4 5		acker is offering a contract that is based upon a cash market, the packer needs to participate s market and help set a price.
6 7 8 9 10		mperative that GIPSA has the oversight on mandatory price reporting – not Agricultural eting Service (AMS).
11 12		68. ORGANIC AGRICULTURE
13	14/	
14 15		upport: All methods of agricultural production and marketing provided they offer opportunities to all
16	1.	farmers who qualify or meet required standards.
17	2.	Efforts to enhance marketing opportunities for producers of organically-grown
18	۷.	commodities just as we support such efforts for conventionally-produced crops.
19	3.	The requirement that all farmers, handlers, and retailers must be certified by a United
20		States Department of Agriculture (USDA)-accredited certifying agent to sell, label, or
21		represent their products as organic.
22	4.	The current program requirement that organic farmers be responsible for taking
23		appropriate measures (e.g., buffer strips) to protect their crops from pollen drift or other
24		factors affecting the integrity of their crops.
25	5.	Enhanced auditing and enforcement of the USDA-certified organic program in line with its
26	0	increasing economic importance and growth.
27	6.	Broad availability of information on the USDA-certified organic program, certification
28 29		process, and labeling requirements, as well as other unbiased information on organic
29 30		products or production.
31		
32		
33		69. PACKERS AND STOCKYARDS ACT
34		
35	We s	support:
36	1.	The Department of Justice (DOJ) and the Federal Trade Commission, with the support of
37		the Grain Inspection Packers and Stockyards Administration (GIPSA), enforcing current
38		anti-trust laws pertaining to packer mergers, market concentrations, packer feeding, and
39		contracting.
40	2.	Open, competitive markets which include access to slaughter space and the number of
41	0	contracted slaughter days should be monitored and enforced if necessary.
42	3.	The DOJ monitoring for a potential monopoly on a regional, rather than a national basis.
43	4.	Including the United States Department of Agriculture (USDA) in the decision-making
44 45	5.	procedure with respect to proposed mergers and acquisitions of meat packing firms. Legislation that grants GIPSA authority to prosecute violators and seek restitution for
45 46	5.	farmers in cases involving agricultural production, processing, and marketing violations.
40	6.	Incorporation of a dealer trust provision to the Packers and Stockyards Act. The bonding
48	0.	requirement for livestock dealers and packers should be reviewed on an annual basis and
49		be adjusted to reflect the volume of the maximum financial exposure to farmers and/or
50		their brokers and then be made available to the public.
51	7.	Changes to the administration of the Illinois Livestock Auction Market Law that will clarify,
52		as well as strengthen, language relating to the use of custodial accounts by livestock
53		auctions.
54		
55		
56		

1 2 3 4 5	coope	pose packers owning livestock before slaughter with the exception of farmer-owned closed ratives and farmer-owned livestock fed and retail-marketed within the provisions of a lty product marketing alliance.
6 7		70. PLANT PATENTS AND PLANT VARIETY PROTECTION
8		a a sub
9 10	We su	
10	1.	Plant and utility patents as well as the Plant Variety Protection Act (PVPA) as ways to enhance innovations in plant performance that benefit farmers.
12	2.	PVPA as the statute governing the Intellectual Property Rights for the breeders of plant
13	۷.	varieties.
14	3.	Maintaining the international and domestic gene/germplasm banks/stores. These should
15	5.	remain easily accessible to the public.
16	4.	Continued plant variety research in the public sector.
17	 5.	Compensation for the public contribution in a joint public-private venture.
18	0.	
19		
20		
21		71. SPECIALTY CROPS
22		
23	Specia	alty crops are defined as fruits and vegetables, tree nuts, dried fruits, and horticulture and
24		y crops including floriculture.
25		
26	We su	pport:
27	1.	Enhancing the industry's image and recognize the importance of its contribution to the
28		agricultural economy.
29	2.	Providing programming, legislative, and marketing efforts for the continued growth and
30		development of various specialty crops that are not already defined as such within the
31		Farm Bill.
32	3.	An indemnification program that provides for losses of plants and nursery stocks that need
33		to be eradicated to control the spread of serious communicable diseases. The program
34		should be funded by state/federal sources and the indemnity payments should be based
35		upon current market values.
36		
37		
38		
39		72. TRADE
40		n n a st
41	We su	
42	1.	Increased agricultural exports to efficiently utilize the productive resources of American
43 44		agriculture to enhance farm income and improve the farm economy through various trade
44 45	2.	policies and long-term investments. Trade negotiating authority for the President of the United States in order to achieve:
40	۷.	A. A full round of World Trade Organization (WTO) trade negotiations including all
40		industry sectors and giving agriculture a full seat at the table. The overall goal
48		should be to lower both tariff and non-tariff barriers for U.S. exports around the
49		world.
50		B. Binding agreements to resolve sanitary and phytosanitary issues on the basis of
51		scientific principles.
52		C. Tariff equalization and increased market access by requiring U.S. trading partners
53		to eliminate tariff barriers within specified timeframes.
54		D. Changes in international agreements and U.S. law and practices that would
55		facilitate and shorten dispute resolution procedures and processes.
56		

4		The way of all evicting integrational engagements we don'the WITO and U.C.
1		E. The use of all existing international agreements under the WTO and U.S.
2		countervailing duty laws to prevent the dumping of subsidized agricultural products.
3		F. Immediate, unrestricted trade and distribution of U.S. approved agricultural bio-
4		tech products. G. Harmonization of domestic food safety and quality standards with our international
5 6		trading partners based on the guidelines set by the WTO.
7		H. Uniform intellectual property protection standards.
8	3.	Improved market access and reduced trade barriers through support of bilateral, regional,
9	5.	and multi-lateral free trade agreements.
10	4.	International Monetary Fund (IMF) efforts provided their actions are based upon sound
10	ч.	fiscal and economic policies and further facilitate world trade.
12	5.	Educating our members, legislators and others on the importance of global currency
13	0.	relationships to agricultural trade and foreign competition.
14	6.	Increased funding for, promotion of U.S. agricultural products through United States
15	0.	Department of Agriculture (USDA) programs like Market Access Program (MAP) and
16		Foreign Market Development (FMD).
17	7.	The requirement of Congressional approval of any embargoes of agricultural products
18		proposed by the President.
19	8.	Developing a program that compensates farmers through market loss payments:
20	-	A. For competitive disadvantages to U.S. farmers resulting from burdensome
21		domestic regulations or standards that are more strict than those in other countries.
22		B. If currency values harm U.S. farm trade and if it can be achieved within WTO
23		guidelines.
24	9.	Resumption of normal trading relations and "most favored nation status" with Cuba.
25	10.	Inspections of imports to the U.S. to protect our domestic production capacity and supply
26		of agricultural products from infestations.
27	11.	Improving informational, organizational, and marketing linkages between and among
28		North and South American farmers.
29	12.	A U.S. Foreign Aid Program that:
30		A. Provides leadership in enhancing global food security and economic development.
31		 B. Increases federal commitment to food and agricultural assistance programs.
32		C. Provides foreign aid in the form of agricultural products and value added
33		agricultural products rather than cash, whenever feasible.
34		D. Encourage recipient nations to use or purchase U.S. agricultural goods and
35		services.
36		E. Gives emergency food relief needs the highest priority in foreign aid programs.
37		F. Does not stimulate production or distribution of farm commodities for export that
38		are in competition with the U.S.
39		G. Included P.L. 480 as an important part of a broader strategy for expanding U.S.
40		food aid.
41 42		
42 43	1.	opose:
43 44	1. 2.	Any U.S. policies that restrict agricultural exports. The subsidization of any direct foreign competition.
44 45	z. 3.	Use of the Precautionary Principle.
40	3. 4.	Monetary policies that harm U.S. trade.
40	ч. 5.	Shipping restrictions that adversely affect agricultural products.
48	5.	onipping restrictions that adversely affect agricultural products.
49		
50		
51		73. USDA REPORTING AND OPERATIONS
52		
53	We si	upport:
54	1.	Continuance of the United States Department of Agriculture (USDA) as a cabinet level
55		department.
56		

1 2 3 4	2.	Efforts of the National Agricultural Statistics Service (NASS), the Illinois Agricultural Statistics Service, and all other governmental agricultural surveys, and encourage members to provide their most accurate information when surveyed for crop, livestock and other reports on a voluntary basis.					
4 5 6	3.	The USDA improving the accuracy and timely release of national and international					
6 7 8	4.	statistics, and maintain the confidentiality of individual farm reports. Legislation to reinstate public access of the Common Land Unit (CLU) data to Natural Resource Conservation Service (NRCS) Data Gateway.					
9 10	5.	Educational efforts to inform the American consumer that the USDA serves a variety of consumer interests and not just those of the farm population.					
11 12	6.	Locally-elected farmer county committees to administer and oversee USDA farm and agricultural credit programs.					
13	7.	Maintaining the NRCS within the USDA.					
14	8.	The USDA to adequately fund, staff, and train local offices to enhance farmer services.					
15 16	9.	Maintaining the USDA's Agricultural Research Service (ARS) budget at levels no lower than the 2007 budget appropriation.					
17	10.	Long-term funding of the USDA's Risk Management Agency (RMA).					
18 19	11.	USDA plans to create a new soybean yield estimate model for the September crop report that reflects the significant changes in soybean production models.					
20 21	12.	The USDA including the number and origin of imported and destination of exported livestock in monthly livestock reports.					
22 23	13.	USDA efforts to enhance and expand electronic filing of USDA forms and dissemination of information.					
23 24	14.	Upgrades of computer technology and appropriate software to allow the NRCS, Farm					
25	14.	Service Agency (FSA), RMA, and NASS to utilize and share the same farm program					
26		enrollment and production information, provided appropriate privacy disclosures and					
27		safeguards are utilized.					
28	15.	A thorough review, including local input, of any proposed closure of a local USDA or FSA					
29		office before a decision is made.					
30	16.	NASS to regularly report data on the production and use of ethanol co- products used for					
31		livestock feed.					
32							
33	We op	ppose the expansion of the locally-elected county committees by the addition of appointed					
34		ittee members.					
35							
36							
37							
38		74. GOVERNMENT CONSERVATION PROGRAMS					
39							
40	We su	ipport:					
41	1.	Conservation programs with a focus on protecting environmentally sensitive areas with					
42	_	filter strips, buffers, and other beneficial practices while reducing overall program costs.					
43	2.	Legislation which ensures that both tenant and landlord interests will be fairly protected.					
44	3.	Limitations on participation rates so as not to adversely affect local farm land rental rates.					
45		504 5					
46	14/	FSA Programs					
47		ipport:					
48	1.	The continued funding of the Conservation Reserve Program (CRP) through current					
49 50		methods, plus private sources on contributions (e.g. conservation groups, hunting groups,					
50 51	2	and environmental groups) to remove fragile lands from production.					
51 52	2.	Basing the judging criteria for CRP enrollment upon the land's erosion potential as cropland and not on its current erosion status.					
52 53	3.	An expansion of the continuous sign up CRP acreage to include:					
53 54	0.	A. Filter strips along waterways.					
55		B. Greater widths of waterways, filter strips, field borders, and riparian buffers.					
56		C. Setbacks at road intersections.					

1		D. Crop protection product setbacks around tile inlet structures.
2		E. Up to one acre filter strips around standpipes and other intakes where surface
3		water enters directly into subsurface water.
4		F. Grassed terraces.
5		G. Buffers around villages, timbered areas, irrigation reservoirs, ponds, and
6		stormwater retention basins.
7		H. Expanding the statewide allocations on field borders and upland restoration
8		projects.
9		I. Approving a 20 percent incentive for all projects using native prairie grasses, forbs,
10		shrubs, or trees.
11		J. Allowing enrollment of and acceptance of "infeasible to farm" acres (an area that is
12		too small or isolated to be economically farmed).
13		K. Farms declared not insurable in the crop insurance program because of wildlife
14		crop damage to be eligible to be enrolled in the CRP.
15	4.	The practice of planting vegetative filter strips along both sides of ditches and waterways
16	ч.	to improve water quality. Strips of variable widths should be eligible for the CRP.
	F	
17	5.	Programs being made available to give farmers viable economic options to traditional crop
18	_	production following expiration of CRP contracts.
19	6.	The ability of all drainage district easements to be included in the CRP filter strip program.
20	7.	Provisions that would allow farmers and landowners to terminate participation in the CRP
21		if the United States Department of Agriculture (USDA) cannot meet the agreed contractual
22		payment amount within 30 days of its due date or is forced by budget constraints to
23		reduce the annual payment amount as set forth in the CRP contract. If the farmer opts out
24		of the CRP all past due monies will be paid with accrued interest.
25	8.	Continuation of CRP on fragile and environmentally sensitive lands formerly enrolled in
	0.	
26		CRP if the CRP is not continued at current levels. Qualified land areas should be
27		determined by county Soil and Water Conservation Districts (SWCDs) and the Natural
28		Resources Conservation Service (NRCS).
29	9.	Encouraging the USDA to give adequate credit during CRP sign ups for areas throughout
30		the nation that experience wind erosion on sandy soils.
31	10.	The broadening of criteria for enrollment or re-enrollment of land in CRP. Examples of the
32		criteria include but are not limited to:
33		A. Land with the highest Environmental Benefits Index (EBI).
34		B. Land targeted based on type of CRP cover or conservation practice, with priority
35		given to land in trees, alley cropping, or with special conservation attributes.
36		C. Land targeted based on water quality, air quality, soil quality, and wildlife.
37		D. Land that, if cultivated, would be most damaging to the environment. For example,
38		land that would likely opt out of farm programs and conservation compliance due to
39		high compliance costs.
40	11.	The elimination of the Erodibility Index as an exclusionary consideration for concentrated
41		CRP sign up.
42	12.	Wildlife habitat improvement, especially on CRP acreage.
43	13.	The Conservation Reserve Program's State Acres for Wildlife Enhancement (SAFE)
	15.	
44		practice that provides financial incentives to producers.
45	14.	Recognition in the EBI that qualifying established cover practices on acreages being re-
46		enrolled in the CRP provide certain benefits over destroying existing stands to plant
47		preferred species.
48	15.	The evaluation of all CRP property by the county NRCS office staff to ensure that
49		previously recommended Best Management Practices (BMPs) have been maintained
50		before the property can be re-enrolled in CRP.
51	16.	Haying and grazing of CRP acres at the discretion of the Secretary of Agriculture in
	10.	
52	47	weather-related or other emergency situations in a timely manner.
53	17.	Each state Farm Service Agency (FSA) office determining CRP rates and acreage
54		qualifications as opposed to the national USDA office.
55	18.	Increasing the enrollment of filter strips in the CRP and offering incentives for re-
56		enrollment.

1 2	19.	The continuation and expansion of the Conservation Reserve Enhancement Program (CREP) with full funding.					
3 4	20.	Any increase to national CRP acreage cap that prioritizes continuous sign up selection of most environmentally sensitive ground and limit acres for future sign up.					
5							
6		ppose:					
7	1.	Any effort to allow the public to automatically use or have access to private property that is					
8 9	2.	enrolled in CRP.					
9 10	Ζ.	Further changes in CRP which would allow conservation acreage to be brought back into permanent production before the ten-year contract expires.					
10	3.	The use of CRP land for biomass fuel production without a corresponding reduction in					
12	Э.	CRP payments.					
13		ora paymenta.					
14		Natural Resources Conservation Service (NRCS) Programs					
15	We si	upport:					
16	1.	Allowing an exemption to the NRCS manual for Environmental Quality Incentives Program					
17		(EQIP) money to be used for streambank stabilization practices prior to the adjacent land's					
18		expiration in a Conservation Reserve Program (CRP) contract or a Conservation Reserve					
19		Enhancement Program (CREP) contract.					
20	2.	The continuation and expansion of the EQIP and the Conservation Stewardship Program					
21		(CSP) with full funding, as long as these programs complement - but do not replace -					
22		programs in the new farm bill.					
23	3.	Providing a clear explanation of the CSP that would create interest and help more farmers					
24		qualify for this program.					
25							
26		State of Illinois Programs					
27		upport:					
28	1.	The Illinois Department of Agriculture creating and implementing conservation programs					
29		for Illinois farmers.					
30							
31							
32							
33 34		75. FARM CREDIT					
35		upport:					
36	1.	The availability of adequate sources of credit for all agricultural interests.					
37	2.	Agricultural lenders publicizing their rates and loan policies.					
38	3.	Farm Service Agency (FSA) assistance to those borrowers who cannot obtain credit					
39	0.	otherwise.					
40	4.	Continued graduation of FSA borrowers who exhibit the ability to obtain credit from					
41		conventional sources and continue to work with FSA in developing improved and flexible					
42		programs with more effective use of FSA funds.					
43	5.	FSA in providing adequate levels and terms of credit in a constructive and responsible					
44		manner.					
45	6.	Reviewing and recommending appropriate FSA agency policy on loan term limits, loan					
46		size limits, and interest rate subsidies.					
47	7.	FSA loans be secured by adequate collateral and reasonable repayment capacity.					
48	8.	The use of past business performance, when available, as a strong indicator of future					
49		performance when considering approval of an FSA loan for a farmer.					
50	9.	Educational programs for members and agricultural lenders on financial management and					
51		marketing programs.					
52	10.	Lenders cooperating with federal and state programs designed to help farmers with					
53		financial stress.					
54 55	11.	Illinois Finance Authority's (IFA) current agricultural loan programs and will cooperate with					
55 56		IFA in the expansion of existing programs and the development of new programs.					
56							

1	12.	Legislation so that persons who have made prepayments to failed licensees for production				
2 3		inputs or services will receive a 100 percent refund of those payments, making the purchaser of the inputs first in line as a secured creditor.				
4	13.	Increased funding for federal guaranteed farm loan programs. These programs should be				
5	10.	made more user friendly for both bankers and farmers by allowing increased flexibility of				
6		repayment terms and minimizing paperwork.				
7	14.	Seeking legislation so alfalfa and grassland forages are considered farm storage facility				
8		loan commodities.				
9	15.	The Farm Credit System (FCS) remaining available to the farmer-owners through the				
10		cooperative system as an alternative to commercial banks.				
11	16.	Commercial banks, the FCS, and other lenders seeking opportunities to cooperate in				
12	. –	meeting the financing needs of farmers.				
13	17.	Elimination of the "exit provision" in the Farm Credit Act.				
14 15						
16	1.	opose: Any move by commercial banks and/or bankers to alter the structure of the FCS, including				
17	1.	attempts to replace farmers on boards of directors with commercial bankers.				
18	2.	Commercial banks having access to money procured by virtue of the agency status				
19		enjoyed by the FCS.				
20	3.	The sale of district FCS banks to commercial or private banking interests.				
21	4.	All efforts to limit access to credit by major credit suppliers or to limit competition or to				
22		artificially set interest rates by government edict.				
23						
24						
25						
26		76. GOVERNMENT ECONOMIC POLICIES				
27		un no sufe				
28		upport:				
29 30	1.	Government policies designed to encourage economic stability, increased productivity, and a greater ability to compete in the international market.				
31	2.	Using a federal budget surplus to reduce the federal debt and to cut taxes.				
32	2. 3.	Federal policies bringing about lower real interest rates.				
33	4.	A reduction in the size of the federal government.				
34	5.	A constitutional amendment to require the federal government to operate on a balanced				
35		budget.				
36	6.	A constitutional amendment to restrict the spending authority of the federal government to				
37		a realistic percentage of the gross national product (GNP).				
38	7.	A requirement that federal and state government agencies return unspent money to their				
39		respective treasuries without a budget cut or penalty for the new fiscal year.				
40	8.	Legislation or a constitutional amendment to require the federal government to fund				
41	-	programs which it mandates on state or local governments.				
42	9.	A requirement that new programs be adopted only when existing programs are reduced or				
43		eliminated as a means to control government spending.				
44	10.	Requiring competitive bidding for any state or federal project.				
45	11.	Privatization of governmental services that could provide savings to the taxpayer and				
46	10	render government services more economical.				
47 49	12.	A sustained long-term monetary policy which will minimize inflation and deflation of prices.				
48 49	13.	An independent Board of Governors of the Federal Reserve System that includes individuals with a working knowledge of agriculture.				
49 50	14.	A full and complete independent annual audit of all activities of the Federal Reserve				
51	14.	System.				
52	15.	Making the adoption of sound economic policies by the state and federal government a				
53	.0.	major priority.				
54		·····				
55	We or	opose:				
56	1. '	Awarding federal grant monies to citizen action groups.				

1	2.	Increased taxes unless accompanied by significant spending cuts. In such cases, the tax
2 3	3.	base should be broadened rather than increasing existing tax rates.
3 4	З.	Efforts to shift programs "on budget" or "off budget" in order to mask the true economic condition of our nation.
5	4.	The financing of gambling facilities through tax exempt industrial development bonds or
6		state guaranteed loans.
7		•
8		
9		
10		77. GOVERNMENT FARM POLICIES
11 12	We h	elieve United States agriculture should be an integral part of the solution for hunger, energy,
13		onment, food security, our balance of trade, and national security. In order to accomplish
14		goals, the farm bill must address world competition, humanitarian need, and world trade
15		ations. A stable, safe agricultural production system is essential to the United States'
16	econo	omy and national security.
17	_	
18		complish this objective, we believe:
19	1.	Consumers should have a reliable, abundant, safe, and nutritious food supply.
20 21	2. 3.	In enhancing U.S. agriculture's competitiveness in the world market. In minimizing world hunger and nutrition deficiencies.
22	3. 4.	In creating a long-term, competitive, desirable agricultural growth industry.
23	5.	In improving the quality of rural life by increasing rural economic development.
24	6.	In providing revenue protection to farmers thus protecting net farm income.
25	7.	The market should give accurate economic signals to consumers and farmers.
26	8.	There should be less reliance on government and more on the market.
27	9.	Improvements to the environment can be achieved through expanded soil conservation,
28		water and air quality initiatives, and advanced technological procedures that are science-
29 30	10.	based and are economically feasible. Farmers should be compensated for their positive impact on habitat, wildlife, and the
31	10.	environment.
32		
33	We o	ppose:
34	1.	Severing the essential link between the nutrition title and the commodity title of the Farm
35	_	Bill.
36	2.	Any type of government supply control or acreage reduction program, with the exception
37	2	of conservation programs.
38 39	3. 4.	A Farmer Owned Reserve for agricultural commodities. The extension of Commodity Credit Corporation (CCC) commodity loans beyond the
40	ч.	current nine-month term.
41		
42	We s	upport:
43	1.	Appropriate income assistance until reforms in taxation, regulation, and market access
44	-	and growth are achieved.
45	2.	Maintaining the sanctity of contracts established in the farm bill.
46 47	3.	Allowing tenants with multiple landlords to treat each farm as a separate entity for
47 48	4.	compliance with the farm bill. Not holding tenants responsible for landlord's actions of farm program payments and
49	7.	eligibility. This should hold steady as long as the tenant had no involvement in what took
50		place. The farm in question should go through the hearing process but other farms should
51		not be affected. Actions by a landlord should not place any tenant farm program
52		payments in jeopardy. The tenant should be able to maintain eligibility for all farms.
53	5.	The ability of landlords to refuse payment from the farm program and allow tenants the
54 55		ability to obtain complete payment from the farm program (even if a combination lease
55 56		exists between the landlord and tenant).
50		

1 2 3	6.	The elimination of any United States Department of Agriculture (USDA) requirement to report the specific cash rental amounts outlined in lease agreements between a landlord and a tenant in an effort to protect a farmer's right to privacy. We do, however, support
4		the requirement to report the type of lease agreement.
5	7.	Strengthening the criteria for non-landowner persons eligible for farm program payments
6		by requiring a significant contribution of active personal management in the farm decision-
7		making process and labor in the farming operation. The current exemption for crop share
8		landowners should be continued.
9	8.	Farmers ability to improve existing drainage systems without being penalized. Land that
10		has been in production, including pasture, should be exempt from the sodbuster and
11		swampbuster provisions.
12	9.	The implementation of more efficient processes, systems, and procedures in order to
13		consolidate and simplify farm program participant visits to the USDA.
14	10.	Consolidation of the power of attorney form to enable the Natural Resource Conservation
15		Service (NRCS) and Farm Service Agency (FSA) to honor the same power of attorney
16		forms.
17	11.	Open enrollment of land in the farm program that was not previously in the program and
18		has changed tenancy or ownership during the duration of the farm bill.
19	12.	Government agencies serving farmers by adjusting hours to accommodate the needs of
20		farmers with off-farm employment and increased use of internet for electronic filing.
21	13.	The means to implement and administer programs being in place prior to starting dates for
22		new programs.
23	14.	Adding alfalfa and grassland forages as covered commodities.
24	15.	Requirement changes to the Conservation Stewardship Program that would allow
25		government owned land into the program if it is leased by a farmer for the duration of the
26	16	contract period.
27 28	16.	Allowing a compliant entity to be eligible to participate in USDA programs on all parcels
20 29	17.	that are not in violation of swampbuster or sodbuster regulations. The payment of CSP grants for all entities as direct deposits in the same manner as other
29 30	17.	FSA or CRP payments, not as System for Award Management (SAM) payments as is
31		done at present.
32	18.	Eliminating the requirement for reporting non-program grass waterways/fallow areas that
33	10.	are baled for forage. If eliminating the forage reporting on non-program acres is
34		unachievable, we support reporting acres only at the time when the principal field crop is
35		reported.
36		
37		Future Farm Policy
38	IFB m	nembers believe the farm bill must be WTO-compliant, provide price and revenue protection
39		rmers, and link nutrition and commodity programs. Crop insurance remains our top priority
40		farm bill. The bill must continue to feature commodity program choice - revenue and price -
41		ncourage production and stewardship decisions that attract public support. We support
42	robus	t conservation programs that will help farmers achieve state nutrient loss reduction goals.
43		
44		Crop Insurance
45		upport:
46	1.	Maintaining the current level of federal risk premium support.
47	2.	A livestock disaster program for multi-year disasters with improved coverage levels and
48		partially subsidized premiums.
49	3.	Maintaining producer privacy on indemnity payments.
50		
51		Commodity Programs
52 53		upport: A floating commodity loop program that increases loop rates, addresses conservation
53 54	1.	A floating commodity loan program that increases loan rates, addresses conservation goals and the credit needs of beginning farmers.
54 55	2.	Farm program payments should be based on the location of the land, not administrative
56	۷.	county.
		ooming.

1	3.	A one-time sign up for the farm program that is automatically renewed each year for the				
2		duration of the program if there are no changes in the farming operation.				
3	4.	Adjusting the current yield and price formula to calculate ARC-CO payments.				
4	5.	The option to update yields, reallocate base acres, and reclaim base acres from expiring				
5		CRP acres returning to production.				
6	6.	Making more timely commodity program payments based on calendar or fiscal year, not				
7		marketing year.				
8						
9	We op	ppose any expansion of conservation compliance provisions to commodity program				
10		ipation.				
11	•					
12		Conservation Programs				
13	We su	upport:				
14	1.	An increase in Conservation Reserve Program (CRP) acreage.				
15	2.	Annual updates to county soil rental rates that better reflect current rental market				
16		payments and minimize impact on tenant farmers.				
17	3.	Limiting the size of pollinator tracts with an emphasis on smaller tracts.				
18	4.	A conservation program to retire environmentally sensitive land for a period of 3 to 5				
19		years.				
20	5.	NRCS and FSA continuously updating cost-share conservation programs to specifically				
21	•	reward practices that allow farmers to address Illinois Nutrient Loss Reduction Strategy				
22		(NLRS) goals.				
23	6.	CRP recipients should have to demonstrate that they are "actively engaged," as farmers				
24	0.	do for other farm programs.				
25						
26		Trade Programs				
27	Wesi	upport a fully funded Market Access Program (MAP) and a fully funded Foreign Market				
28		opment (FMD) program in the next farm bill.				
29	Dovor					
30		Credit Programs				
31	Wesi	ipport:				
32	1.	Raising the loan limit and simplifying the process for FSA beginning farmer loans.				
33	2.	Allowing farmers to re-apply for FSA beginning farmer loans to diversify their operations.				
34	2. 3.	Waiving the requirement for beginning farmers to provide three years of financial				
35	0.	statements.				
36	4.	Eliminating the "graduation clause" that raises interest rates or requiring the applicant to				
37	ч.	close a loan when a beginning farmer's financial condition improves.				
38	5.	Increasing the FSA current loan guarantee limit.				
39	5.	increasing the FSA current loan guarantee linnt.				
40		National Agricultural Statistics Service (NASS)				
41	Wesi	ipport:				
42	1.	Shorter NASS surveys to improve farmer response rates and survey accuracy.				
43	2.	Oversampling operators instead of landlords.				
44	۷.	oversampling operators instead of landiords.				
45		Dairy Programs				
46	We si	ipport:				
47	1.	Classifying milk as a commodity for federal crop insurance purposes.				
48	1. 2.	Revenue protection insurance with risk premium support.				
40	z. 3.	Updating the Margin Protection Program to better reflect feed costs and provide better				
49 50	5.	coverage.				
50 51		ouveraye.				
52						
53 54						
55 56						
56						

1		78. LABOR			
2	We support:				
3 4	1.				
5	1.	common ground and common goals to achieve a common good.			
6	2.	The effective and prompt administration of existing laws to resolve secondary boycotts or			
7	۷.	other illegal actions which disrupt the orderly flow of commerce.			
8	3.	Maintaining the agriculture exemption for overtime pay provisions under the Illinois			
9	0.	Minimum Wage Law.			
10	4.	A study by the appropriate state agencies regarding the programs and activities of			
11		federally funded Legal Services Corporation entities in Illinois. Such a study would review			
12		the impact of such programs on agricultural operations.			
13	5.	American Farm Bureau Federation efforts in lobbying Congress to investigate the Legal			
14		Service Corporation's behavior and scrutinize its budget.			
15	6.	The minimum wage rate at its current level and support an increase only when it is			
16		believed to be non-inflationary.			
17	7.	The passage of federal legislation to establish an improved program for agricultural guest			
18		workers that assist all crop and livestock farmers in finding, retaining, and maintaining an			
19	0	adequate, legal, and cost-competitive labor supply.			
20 21	8.	Permanent employment-based immigration visas for those individuals who have a demonstrated work history and can pass an appropriate background screening.			
22		demonstrated work history and can pass an appropriate background screening.			
23	We op	nose.			
24	1.	The use, by either labor or management, of force, coercion, intimidation, secondary			
25		boycotts or other such means designed to force its will upon the other.			
26	2.	Lawsuits which are filed against agricultural growers by Legal Services Corporation			
27		entities which create economic hardship for the agricultural operations involved and			
28		appear to be intended only to harass the employer of farm labor into providing additional			
29		benefits without justification.			
30	3.	All legislation which increases the revenue base for legal assistance activities in the State			
31	4	of Illinois.			
32 33	4.	Legislation that would require state licensure and inspection for electrical work performed on agricultural property and single-family residences.			
33 34	5.	The elimination of the present family farm exemption in the child labor provisions of the			
35	0.	Fair Labor Standards Act (FLSA).			
36	6.	Amnesty (as defined as a general pardon for offenses against the laws of the United			
37		States of America) for undocumented immigrants.			
38		, C			
39					
40					
41		79. RISK MANAGEMENT/CROP INSURANCE			
42 43	W /a an	accurage continued former education of risk management alternatives, offerts to refine			
43 44		courage continued farmer education of risk management alternatives, efforts to refine g risk management tools, and the development of new crop insurance and other risk			
44		gement tools.			
46	manag				
47		Risk Management			
48	We su				
49	1.	Providing leadership in seeking new ways for farmers to manage risk through the private			
50	•	sector.			
51	2.	The use of pilot programs that would serve to assist farmers in learning to utilize various			
52		risk management tools for all products, including livestock. Farmers willing to participate			
53 54		in the pilot program should be allowed to choose from a variety of approved risk management methods designed to substantially manage the risk of the farming operation.			
54 55		The cost of implementing the chosen risk management method should be subsidized			
56		during the pilot program.			

1 2 3	3.	Education programs that provide risk assessment and risk management as well as professional education for farmers in marketing, financial management, and government regulations.					
4 5	4.	The necessary legislative and regulatory changes to establish a Farmer Investment Savings Account into which a farmer could contribute pre-tax dollars for self-insurance and					
6		be allowed to make withdrawals at the contributor's discretion.					
7	5.	Fully funding the Standard Reinsurance Agreement at the levels outlined in the 2014 Farm					
8 9		Bill.					
9 10		Crop Insurance					
11	We su	upport a crop insurance program which:					
12	1.	Provides payments for actual losses, including losses incurred from delayed or prevented					
13		plantings, arising from natural causes.					
14	2.	Requires consistent interpretation and implementation of all federal crop insurance					
15	_	provisions, especially Prevent Plant provisions.					
16	3.	Provides coverage that is written and losses paid on the basis of dollars per acre rather					
17	4	than based on a guaranteed level of production.					
18 19	4.	Is offered and serviced through private companies, willing and able to assume some level of risk, as opposed to Farm Service Agency offices.					
20	5.	Can be affordably reinsured through the federal government.					
21	6.	Eliminates federally mandated requirements in order to be eligible to participate in the					
22	•	federal farm programs.					
23	7.	Allows the Secretary of Agriculture the right to extend the planting deadline for crop					
24		insurance purposes for untimely plantings due to weather delays.					
25	8.	Allows farmers and/or landlords to opt out of crop insurance coverage, but in so doing					
26	•	would not be eligible for federal disaster payments on crop losses.					
27	9.	Requires that the individual county final yield averages needed for Area Risk Protection					
28		Insurance policies be released one month prior to the deadline for the crop insurance					
29 30		sales closing date for the federal crop insurance program. This date should be uniform for all regions involved in the program.					
31	10.	Allows individual units to be insured on a Farm Service Agency (FSA) optional unit basis.					
32	11.	Requires all United States Department of Agriculture (USDA) agencies accepting					
33		production data, including acreage and yield data that has been certified, to reconcile the					
34		data in order to streamline the reporting process and reduce the potential for fraud and					
35		abuse.					
36	12.	Requires the automatic extension of the Risk Management Agency (RMA) acreage					
37		reporting deadline in the event the FSA certification deadline is extended. The extension					
38	40	of the deadlines should maintain the existing time period between the deadlines.					
39 40	13.	Promotes the use of Soil Productivity, derived from existing County Natural Resource					
40 41		Conservation Service (NRCS) Soil Surveys, as a guide for establishing base T yields for Federal Crop Insurance.					
42	14.	Utilize pricing data for insurable crops during multiple months throughout the growing					
43		season in order to establish a revenue guarantee for revenue-based crop insurance					
44		policies.					
45	15.	Maintains both a fall pricing and spring pricing option for revenue policies.					
46	16.	Studies the elimination of Catastrophic (CAT) coverage and applying those subsidy dollars					
47		to higher coverage levels.					
48	17.	Allows Written Agreements, once granted, to remain effective until loss ratios dictate					
49	40	otherwise.					
50 51	18.	Achieves actuarial soundness by crop, county and state by devoting additional resources					
52		to allow annual review of RMA rates for all crops in all states, with priority given to: A. Adjusting insurance rates to completely and expeditiously reflect mandated loss					
53		ratios.					
54		B. Full implementation of rate reductions for states with consistently low loss ratios.					
55		C. Including non-insured ground in production review in order to receive the most					
56		accurate assessment possible of each county's production capacity.					

1 2	19.	Devotes additional research dollars to improve existing policies to develop new insurance tools and foster the development of new and innovative delivery systems.							
2 3 4	20.	Requires clear delineation during the sales process and the billing process to clearly distinguish between federal crop insurance policies and private company add-on products.							
5	21.	Separates basic or enterprise units by practice - for example - initial- or double-crop							
6		soybeans, where a claim calculation of one practice has no effect on the other practices							
7		and the lengthening of planting dates to better reflect variety maturity, growing season							
8 9		length, Land Grant University or processor recommendations, geographic areas, and weather conditions.							
10	22.	Allows double-cropped feedgrains to be insured as a separate unit if best management							
11	00	practices are followed.							
12 13	23.	Allows the use of all elevator quality factors conducted by certified graders using certified testing equipment. These factors include moisture, foreign material, test weight and							
13		damage.							
15	24.	Offers replant benefits that accurately reflect actual cost of replanting the damaged crop.							
16	25.	Allows farmers and landlords to receive replant benefits reflective of their share of the							
17		expenses to replant the damaged crop, regardless of the crop insurance company or type							
18		of crop insurance policy they or the landlord/tenant have.							
19	26.	Requires RMA claim guidelines to take into consideration economic justification when Best							
20		Management Practices are used to determine treatment thresholds and timeliness of							
21	07	applications.							
22 23	27.	Allows crop insurance agents to be involved in the claims process to provide enhanced and seamless service to farmers.							
23 24	28.	Collects premiums for spring-planted crops no earlier than October first.							
25	29.	Allows beginning farmers to use county yield estimates instead of the calculated T-yield							
26	20.	when establishing yields for federal crop insurance.							
27		5, 1

1 2		89. FARM SAFETY	
3 4 5 6	We encourage all county Farm Bureaus to develop and maintain an aggressive farm safety education program to help protect our current and future generations. It is especially important that youth receive age appropriate training in farm safety.		
7 8 9 10 11 12	We will work to enhance the safety of farmers by encouraging them to use and, when necessary, replace safety lighting, markings, and reflective devices that are of extreme importance when used on farm machinery. We encourage the use and placement of reflective material and safety lighting on farm equipment that conforms with the American Society of Agricultural and Biological Engineers (ASABE) marking standards.		
13 14 15 16 17 18	respor	courage all county Farm Bureaus to work with local farmers, elevators, and emergency use personnel to provide adequate grain safety training. Training should include ation pertaining to safe grain handling as well as grain emergencies.	
19 20		90. FOOD LABELING	
20	We wil	l support:	
22	1.	Promotion of increased use of nutritional information on food labels.	
23	2.	Proper labeling of foods, fibers, and other agricultural products.	
24	3.	Specification of the source of protein whether animal or plant based.	
25	4.	Establishing criteria for a certification process and corresponding legislation for country of	
26		origin labeling. The process should support farmer self-certification of origin of livestock;	
27		operate under a presumption of domestic origin; and not be financially burdensome to	
28		farmers in establishing record keeping criteria.	
29	5.	Enactment of a similar labeling law in the United States like other nations to separate	
30		different classes of beverages to specify milk as a product of an animal's mammary gland.	
31	6.	Development of a "U.S. Product" label for products that are originated, produced, and	
32	-	processed in the U.S.	
33	7.	A voluntary labeling and/or traceability system for identity-preserved agricultural and food	
34 35		products that is based on a clear and factual certification process in order to ensure the health, safety, and integrity of the product, and enhance the ability of the farmer to capture	
36		a value-added return.	
37	8.	Voluntary labeling of biotech or non-biotech products when an approved certification	
38	0.	process is in place including:	
39		A. The development of a consumer-friendly icon or label indicating presence of	
40		genetically modified materials in food.	
41		B. Positive labeling of biotech products that is science-based, truthful, and not	
42		misleading.	
43	9.	The science-based labeling policies of U.S. Food and Drug Administration (FDA),	
44		including:	
45		A. No special labeling unless a food is significantly different than its traditional	
46 47		counterpart, or where a specific constituent is altered (e.g., nutritionally or when affecting allergenicity).	
48		B. Voluntary labeling using statements which are truthful and not misleading.	
49	10.	Vigorous enforcement of FDA food labeling guidelines for domestic and imported	
50	10.	products.	
51	11.	Enforcement of federal statute that specifies commodities at a farmer's market in Illinois	
52		must disclose the address of the farm where each product is produced.	
53			
54		l oppose:	
55	1.	Negative labeling of food products as being derived from the use of biotechnology.	
56			

1	2.	Labels that state or imply organic food is superior to traditional agri-food products or that
2		imply negative consequences of consuming non-organic foods over organic products.
3	3.	The use of "all natural" and "GMO free" synonymously with "organic" as a way to avoid
4		farmer certification as an organic grower.
5		
6		
7		
8		91. FOOD QUALITY PROTECTION ACT
9		
10	The Fo	ood Quality Protection Act (FQPA) provides the foundation for ongoing approval of
11		ances used in food and agricultural production. It is imperative that agricultural groups
12	ensure	e the FQPA is being reviewed and implemented as originally intended.
13		
14	The U	.S. Environmental Protection Agency (EPA) must:
15	1.	Commit to use science, as intended by Congress, in fulfilling the FQPA mandate.
16	2.	Establish a fair and transparent decision making process.
17	3.	End the practice of using unduly conservative end points, safety factors, and default
18		assumptions.
19	4.	Give higher priority to making scientific decisions rather than completing final tolerance
20		reassessments by statutory deadlines. Sound science requires good data and valid
21		methodologies, which require time to develop.
22	5.	Avoid removing uses that pose theoretical risk based on unreasonable, worst case
23		assumptions.
24	6.	Abandon the idea of wholesale revocation of tolerances for the organophosphate
25		insecticides.
26	7.	Develop proposed policies and methods for risk allocation, and submit them for public
27		notice and comment review.
28	8.	Redress the current resource imbalance between tolerance reassessment and new
29		chemical/new use registration and accelerate the pace of making decisions on new
30	-	products and uses.
31	9.	In the event of registration cancellation, allow time for pesticide users to make a
32		reasonable transition to alternative products.
33		
34		
35		
36		92. FOOD SAFETY
37		nnorti
38 39	We su 1.	
40	1.	Actively implementing a communications strategy on food safety issues to provide accurate information to the media, to educate the public, and to raise public awareness of
40		the actions farmers are taking to produce a plentiful, high quality supply of food at fair
42		prices.
43	2.	Measures to improve food inspection and safety through the United States Department of
44	۷.	Agriculture (USDA) Inspection Service to assure consumers of a safe food supply. These
45		measures should reinforce consumer confidence while being cost effective.
46	3.	Protection of our food supply by requiring that imported food products be subjected to the
47	0.	same high safety standards and testing as food produced in the United States.
48	4.	Consumer education through labeling regarding safe cooking and storage procedures.
49	5.	National uniformity in pesticide residue standards. Consideration should be given to the
50	0.	benefits of crop protection products.
51	6.	The concept of negligible risk rather than zero tolerance.
52	7.	Cooperative efforts with food processors, chemical companies, governmental agencies,
53		scientists and others who are responsible for the food supply of our nation to provide
54		factual information on the safety of our food supply.
55	8.	Open communication, not confrontation, with responsible environmental groups.
56		

1	9.	The use of modern technology in the processing and handling of food to assure food
2		safety and promote consumer confidence in the food supply.
3	10.	USDA as the federal agency responsible for food inspection and safety.
4	11.	National (USDA) and state food inspection programs that guarantee adequate inspectors
5	40	and funding for businesses in both domestic and imported food products.
6	12.	The establishment of a USDA-approval process for state-inspected slaughter and
7	10	processing plants that allows them to ship interstate.
8 9	13.	Immediate and longer-term actions by USDA and the Department of Homeland Security (DHS) to raise the priority of, and resources devoted to, federal safety and inspection
10		services, including: the Food Safety Inspection Service (FSIS), Animal and Plant Health
11		Inspection Service (APHIS), and the Foreign Agriculture Service (FAS).
12	14.	The establishment of voluntary guidelines which minimize microbial food safety hazards
13		for fresh fruits and vegetables. The guidelines should:
14		A. Be based on science.
15		B. Remain generic in nature, not commodity specific, to accommodate the diversity of
16		the fresh fruit and vegetable industry.
17		C. Be implemented in a manner that does not impede our ability to export.
18		
19		
20		
21		93. HEALTH CARE
22		
23	14/	Rural Health Care Quality and Accessibility
24	We su	
25 26	1. 2.	Increasing awareness of the health care resources available to rural populations.
20	z. 3.	Providing additional health care resources where needed. Efforts to direct state funding to medical schools to train additional qualified family
28	5.	physicians who will practice medicine in rural areas.
29	4.	Residency programs to provide post-graduate family physician and primary care training
30	ч.	away from major metropolitan-based medical training centers.
31	5.	Programs and incentives to encourage doctors, nurses, and other health care
32	•	professionals to practice in rural Illinois.
33	6.	The development and implementation of programs to assess rural hospital programs, rural
34		health care facilities, and alternative methods of delivering rural health care.
35	7.	Efforts to develop mobile medical equipment and facilities to bring basic health care
36		services to rural areas of the state.
37	8.	Adequate ambulance service in all rural areas.
38	9.	State regulations to allow the development of limited service hospitals to meet emergency
39		care and other needs where the market will not support a traditional full-service hospital.
40	10.	Legislation that provides exemptions to new state and federal regulations for volunteer fire
41		departments and ambulance services.
42	11. 12.	The maximum possible use of the private sector in providing health care.
43 44	12. 13.	Increased funding and improved delivery of mental health services to rural populations. Exemptions in the two Emergency Medical Technician (EMT) rule to allow rural
45	13.	ambulances to proceed to the scene of an emergency call.
46	14.	Granting continuing education credit to EMTs for their time spent responding to
47	17.	emergency calls.
48	15.	The expansion of the size and scope of the Rural Nurse Practitioner Scholarship Program
49		(RNPSP).
50	16.	An increase in state appropriations for programs that allow for recruitment, training, and
51		retention of additional health care professionals to serve rural counties of Illinois.
52		·
53	We wil	N:
54	1.	Encourage county Farm Bureaus to host or sponsor community forums of interested
55		professional and lay groups to assess rural health care and facilities in their county.
56		

1	2.	Encourage county Farm Bureaus to host or sponsor rural health and awareness activities
2		including making screening and testing available to their members.
3	3.	Continue to support the Rural Illinois Medical Student Assistance Program (RIMSAP) in its
4		efforts to provide medical practitioners for rural communities in Illinois. We encourage
5		expansion of that program to meet the changing health care needs of rural Illinois.
6	4.	Encourage the American Farm Bureau Federation to place a higher priority on its
7		continuing study of the problems of the delivery of health care services in the United
8	_	States.
9	5.	Support an Agricultural Physicians and Nursing Program that would educate health care
10		professionals in dealing with agricultural accidents and injuries.
11	6.	Work with the Illinois Department of Public Health to reinstate and maintain all levels of
12		Emergency Medical Technician (EMT) training and testing at convenient locations
13		throughout the state as administered prior to the elimination of EMT basic level testing in
14 15		Illinois. This will ensure that adequate volunteer services can be retained as a Basic Life
15 16		System (BLS) and minimize additional mandatory training placed on Emergency Medical
16 17		Technician Basics (EMT-B). Additional unfunded mandates will impose hardships on the rural volunteer emergency ambulance services. The state of Illinois should look at ways to
18		provide funds for any additional mandates.
19	7.	Encourage funding to rural ambulance services to increase their ability to employ
20	1.	additional certified Pre-Hospital Registered Nurse (PHRN), strengthening their rural
21		emergency response and treatment capabilities.
22	8.	Work to establish a unified EMT and Fire Service Training/Cadet program in which high
23	•	school students who meet the requirements of the State of Illinois and of the program are
24		able to serve in rural areas.
25	9.	Support the concept of providing health insurance through the market place by allowing
26		portability including insuring pre-existing conditions.
27		
28		Payment for Health Care Services
29	We si	upport:
30	1.	Allowing Medicare recipients to purchase private health care plans that are actuarially
31		equivalent to the current Medicare plan. The plan would receive a payment from Medicare
32		to cover some or all of the costs of the premium.
33	2.	Incentives which could be provided to Medicare recipients to allow them to participate in
34	-	private or alternative plans.
35	3.	Efforts to eliminate or significantly reduce cost shifting from Medicaid and Medicare to
36	4	individuals and third party payers.
37	4.	Privately funded optional care delivery systems such as Health Maintenance
38 39	5.	Organizations (HMO's) and Preferred Provider Organizations (PPO's). Efforts to encourage the medical profession to accept Medicare assignments. Rural and
39 40	5.	urban hospitals should be reimbursed equally for providing services to Medicare and
41		Medicaid patients.
42	6.	Relaxation of state and federal mandates which require that certain provisions be included
43	0.	in all health insurance policies. Consumers should be given choices as to what provisions
44		are included in their health insurance programs.
45	7.	Further expansion of medical savings accounts that would qualify for a tax credit to allow
46		individuals and their employees to set aside money in anticipation of future health care
47		costs.
48	8.	An increase in the limit of the contribution amount for all health savings accounts.
49	9.	Consideration of a voluntary regional insurance purchasing cooperative to permit
50		individuals and small companies to receive the same price advantages that corporations
51		receive.
52	10.	Efforts to simplify and make uniform all insurance forms to reduce the cost of processing.
53	11.	Efforts to detect fraud and abuse of Medicare and Medicaid. We encourage swift and
54		vigorous prosecution of those who are found guilty of defrauding these programs.
55		
56		

1 2	We will seek legislation to allow non-penalty and tax-free transfers from IRAs to health savings accounts for major medical emergencies.		
3 4 5 6		rge repeal of the Patient Protection and Affordable Care Act, and support a more market ed system of health care delivery.	
7	We o	ppose:	
8	1.	Mandated employer-provided health insurance.	
9	2.	Any movement to a single-payer health care system.	
10	3.	All tax increases to solve the Medicare problem.	
11	4.	Any further tightening of Medicare provider reimbursement.	
12	5.	Increasing Medicaid eligibility, in an effort to have national health care reform, that would	
13		result in increased cost shifting to the states.	
14		·	
15		Health Care Delivery Cost	
16	We si	upport:	
17	1.	Programs to reduce the inflation in health care costs.	
18	2.	The development and implementation of programs to provide incentives for consumers to	
19		practice wellness and disease prevention.	
20	3.	Tort reform to reduce the practice of defensive medicine (i.e. redundant, excessive or	
21		unnecessary testing primarily for purposes of liability concerns rather than diagnostic	
22		purposes).	
23	4.	Every possible effort to affect cost management while providing accessible high quality	
24		health care.	
25	5.	State and federal efforts to reduce medical malpractice insurance costs, including	
26		limitations on certain punitive and non-economic damage awards, pre-filing mediation	
27		boards, and peer review.	
28	6.	The use of innovations such as surgical centers or outpatient facilities to allow consumers	
29		to opt out of expensive hospital costs when they are unnecessary.	
30	7.	The development of an aggressive education-information program for health care	
31		consumers to assist them in selecting the most cost-effective health care procedures.	
32	8.	Encouragement of regional hospitals to specialize in specific treatment areas with shared	
33		access to eliminate unnecessary duplication of equipment and personnel.	
34	9.	A periodic review of state regulations and licensing requirements for hospitals and medical	
35		professionals to determine the appropriateness of the regulations and licensing	
36		requirements in light of changes in the health care delivery system.	
37	10.	Efforts to allow consumers to purchase medications that are physician prescribed, as	
38		opposed to having to accept a substitute, in order to receive any reimbursement from their	
39		insurance carrier.	
40			
41			
42			
43		94. NUTRITION	
44	14/		
45		upport: UCDA effects to sum and the upper of distationally whether any and mutuitions for the in-all school of	
46	1.	USDA efforts to expand the use of dietetically wholesome and nutritious foods in all school	
47		meals and other nutrition programs and shall not be limited to locally-grown or organic	
48	~	production.	
49 50	2.	Renaming high fructose corn syrup to corn sugar.	
50 51	3.	Greater flexibility with the National School Lunch and Breakfast programs to ensure local school districts are able to determine how to meet the nutritional needs of their students.	
51 52	4.		
52 53	4.	Equal access of pasteurized dairy products, including whole milk, by the USDA national school lunch program and by the armed forces.	
53 54		school when program and by the armed lorces.	
54 55			
56			
00			

1	We op	opose:
2 3 4 5	1.	Financial penalties on local school districts for serving meals that do not meet current federal mandates in the National School Lunch and Breakfast programs.
6		
7 8		95. PUBLIC AID
9	We su	ipport:
10	1.	Public aid based on individual needs, but will not support public aid programs so lucrative
11		that there is an economic advantage in becoming a recipient.
12	2.	Greater uniformity in residency requirements and relative levels of payment among the
13		states in all categories of public aid.
14	3.	More careful supervision of welfare payments at the local level.
15	4.	Use of the Supplemental Nutrition Assistance Program (SNAP) funds for only those foods
16 17		that are dietetically wholesome and nutritious and shall not be limited to locally-grown or
17 18	5.	organic production. Legislation requiring able-bodied recipients to work in order to be eligible for receipt of
19	5.	public aid. Such work could include work on public or civic projects.
20	6.	Shifting responsibility of public aid programs from the federal to the state government
21	•	through the use of block grants.
22	7.	The requirement of photo IDs on all LINK cards issued through the State of Illinois that
23		must be presented at the time of purchase.
24	8.	Efforts to increase Regional Food Banks' proportion of state and federal public aid funds
25	-	for food and nutrition assistance programs.
26	9.	Limiting what items can be purchased using Temporary Assistance for Needy Families
27		(TANF) funds. Items such as alcohol, cigarettes, lotto tickets, and similar items should be excluded.
28 29		excluded.
30		
31		
32		96. RURAL DEVELOPMENT
33		
34	We wi	Il place rural development as one of our highest priorities.
35		
36	We wi	
37	1.	Examine existing private and government rural development programs to determine their
38 39	2.	viability and practicality in improving the rural economy and quality of life in Illinois. Support allowing the United States Department of Agriculture (USDA) Business and
40	۷.	Industry Guaranteed Loan Program to make loan guarantees to farmer-owned projects
41		sited in urban or urbanizing areas if the locations are the most economically viable to
42		return benefits to the rural owners of the project.
43	3.	Monitor the impact of the new definition of "Micropolitan Areas" and, if negative economic
44		effects of rural areas are observed, support changes to that definition to better serve rural
45		areas.
46	4.	Develop a comprehensive program for coordinating rural development activities within the
47		state and county Farm Bureau levels.
48	5.	Support entrepreneurial programs that promote rural economic development including
49	0	business incubator programs in rural high schools.
50 51	6.	Identify specific rural initiatives which our organization will support during the development
51 52	7.	of our comprehensive program. Urge county Farm Bureaus to take a leadership role in rural development programs and
52 53	1.	activities in cooperation with local business, political and agricultural leaders.
53 54	8.	Provide county Farm Bureaus advice and guidance on rural development programs.
55	0.	
56		

1 2 3	9.	Work closely with county Farm Bureaus in the beginning and continuous stages of the rural development process, emphasizing the need for community development and economic development.
4 5 6	10.	Urge the federal government to fully fund Rural Partners and similar projects. Additional federal funds should be provided to these types of projects which use volunteers instead of government agencies to solve rural problems.
7 8	11.	Support additional USDA Rural Development funding and targeting a greater portion of all funds towards stimulating commerce in rural areas.
9 10	12.	Support increased USDA Rural Development funding for technical and marketing assistance to provide value-added opportunities for farmers.
11 12	13.	Support the concept of integrating community services through a single, local economic unit (such as a school) through voluntary local initiatives.
13	14.	Support the designation of a government-based clearinghouse at both the federal and
14 15		state levels to provide one-stop-shopping for information, coordination of all information regarding government sponsored or aided rural development programs, and information
16	45	on allied non-governmental programs.
17 18	15.	Support state and federal legislation to assist local governments to develop integrated Geographical Information Systems (GIS).
19	16.	Urge local governments, when considering offering incentives for the purpose of spurring
20 21		economic development, to: A. Balance new-growth incentives against those available to existing businesses;
22		 B. Make incentives contingent on promised performance;
23		C. Carefully examine program costs relative to the increase in economic activity and
24		tax revenue generated by the development.
25	17.	Support efforts to develop a program and support funding for low-interest loans to assist
26		small business owners in locating and training a successor who would then purchase the
27	10	business and continue its operation.
28 29	18.	Encourage landowners to consider the value of allowing easements that improve rural services in areas that need the access to better water services.
30	19.	Work with rural electric cooperatives, telephone cooperatives, and other entities that have
31	101	existing infrastructure and expertise to provide broadband service to all rural areas. We
32		encourage these entities to use grants and other sources of monetary assistance to
33		provide these broadband services.
34	20.	Support increased sources and levels of funding for developing and expanding broadband
35	21.	telecommunications service to rural areas.
36 37	21.	Encourage ongoing studies regarding the quality of life and well-being of rural Illinois residents by the state of Illinois, universities and similar interest groups.
38		residents by the state of minols, universities and similar interest groups.
39		
40		
41		97. BUSINESS CLIMATE IN ILLINOIS
42		
43		upport:
44 45	1. 2.	Moderating the increasing cost of unemployment compensation. Reducing costs involved in providing Worker's Compensation benefits.
46	2. 3.	Repealing the prevailing wage laws relating to public works projects. Failing to repeal, we
47	0.	will support legislation reducing the burden of the prevailing wage on public bodies outside
48		of major metropolitan areas.
49	4.	Bringing Illinois' minimum wage law in line with federal minimum wage law.
50	5.	Working directly with Illinois' regulatory agencies to improve their efficiency in issuing the
51	0	permits for business, economic, and natural resource development projects.
52 53	6.	Ongoing analyses using state and federal statistics and support reporting of the economic performance of natural-resource-based and mineral-based economies across Illinois'
53 54		counties.
55		
56		

1	We oppose:
2	1. The creation of a state or local tax on any financial transaction, including a tax on any
3	commodity, currency, or securities.
4	2. Efforts to incorporate into law the doctrine of "comparable worth" as it relates to
5	compensation levels for various types of jobs.
6	
0	
7	
8	
9	98. COMPENSATION OF PUBLIC OFFICIALS
10	
11	We support legislation to require Congress and the Illinois General Assembly to vote by a roll call
12	vote on any legislation that would increase the pay or pension of its members.
13	
14	Pay and pension legislation should be voted on as a separate issue and not be tied to unrelated
15	legislation.
16	Manual and a state of the state
17	We support and encourage legislation that would deny all state employment-related benefits to
18	any state employee who is convicted under any federal, state, or local law of theft,
19	embezzlement, or accepting bribes in connection with the employee's service as a state
20	employee. We support and encourage an amendment to the Illinois Pension Code and/or other
21	current law to the extent necessary to implement this proposed legislation.
22	
23	We support capping the pension amount that a state legislator can receive regardless of their
24	length of service or the position(s) they hold with the state after leaving the legislature. We
25	
	support enabling elected local and state officials having access to a 457 plan rather than a
26	taxpayer-funded pension.
27	
28	We support a requirement for public employees to contribute a greater amount to their public
29	pensions.
30	
31	
32	
33	99. DRIVING UNDER THE INFLUENCE
34	
35	We support vigorous onference of the surrent driving under the influence laws and legislative
	We support vigorous enforcement of the current driving under the influence laws and legislative
36	efforts to improve those laws.
37	
38	
39	
40	100. ELECTIONS
41	
42	We will support:
43	1. State legislation modifying the present consolidated election law so that the right of secret
44	ballot is protected.
45	 Efforts to shorten political campaigns by moving primaries closer to general elections,
46	provided county clerks have ample time to prepare for the general election.
47	3. A limit on campaign spending and franking privileges.
48	4. Reform of federal campaign laws to include:
49	A. A strengthening of campaign spending limitation laws to prevent abuse through the
50	use of "soft money" and independent expenditures.
51	B. An increase in the allowable contribution an individual may make to a candidate.
52	5. Efforts to require that individuals registering to vote, and during voting, to present
53	government issued photo identification.
54	6. Efforts to further consolidate elections in order to streamline the system and reduce
55	taxpayers' expense.
56	
50	

1 2 3	7.	Efforts to reduce the number of required election judges from five to three for every precinct in counties with a population of 250,000 or less should the local election authority so desire.
4 5 6	8.	Greater oversight and aggressive enforcement of voter fraud of elections by the Illinois State Board of Elections.
7	Wed	oppose:
8	1.	The use of the Internet for voting in any local, state, or federal election.
9	2.	The current Illinois Undervote Notification Law and will support legislation to repeal it.
10	3.	The use of campaign phone calls that are made to households that are on a do-not-call
11		list.
12 13 14	4.	 Same day voter registration unless the following conditions are met: A. All voter registrations done on Election Day take place at a county designated government facility.
15		B. A valid photo ID is required at the time of registration.
16		C. Full funding of same day voter registration be provided by the State of Illinois to
17		ensure this is not a burdensome unfunded mandate on local governments.
18		D. Legislation be passed to require uniform statewide standards for the voter
19		registration process.
20		
21	We	will actively participate in any legislation and other activities that will involve electoral reforms.
22		
23		support uniform signature requirements, on nominating petitions, regardless of political party,
24	for c	andidates seeking public office.
25 26		
26 27		
28		101. FARM EQUIPMENT
29		
30	We	will support:
31	1.	Efforts to clarify and simplify the vehicle code and regulations relating to farm vehicles.
32	2.	Efforts by Illinois Agricultural Association and county Farm Bureaus to encourage proper
33		use and law enforcement agencies to enforce proper use of slow moving vehicle (SMV)
34		emblems.
35	3.	Efforts to encourage retailers of SMV emblems to provide information with each such sale
36 37		informing consumers of regulations regarding the proper use of the SMV and the potential consequences of improper use.
38	4.	The development and utilization of standardized specifications for pesticide containers and
39	_	equipment connectors for closed pesticide application systems.
40	5.	Efforts to encourage farm equipment manufacturers and American Society of Agricultural
41		and Biological Engineers (ASABE) to work together to create an improved system for new
42 43		equipment that would better indicate turns, such as sequentially-flashing red arrows,
43 44	6.	making them more noticeable for vehicles that are approaching or following. The development and utilization of standardized wire color/function for any trailer licensed
44 45	0.	for over-the-road use or any towed implement of husbandry.
46		for over-the-road use of any towed implement of husbandry.
47	Wei	will seek legislation to increase the fine for the misuse of SMV emblems to at least \$75.00 for
48		irst offense. We encourage law enforcement agencies to enforce the laws pertaining to the
49		oper use of the SMV emblem.
50	•	
51	Wed	oppose licensing farm tractors and other implements of husbandry.
52		
53		will develop an SMV and lighting campaign to encourage farmers to update their older
54		pment with new amber flashing lights and SMV emblems. This should be accomplished
55	throu	ugh educational programs and materials presented by both state and county Farm Bureaus.
56		

1 2 3 4		ppose legislation which would forcibly require mandatory lighting on older farm equipment than what is currently required by law.
5 6		102. FENCE LAW
7 8 9 10	betwe	upport the current fence law which provides for the equitable cost sharing of division fences een adjoining landowners. When a piece of property is subdivided, it is the obligation of the oper and subsequent owners to install and maintain a new line fence.
11 12 13		
14 15		103. FIREARMS
16 17 18		ty Farm Bureaus should urge local law enforcement officials and local civic and public ce organizations to promote gun safety programs.
19	We si	upport:
20 21	1.	The Firearm Owners Identification Act and reasonable fees for Firearm Owners Identification cards based on the administrative costs of the program.
22 23	2.	The Firearm Concealed Carry Act issuing permits to carry concealed firearms to qualified Illinois' citizens through an appropriate application process.
24 25	3.	Current legislation that requires background checks and waiting periods for handgun purchases.
26 27 28	4.	Legislation and/or a change to Illinois State Police rules which will allow active duty personnel residing in Illinois the opportunity to obtain a concealed carry permit without regard to state of residence.
29		
30		ppose any type of gun registration program or new, more stringent gun control laws or rules.
31 32 33	Any n	new commitment in gun control should be made by the strict enforcement of current laws.
34		
35 36		104. ILLINOIS BANKING STRUCTURE
37	We si	upport a banking structure in Illinois that provides for:
38	1.	An adequate supply of competitively priced credit for all credit worthy farmers.
39 40	2.	Competent staff in local banks who understands agriculture and the unique risks with which farmers must deal.
41	3.	Fair competition for banks of all sizes and in all locales.
42	4.	Fair competition with other types of lenders.
43 44	5.	Economic decision making that is not concentrated in the hands of a few large financial institutions.
45	6.	Constant or a net inflow of capital into the area in which financial institutions are being
46		acquired, merged or consolidated.
47	7.	Greater scrutiny of and investigation into anti-trust ramifications and violations in relation
48		to mergers and other acquisitions.
49		
50		
51 52		105. ILLINOIS DEPARTMENT OF AGRICULTURE
53		
54		upport:
55 56	1.	Maintaining the Illinois Department of Agriculture (IDOA) as a stand-alone agency.

1	2.	Strengthening the IDOA including its role in regulatory concerns as they apply to
2	-	agriculture.
3	3.	Strengthening Illinois county fairs, the Illinois State Fair, and the DuQuoin State Fair as
4		agricultural expositions.
5	4.	Encouraging the State of Illinois to fully fund its portion of premium dollars at Illinois county
6	-	fairs.
7	5.	The establishment of a charitable foundation to solicit donations and sponsorships to grow
8	<u>^</u>	and improve the Illinois State Fair and the DuQuoin State Fair.
9	6.	Encouraging the IDOA and the State of Illinois to put a five-to-10-year plan in place to
10	7	move the Illinois State Fair up at least one week.
11 12	7.	Maintaining sufficient meat inspectors on staff so as to be readily available and not hinder
13		the ability of local meat lockers to harvest as needed.
14		
15		
16		106. INTERGOVERNMENTAL COOPERATION
17		
18	We su	pport:
19	1.	Expanded use of the Intergovernmental Cooperation Act by units of local government.
20	2.	The shared use of buildings, equipment, personnel and programs by units of local
21		government to reduce the cost to each unit.
22		
23	Count	y Farm Bureaus are encouraged to work with local government officials and other
24	interes	sted parties to increase the level of cooperation among existing local governmental units.
25		
26		Il work with all interested groups and organizations to identify methods which can be
27	implen	nented locally to encourage local government cooperation.
28		
29		
30		
31 32		107. JUDICIAL REFORM
32 33	Ma wi	Il support an amendment to the Illinois Constitution permitting downstate judicial districts to
34		e by referendum between election of judges or appointment of judges from candidates
35		mended by advisory commissions made up of laymen and lawyers.
36	recom	mended by advisory commissions made up or laymen and lawyers.
37	We wi	Il work with members of the legal profession and legislative bodies on a state and national
38		b substantially reform the judicial system by addressing issues such as tort reform, attorney
39		gency fees, incompetent or unqualified judges, and lengthy trials.
40		
41	We wi	Il support efforts to limit the tenure of judges at the local and state level.
42		
43	We wi	Il support efforts to provide adequate information to the public regarding the qualifications of
44	individ	uals seeking election or retention to judicial office.
45		
46		
47		
48		108. LAW AND ORDER
49	14/	
50		pport action to:
51 52	1. 2.	Bring about firm, fair, and prompt enforcement of existing laws. Increase enforcement of existing littering laws.
52 53	2. 3.	Provide aid to victims of crime.
53 54	3. 4.	Create greater awareness of and increased activity by our members in surfacing, selection
55	ч.	and election of qualified persons who will be capable of administering effective law
56		enforcement programs.
-		

1 2	5.	Require that the County Sheriff and State's Attorney be notified by the State Department of Corrections when an inmate from their county is released from a state correctional
3	•	institution.
4	6.	Reduce the fiscal impact imposed on local governments related to the increasing of
5		minimum federal jail standards. Such efforts should relate to providing state and local
6	_	government jurisdictions with flexibility to meet minimal care standards for such facilities.
7	7.	Allow law enforcement officials to seize vehicles used in the commission of a theft
8		involving agricultural commodities, supplies or equipment.
9		
10		I support:
11	1.	Effective enforcement of present laws and the enactment of new legislation where needed
12		to prevent the illegal production, importation, manufacture, or distribution of narcotics,
13	0	marijuana, other drugs, harmful substances, and related paraphernalia.
14	2.	Work programs for prisoners.
15	3.	Continued efforts to inform the victim of the impending release of an inmate.
16	We op	
17	1.	The "early release program" as a solution to prison overcrowding.
18	2.	The use, production and distribution of marijuana for recreational purposes.
19		Lacek legislation to provide for sovers and mendatory conteness for crimes committed with
20 21		I seek legislation to provide for severe and mandatory sentences for crimes committed with ns. The defense of one's person or property with a weapon needs to be more clearly
22		d legally.
22	uenned	a legaliy.
23 24	We wil	1.
24 25	1.	Work with county Farm Bureaus in developing coalitions to address the problems with
26	1.	methamphetamine production and use.
27	2.	Encourage vigorous education efforts to inform youth, parents, and others concerning the
28	۷.	harmful effects of substance abuse including the dangers of methamphetamine production
29		and use.
30	3.	Work with local, state, and federal officials in addressing the issue of methamphetamine
31	0.	production and use.
32	4.	Work with our urban legislators to help educate them on the severity of this problem in
33		rural areas and the cost to the taxpayer for treating methamphetamine addicts.
34	5.	Encourage the research and development necessary to produce an economical additive
35	-	for anhydrous ammonia to prevent its use for the production of methamphetamine or other
36		illegal purposes.
37	6.	Seek legislation imposing stiffer penalties for theft of anhydrous ammonia for
38		methamphetamine production.
39		
40	We en	courage counties to consider the establishment of Juvenile Justice Councils.
41		
42		
43		
44		109. LEGISLATIVE BODIES
45		
46	We su	
47	1.	Legislation prohibiting members of the General Assembly from receiving remuneration
48		from any taxing body for other than incidental services rendered on a part-time basis.
49	2.	Legislation to provide for a "sunset" of all new state or federal rules issued by
50		departments, agencies, executive order or commissions or explicit reauthorization of those
51		rules at "sunset" which spend tax resources.
52	3.	Limiting the Governor's amendatory veto power to only technical corrections and matters
53		of form.
54	4.	A restructuring of the Illinois legislative redistricting process that will be conducted by an
55		unbiased third party, will not be based on political affiliation and prior election results, and
56		

1		districts will be compact, contiguous, and impartial to party or incumbency. Districts
2		should follow county, township, and municipal boundaries as much as possible.
3	5.	An amendment to the Illinois Constitution that addresses limiting the passage of lame
4		duck legislation and requires a 3/5 vote on all legislation in the second year of a General
5		Assembly session after May 31.
6	6.	Creating term limits on both minority and majority leadership positions within the Illinois
7		House of Representatives and Senate.
8	7.	Creating term limits on all statewide offices and state legislators in Illinois.
9	••	
10		
11		
12		110. LOCAL GOVERNMENT
13		
14	Wesu	pport the principle of strong local government with the assignment of responsibility for
15		ment services to that unit of general government which best serves the people and can
16		mically provide the service.
17		pport maximizing efficiency and eliminating waste in all units of government.
18	WC 30	pport maximizing endency and enminating waste in an anits of government.
19	Wesu	pport legislation:
20	1.	Providing uniform requirements, including the printed full name of the voter, for signers of
21	1.	all public petitions.
22	2.	Permitting consolidation of additional county functions between counties.
23	3.	That ensures that any electronic registry of mortgage loan information shall not affect the
24	0.	current system of recording documents affecting title to real property with the county clerk
25		or recorder.
26	4.	Providing for salaries of all local officials to be set by the appropriate local unit, rather than
27	т.	by the state legislature.
28	5.	Requiring at least 15 percent of registered voters as signers on petitions within any
29	0.	territory proposed to become a new taxing district or within any area proposed to be
30		annexed to an existing taxing district.
31	6.	Requiring that a referendum to expand a taxing district be approved by a majority of voters
32	0.	in both the existing district and in the area proposed to be annexed. When a new taxing
33		district is to be created encompassing both incorporated and unincorporated areas, the
34		referendum should require approval by voters within the incorporated area and a separate
35		approval by voters in the unincorporated area.
36	7.	Extending the time limit from 30 days to 60 days to get the necessary percentage of
37	<i>'</i> .	registered voters' signatures on petitions concerning backdoor referendums.
38	8.	More clearly defining what issues are appropriate for non-binding advisory referenda for
39	0.	units of local government.
40	9.	Prohibiting individuals from serving concurrently as an elected mayor and an elected
41	5.	county board member.
42	10.	Allowing townships with annual revenue less than \$850,000, when required to have a CPA
43	10.	audit, to have the audit performed on a cash basis rather than an accrual basis.
44	11.	That provides for the absorption, consolidation, disconnection, and dissolution of units of
45		local government by front door referendum. Only that unit's governing board or registered
46		voters residing within the unit of government should be allowed to initiate the front door
47		referendum.
48	12.	Waiving the residency requirement for the office of Highway Commissioner in a road
49	12.	district with a population of less than 500, if and only if, no qualified candidate willing to
50		serve the office exists within the township. All other requirements for the office shall
50		remain.
52	13.	Requiring special purpose units of local government, excluding drainage districts, that go
53	10.	dormant (no projects or expenditures) for more than two years to go before the voters
53 54		within the district to determine if the unit should continue in existence.
55	14.	To codify case law dealing with prohibited activities to include serving on a unit of local
56	· · ·	government board and be an employee of that unit of government.
00		government board and be an employee of that drift of government.

1	We w	ill seek legislation to provide for:
2	1.	Selection of special district board members by election.
3	2.	Uniform fiscal years, classification of accounts, budgets and audits for all taxing bodies.
4	3.	Additional authority for forest preserve districts to sell real estate, including farmland.
5	4.	A referendum of registered voters in the township or townships to approve the site where
6		municipalities propose to annex property for the location of any type of waste disposal
7		facility, prison or other entity which could directly affect the lives of people residing in the
8		area.
9	5.	The requirement that any municipality or any other unit of local government considering
10		annexation of farmland notify affected landowners by registered or certified mail at least
11		30 days prior to the filing of such annexation.
12	6.	The capability of counties, townships, and special districts to levy impact fees to support
13	0.	local services during the time between construction of a project and when tax revenues
14		would normally be received and to levy impact fees to support local infrastructure
15		improvements in areas of new development.
16	7.	The elimination of the liability of bonded indebtedness to areas that are annexed and then
17	1.	vote by referendum to disconnect from a taxing district which had previously incurred debt
18		before the annexation. The annexed and then disconnected territory would only be liable
19		for indebtedness occurring while they are a part of the district.
20		or indebiedness occurring while they are a part of the district.
20 21	Wo a	upport:
22	1.	The shifting of additional responsibilities from the federal government to state
23	1.	governments if, at the same time, adequate access is made to the tax structure to allow
23 24		for the financing of such programs by the states and a commensurate reduction is made in
24 25		federal taxes. We will support state and local governments in the development of their
		capabilities to discharge these added responsibilities.
26	2.	The shifting of responsibilities from the state government to local governments only if the
27	Ζ.	
28		state government reduces its taxes proportionately or provides local governments the
29	2	resources to carry out such responsibilities.
30	3.	Improvements in state agency programs which provide needed training and education for
31		local government officials. Such programs should include management and financial
32	4	training related to local government.
33	4.	Efforts by local government officials, county Farm Bureaus and other organizations to
34	-	increase public participation in the overall functions of local government.
35	5.	Efforts to ensure that citizens who do not currently live in a library district but wish to
36		receive library services can receive equal and affordable access to the public library
37	-	system.
38	6.	Encouraging local governments to make compensation breakdowns and pension
39	_	sweeteners more readily available to public scrutiny.
40	7.	Amending the Cemetery Oversight Act, so that the provisions of the law are not overly
41		burdensome for cemeteries.
42	8.	Elected and appointed government officials being held to ethical standards including
43		prohibiting nepotism.
44		
45		ill strongly oppose all efforts to mandate inclusion of areas not currently served by a library
46	distric	t into existing library districts.
47		
48		
49		
50		111. MANDATED PROGRAMS
51		
52		ill oppose state and federal legislation mandating local programs, unless full funding for
53	such p	programs is provided on a continuing basis. We will support an amendment to the Illinois
54		itution prohibiting the state from mandating programs on local governments and school
55		ts without providing full state funding.
56		

1 2	112. PRIVATE LANDS COOPERATIVE INITIATIVE			
3 4	We support development of state laws and policies promoting voluntary and incentive-based private land initiatives to:			
5 6 7	 Encourage economic stability in communities through long-term private land ownership. Enhance on-farm income through recreation-based resource development. Increase community revenue through expanded economic activity. 			
8 9	 Improve public recreational opportunities on private land. Provide liability protection to landowners. 			
10 11 12	 Increase economic activity in depressed rural communities. Promote cooperation between government bodies and private landowners. 			
13 14				
15 16	113. PROBATE AND FAMILY LAWS			
17 18 19 20	 We will support: 1. Major reform of probate laws and procedures which will increase the promptness, reduce the cost, and simplify the procedures for settling estates. 2. Revisions to family law that fairly recognize capital cost for purposes of determining net 			
21 22 23	farm income and include allowances for deduction of either depreciation or debt service.			
24 25 26	114. PUBLIC BUILDING ACTS			
27 28 29 30	We will support legislation further limiting the use of the Illinois Building Authority Act and the Illinois Public Building Commission Act.			
31 32 33	115. PUBLIC EMPLOYEE COLLECTIVE BARGAINING			
34 35 36	We will work to inform our leaders and members of the basic provisions of the current public employee collective bargaining laws in Illinois.			
37 38 39 40	We urge our leaders and members to use various innovative consensus and nonadversarial approaches to resolve public employee disputes to minimize the potential of work stoppages by public employees.			
41 42 43	We will cooperate with major public employee and employer groups in the State in pursuit of reasonable solutions to disputes in the public sector.			
44 45	We will support binding arbitration only when agreed to by both negotiating parties.			
46 47 48	 We will continue to oppose all laws which provide for: 1. Mandatory membership in any bargaining group, or mandatory financial support of such group by non-members. 			
49 50	 Strikes by public employees which might jeopardize public health, safety, welfare and education. 			
51 52 53	 Inclusion of administrative, supervisory or management personnel in a collective bargaining unit. 			
54 55 56				

	116. SPECIAL SERVICE AREAS		
We will seek legislation to amend the Special Service Area Law to permit, by petition of at least 10 percent of the voters in the proposed area, the calling of a binding referendum to determine if a special service area shall be established, if taxes are to be extended, or if certain areas are to be included in the service area.			
We w 1.	ill support legislation: To ensure that special service areas be restricted to providing those services that are not ordinarily provided by county government.		
2. 3.	Which provides procedures for the dissolution of special service areas. Which provides that only counties may establish and govern any special service area which includes territory not incorporated within a municipality.		
	117. TORT REFORM AND INSURANCE LIABILITY		
	upport:		
1.	Coordination of efforts between state and county Farm Bureaus, medical associations, insurance organizations, and other organizations for solving the increasing problems of cost and availability of liability insurance.		
2.	Efforts to reduce the costs of product liability insurance and other important classes of liability insurance. Reduction of these costs will benefit the ultimate consumers.		
3.	Legislation to help protect landowners and tenants from liability claims made by trespassers, licensees, or invitees coming upon the landowners' property and legislation to ensure landowners and tenants owe no duty of care to trespassers, regardless of age.		
	Legislation that will protect the private landowner from liability claims arising from conditions or risks created by storms or other natural disasters.		
5. 6.	Limitations upon an attorney's contingency fee. Modification of the law on joint and several liability and comparative negligence to prevent		
7	inequitable division of compensation from defendants. Removal of the authority of local units of government to use profits generated from tax-		
	created liability protection funds for other purposes.		
8.	Development of informational programs to educate our membership and the public regarding issues relating to tort reform and the insurance liability crisis.		
9.	Laws or regulations absolving farmers from liability claims of environmental pollution:		
	A. When complying with federal or state approved label instructions.B. When building, managing, or operating livestock facilities according to federal or		
	state guidelines such as the Livestock Management Facilities Act (LMFA) and the		
10	Concentrated Animal Feeding Operation (CAFO) rules. Legislation at the state and federal level to place reasonable limitations on attorney's fees		
10.	generated by class action lawsuits.		
11.	Efforts to limit punitive damages in odor lawsuits.		
12.	An amendment to the Recreational Use of Land and Water Areas Act in order to limit the		
	liability of landowners who voluntarily open their land for educational and recreational		
	activities at no charge while maintaining the landowner's ability to determine who to allow		
12	on their property.		
13.	Legislation that would encourage liability litigation to be filed and commenced in the jurisdiction where the medical service was provided.		
14.	The expansion of the restitution language that will allow the recovery of both out-of-pocket		
15	expenses and lost wages. Requiring the cost of defense to be paid by the complaining or suing parties and their		
15.	representatives in the event the defendant prevails.		
	10 pe a spe be inc We w 1. 2. 3. 4. 5. 6. 7. 8. 9. 10. 11. 12. 13.		

1 16. Legislation to minimize the liability of farm equipment drivers and/or owners when Illinois 2 Department of Transportation design standards force their equipment to travel across the 3 center line. 4 5 We will support at the state and federal level and will urge the American Farm Bureau Federation 6 to support a "Voluntarism Protection Act" to grant immunity from personal civil liability under 7 certain circumstances to volunteers, officers and directors working in behalf of non-profit and 8 charitable organizations and government. 9 10 We will seek legislation to require the payment by the plaintiff or plaintiffs of costs and reasonable attorney fees incurred by a prevailing defendant in any nuisance action in which a proposed farm 11 (as defined in the Farm Nuisance Suit Act) or expansion of an existing farm which is alleged to be 12 13 a nuisance. 14 15 16 17 118. TRESPASS, VANDALISM, AND PRIVATE LAND ACCESS 18 19 We support: 20 1. Encouraging courts to punish vandals by requiring them to clean up and repair their own 21 vandalism at their own expense or perform some other constructive work. We urge 22 judges, when setting sentences, to require reimbursement of Crime Stoppers or similar 23 reward programs, as a part of the sentence. 24 2. Legislation to protect landowners and tenants from property seizures, claims, and costs 25 caused by unauthorized activities of trespassers and licensees entering upon and using 26 the landowners' property. 27 3. Efforts, including legislation and working with law enforcement agencies and prosecutors, 28 to increase the enforcement of criminal trespass laws. 29 4. Legislation specifying that, in criminal damage to property cases where the damage was caused by the unauthorized operation of a vehicle on private property, the threshold of 30 31 felony status be elevated from its current \$300 to a level better suited to the crime and one 32 that would help to remove the law enforcement community's hesitancy to prosecute those 33 violators. In such cases, a minimum fine should be established with required restitution to 34 the victim for property damages caused and the violator's license should be suspended for 35 six months. 36 5. Legislation linking criminal violations of the Illinois Vehicle Code and acts of criminal 37 trespass or criminal damage to property to the driver's license record of anyone convicted of these crimes for the unauthorized operation of a motor vehicle on private property. 38 39 6. Legislation creating an owner responsibility provision in law that obligates the owner of a 40 vehicle to compensate for damages caused to private property by the use of the vehicle on that property without the landowner's authorization unless the vehicle was stolen or the 41 42 vehicle's owner took reasonable precautions against misuse of the vehicle. 43 7. Efforts to educate law enforcement officials and the general public - especially youth about the property damage caused by the unauthorized operation of vehicles on private 44 45 property and the liability and penalties for any resulting property damage. 46 8. The development and dissemination of programs and materials on private property rights 47 and the associated portions of trespass and criminal law. We encourage county Farm 48 Bureaus to pursue similar efforts on the local level. 49 9. Efforts to educate farmland owners and farmland operators about their legal rights and 50 responsibilities relating to trespass; also, efforts to educate them about insurance 51 coverage relating to liability and property damage caused through trespass. We 52 encourage county Farm Bureaus to pursue similar efforts on the local level. 53 Efforts to establish riding areas for ATVs and other off-highway vehicles and efforts to 10. 54 generate revenues for that purpose from those who use the vehicles for recreation. 55 Efforts to make it clear that persons going to or from rivers, streams, and bike trails over 11. another's land or hunting on another's land without the owner's or rightful occupant's 56

1		specific permission, without regard to the presence of any posted notices, are trespassers			
2		for the purposes of determining liability of a landowner for any injury which might occur to			
3		the trespasser.			
4	12.	Legislation that will require owners of recreational trails and their facilities to compensate			
5		owners of land adjacent to the trail or facility for any property damage, theft, littering,			
6		and/or vandalism caused by users of the trail or facility except where the actual			
7		perpetrator can be identified and make restitution.			
8	13.	Efforts to educate farm owners and operators about their legal rights as they pertain to			
9		utilities and governmental or private surveying companies. We would encourage all			
10		surveyors to notify affected landowners and use public property whenever possible.			
11	14.	Efforts to educate farm owners and farmers about their legal rights as landlords or			
12		managers of residential properties.			
13	15.	Landowners being an additional named insured for all government and public utility project			
14		work that is being done on private property.			
15	16.	Efforts to enforce regulations on hot air balloons regarding their potential trespass on			
16		private property and their potential for endangering livestock.			
17	17.	A program to reward informants who provide information leading to the arrest and			
18		conviction of persons who commit theft, arson, or vandalism to the property or premises of			
19		Illinois Agricultural Association (IAA) members.			
20					
21					
22					
23		119. FEDERAL ESTATE TAXES			
24					
25	We w	ill support:			
26	1.	The repeal of federal estate taxes while still retaining a stepped up basis at the time of			
27		inheritance.			
28	2.	The exemption from federal estate taxes for heirs who are actively farming a farm property			
29		which is restricted by a voluntary conservation easement.			
30	3.	Elimination of the \$850,000 ceiling and limitation on the percentage of the total value of			
31		the estate allowed in determining the existing exemption under Internal Revenue Code			
32		2032-A for agricultural productive value.			
33	4.	Increasing the maximum gift tax exclusion per recipient to \$50,000 per year.			
34					
35	We oppose any reduction in the current federal estate tax exemption. Until repeal becomes				
36	politically feasible, we support an increase in the exemption to \$10 million to ease the movement				
37	of farms and small businesses from one generation to the next. The exemption should be				
38	indexed for inflation.				
39					
40					
41					
42		120. PROPERTY TAX ADMINISTRATION			
43					
44	We w	ill seek legislation allowing by local referendum the dissolution of consolidated township			
45		sing districts.			
46					
47	We w	ill support legislation to improve the administration of local assessments including:			
48	1.	Provisions to specifically define property as real estate or personal property on an			
49		equitable basis statewide. We will continue to work with the State Department of Revenue			
50		(DOR) and local assessing officials on specific problems in this regard.			
51	2.	A change in the method of valuing mobile or manufactured homes for assessment and			
52		collection of taxes from the Mobile Home Local Services Tax Act (privilege tax) to an Ad			
53		Valorem Tax (measured by value).			
54	3.	Reduction of costs for property assessment publications by allowing counties to utilize			
55		online publication in lieu of printed publication. This type of publication would be in			
56		addition to the required individual property assessment mailings to property owners.			

1 2 3 4	4.	Allowing counties to eliminate the office of Township Assessor by a county-wide referendum in which a majority of voters in the county and a majority of voters in the majority of townships approve.					
5 6		We will seek uniform and equitable implementation of the Farmland Assessment Law, in cooperation with county Farm Bureaus.					
7							
8	Wev						
9	1.	Work with county Farm Bureaus to inform members of the limits of their responsibilities in					
10	~	providing information to assessing officials.					
11 12	2.	Continue to cooperate with the DOR and the Association of Assessing Officials in developing educational materials for use by taxpayer groups.					
13	3.	Strongly urge the members of the Illinois General Assembly not to change the present					
14	0.	formula for calculating the assessed value of farmland.					
15	4.	Support the appointment of Supervisors of Assessment versus elected Supervisors of					
16		Assessment.					
17	5.	Encourage county Farm Bureaus, in cooperation with local officials, to periodically hold					
18		information/education meetings for taxpayers.					
19	6.	Work with the DOR and the Association of Assessing Officials to achieve uniformity in					
20	7	depreciation (for assessment purposes) of all depreciable agricultural facilities.					
21 22	7.	Work with the Illinois DOR and the Association of Assessing Officials to encourage the assessment of all qualifying agricultural property, regardless of size, under the farmland					
22		assessment for all qualitying agricultural property, regardless of size, under the farmland assessment law.					
23 24	8.	Work with appropriate state agencies and other state officials to develop Conservation					
25	0.	Management Plan rules that permit landowners to apply for a plan without submitting					
26		overly burdensome and prohibitive proposals.					
27							
28		oppose legislation removing either the State DOR or the local Board of Review from the					
29		inistrative process of approving or denying property tax exemptions. The DOR should					
30 31	conu	nue to have final authority.					
32							
33							
34		121. SALES TAX					
35							
36	Wev	vill seek legislation to:					
37	1.	Remove the Retailer's Occupation Tax (ROT) and the Use Tax from sales of LP gas used					
38	_	primarily in production agriculture.					
39	2.	Remove the ROT and the Use Tax from sales of feeds, including hay when sold by					
40		farmers to feed livestock including horses and poultry for marketing, or for producing dairy					
41 42	3.	products or eggs or other consumer by-products. Eliminate the practice of charging state sales tax on motor fuel.					
42 43	5.						
44	Wes	support agricultural exemptions in Illinois state sales tax codes.					
45							
46							
47							
48		122. STATE AND LOCAL FINANCE					
49							
50		overall tax structure for state and local governments in Illinois should include a state income					
51		a moderate local real property tax, sales tax, motor fuel tax, cigarette tax, liquor tax and other					
52 53	spec	ial taxes.					
53 54	\ \ ∕⊳ \	will analyze any proposed increase in the state sales tax rate as to the effect such an					
54 55		ase would have on the economy and competitiveness of the State of Illinois in relation to the					
56							

1	sales tax rates imposed by neighboring states and take the appropriate action on such proposed \cdot						
2	increase.						
3							
4 5	vve w 1.	51 1 5 5					
6	0	state-wide taxes.					
7 8	2.	Including townships and road districts along with counties and municipalities in the formula for the distribution of the Local Government Distributive Fund.					
9	3.	Extending to two years the time landowners have to disconnect their property from any					
10	0.	special purpose taxing district formed or expanded without a referendum and which does					
11		not provide emergency life-sustaining services. During that period, all property tax					
12		revenues collected by the district from landowners within the new taxing area should be					
13		held in escrow and refunded or credited to those taxpayers if they choose, by referendum,					
14 15	4.	to disconnect. Extending the time limit from 30 days to 60 days to get 10 percent of registered voters'					
16	4.	signatures on petitions concerning backdoor referendums.					
17	5.	Providing for restricted and specific criteria in order to qualify areas for creation of Tax					
18		Increment Financing (TIF) districts by municipalities and counties in order to reduce					
19		negative fiscal impacts on existing businesses and local governments, including schools.					
20		Further, we believe the economic advantages of the new business or production alone					
21 22	e	should be enough to justify expansion or location in an area.					
22 23	6.	Limiting the tort immunity levies to the actual costs incurred by the local taxing bodies. We support vigorous enforcement of current laws and regulations specifying use of these					
23		funds.					
25	7.	Allowing local citizens to establish a maximum tax rate lower than the statutory maximum					
26		rate when creating a new taxing district by referendum.					
27	8.	That requires a referendum ballot question which proposes the creation of a new taxing					
28		body also state the statutory maximum tax rate and debt level for the proposed new taxing					
29 30	9.	district. Allowing a Fire Protection District to retain the real estate taxes for a period of 10 years,					
31	э.	whenever a territory is disconnected from a Fire Protection District and annexed to a					
32		municipality.					
33	10.	Providing that taxing districts shall give public notice of, and hold a public hearing on, their					
34		intent to annex property.					
35	11.	Limiting taxing districts, including school districts, from incurring future bonded					
36 37		indebtedness, without a referendum, where such bonds are to be repaid with property tax					
38	12.	revenue. To require referendums which authorize any new real estate tax levy to state the					
39	12.	maximum statutory tax rate in the referendum question.					
40	13.	To allow all taxing bodies to reduce their levy after the levy has been submitted to the					
41		county clerk.					
42	14.	To allow impact fees to be imposed on new residential construction for school capital					
43	45	needs.					
44 45	15.	To allow townships that are currently under the Illinois Municipal Retirement Fund (IMRF) program to opt out.					
46	16.	To exempt undeveloped farmland in unincorporated areas from municipal local					
47		improvement taxes and fees.					
48	17.	Requiring that any tax credits be based on fiscal policy that promotes long-term economic					
49		stability and prosperity.					
50	18.	To amend the Open Space Lands Acquisition and Development Act to allow some of the					
51 52		revenues funding the act to be used to provide maintenance and improvement to existing state parks.					
52 53	19.	Amending the Illinois County School Facility Tax Act to require school districts to issue a					
54	.0.	public statement of intent a minimum of 30 days prior to the election.					
55							
56							

1 2	20.	Amending the Illinois County School Facility Tax Act to ensure that counties benefiting from the School Facility Tax Act would not be prevented from, or placed at a disadvantage
2		for, receiving school construction dollars from the state.
4	21.	Amending the Illinois County School Facility Tax Act to require that a portion of the money
5	21.	collected is used in property tax relief if the school district(s) has outstanding bonds for
6		capital purposes.
7	22.	Amending the Illinois County School Facility Tax Act to require a sunset clause of 20 years
8		or re-approval by voters to continue the tax.
9	23.	Requiring local governments to publicly disclose information on tax increment financing
10		districts including the locations of the districts, funds generated, use of funds, and any
11		contractors.
12	24.	That calls for a more stringent audit of all state expenditures.
13	25.	Eliminating the Illinois estate tax, but until that is accomplished, support using the
14		corresponding federal exclusion amount, but not less than \$5 million and having a tax rate
15		structure no greater than the maximum 16 percent currently in law.
16	26.	To impose a tax on the owner or lessee of non-renewable natural resources, excluding oil
17		and gas, upon the severance and production of that resource. A significant portion of the
18	07	tax revenue shall be distributed to the county of origin.
19	27.	Maintaining and creating property assessment levels that encourage the creation and use
20 21		of grassed-backed terraces, grassed waterways, filter strips, two stage ditches, bioreactors, and other approaches to improve water quality through these practices.
22		bioreactors, and other approaches to improve water quality through these practices.
23		rill seek legislation:
24	1.	Prohibiting extension of real estate taxes on farmland by special taxing districts which
25		provide non-essential services such as library districts, park districts, and forest preserve
26		districts.
27	2.	To change the back door referendum to a front door referendum in the library code that
28		relates to annexation of contiguous territory.
29		5 ,
30	We w	ill work to form a coalition of statewide associations and other interested and like-minded
31	partie	s to work for tax reform to reduce the reliance on real estate taxes.
32		
33		ill oppose legislation:
34	1.	Imposing additional taxes or increases in tax rates upon property unless approved by a
35		referendum of local voters at a primary or general election. We oppose the use of a
36	•	backdoor referendum.
37	2.	Imposing a state property tax.
38	3.	Increasing exemptions from real estate taxation.
39	4.	That allows the use of (TIF) or enterprise zones for production agriculture.
40 41	5.	Authorizing non-refundable fund transfers beyond those allowed in the standard budgeting process or via voter approval.
41	6.	Creating a gross receipts tax or value-added tax by the State of Illinois.
43	7.	Selling or leasing the Illinois State Lottery.
44	8.	Authorizing the transfer of funds from dedicated and special state funds for any reason
45	0.	beyond their original intended purpose.
46	9.	Enacting a quarter-cent sales tax on purchases throughout the Chicago metropolitan area,
47		as defined by the counties in the Regional Transportation Authority Service area (Cook,
48		DuPage, Kane, Lake, McHenry, and Will Counties).
49		
50	We o	ppose:
51	1.	A severance tax on current, low production oil and gas wells. We believe that if there is a
52		severance tax on new, high capacity oil and gas wells it should be at a level that will not
53	_	impede the development or operation of those wells.
54	2.	A constitutional amendment to remove or permit removal of the present 8 to 5 state
55		income tax ratio between corporations and individuals.
56		

1 2	We urge county Farm Bureaus to implement comprehensive local programs to determine and to critically evaluate how and from what sources local government revenues are being raised and			
3	how these funds are being spent. We will assist county Farm Bureaus in such programs.			
4 5	We encourage the Illinois General Assembly to undergo a more comprehensive and diligent			
6 7	method of prioritizing appropriations to meet the current needs of its citizens.			
8	We support speeding up tax appeal decisions that affect local government budgets.			
9 10	We believe the state of Illinois should meet its responsibilities in regards to funding those			
11	organizations and programs for which funds have been appropriated in the state budget.			
12				
13 14				
14	123. STATE INCOME TAX			
16				
17	We prefer a flat rate state income tax, and support deductions and credits benefiting agriculture			
18	and agricultural processes, and an exemption at some realistic level. We support the State of			
19 20	Illinois following Federal Depreciation rules regarding bonus depreciation.			
20				
22				
23	124. TAX REFORM			
24				
25	Higher federal marginal income tax rates are inconsistent with economic growth and lower			
26 27	interest rates. We support continued retention of the indexing of income taxes.			
28	We will seek:			
29	1. A reasonable Investment Tax Credit program and provision for the use of all carryover			
30	investment tax credits.			
31	2. Immediate provisions to allow individuals who purchase their own health insurance an			
32	exemption or deduction for health insurance costs.			
33 34	 Further reductions in capital gains tax and/or indexing capital gains tax for inflation. Establishment of a "Farmer Savings Plan" (FSP) that allows for an allocation of income 			
35	into a tax exempt FSP for emergencies. Plan contributions should include earnings and			
36	gains from a farm operation's proceeds and capital items. Contributions should be tax			
37	deductible at the time of contribution and be taxed at the time of distribution.			
38	5. An exemption allowing the cash rental of farmland to a family partnership or corporation			
39 40	without the 15.3 percent self-employment tax on the rents.A modification of federal tax code 1031 like-kind exchanges that:			
40 41	A modification of rederar tax code ros rinke-kind exchanges that. A. Relaxes the requirements on the reinvestment of the proceeds from agricultural			
42	land sales.			
43	B. Changes from 45 days to six months the time allowed to identify a non-taxable			
44	exchange, and from six months to one year the time allowed to close and receive			
45	property.			
46 47	7. Tax incentives for persons who sell or lease property, including but not limited to land, machinery, and other farm assets to beginning farmers.			
48	 Legislation which eliminates self-employment tax on Conservation Reserve Program 			
49	(CRP) payments.			
50				
51	We will support the repeal of the amendments made to the 1099 IRS reporting in the Patient			
52	Protection and Affordable Care Act. Farmland taken through eminent domain, or as a result of			
53 54	the threat of eminent domain, which has been owned by the current owner or his immediate family for 10 or more consecutive years should be exempt from capital gains taxes on that			
54 55	property.			
56	h. ab a. A.			

1 2 3	We oppose any tax and/or government-imposed user fee on commodity futures or options transactions.			
4 5 6			the investigation and complete study of a federal flat rate income tax proposal to sible long-term effects on production agriculture.	
7 8 9			the extension of the Federal Bonus Depreciation component of the Job Creation and stance Act of 2002.	
10 11 12			the unrestricted use of cash accounting regardless of the level of gross receipts of arm or the cumulative gross receipts of all businesses related to the primary farm.	
13 14			125. TRANSPORTATION	
15 16			125. TRANSPORTATION	
17 18 19 20 21 22	as a h recogr public,	olistic s nizes th /private	development of a long-range national transportation policy that views transportation system serving the needs of both passengers and freight across all modes and ne importance of connectivity between modes. It should encourage exploration of e partnerships and be designed to support global competitiveness while developing phomical and energy efficient methods of meeting future transportation needs.	
23			Land Use	
24		II supp		
25 26 27 28	1.	Regu A. B.	lations which: Provide improved noxious weed and brush control by state and local road authorities on the full width of highway rights-of-way. Maintain safe levels of visibility.	
29 30 31		С. D.	Protect farmers' crops from unwarranted or careless spraying. Ensure that ditch and roadside vegetation maintenance practices do not impair drainage to or from adjoining farm fields.	
32 33	_	E.	Preserve vegetative cover adequate to prevent soil erosion on roadsides and in ditches.	
34 35 36	2.	of-wa	cement of noxious weed and brush control by railroad authorities on railroad rights- y, including the use of a soil conserving cover crop whether the railroad is in tion or abandoned.	
37 38	3.	noxio	g counties the power to levy a fine of \$500 per acre of railroad rights-of-way where us weeds are not eradicated or controlled.	
39 40 41 42	4. 5.	Overs gover	cement of drainage laws and regulations on railroad rights-of-way. sight of railroad construction projects and design standards by appropriate mment agencies to minimize disturbance to adjoining farmland and farming itions and to adequately protect or repair drainage and drainage systems.	
43 44	6.		s to ensure that highway construction and improvement projects do not cause us, adverse impact to drainage nor cause erosion on adjacent land.	
45	7.	Utiliza	ation of marginal farmland or poorer grades of land for new railroad or highway	
46 47 48	8.	Utiliza	ruction projects where feasible in order to preserve tillable farmland. ation of existing rights-of-way for new highways to the maximum extent feasible in to minimize acquisition of new lands for highway purposes.	
49 50 51	9.	More	equitable compensation to landowners for disruption of farming operations by ay construction.	
52			Other	
53 54 55	discor	nectio	efficient mass transportation. We will support legislation or regulations to allow n of counties by referendum from mass transportation authorities.	
FC	14/		no the use of highland, and othernal by many transit systems	

56 We encourage the use of biodiesel and ethanol by mass transit systems.

1		upport offerte to etreamline the transportation project delivery process to reduce		
1 2	We support efforts to streamline the transportation project delivery process to reduce unnecessary time delays including:			
2 3				
	1.	Simplifying the environmental process for projects with few impacts.		
4	2.	Involving appropriate reviewing agencies early in the process to help expedite overall		
5	0	project schedules.		
6	3.	Requiring greater coordination among federal reviewing agencies and setting time limits		
7		for their review.		
8				
9		upport efforts to educate policy makers and the public to ensure they understand:		
10	1.	The value and necessity of efficient and effective transportation infrastructure.		
11	2.	The complexity and cost of both long-term maintenance and expansion of transportation		
12	-	infrastructure to meet future needs.		
13	3.	The importance of interconnectivity between modes.		
14	4.	Requiring reconstruction projects be completed as quickly and reasonably as possible		
15		minimizing impacts on the traveling public.		
16				
17				
18				
19		126. TRANSPORTATION HIGHWAYS		
20				
21		Finance		
22		ill support:		
23	1.	Legislation which provides that user fees such as motor fuel taxes, licensing and		
24		registration fees are the basic means for funding highway transportation systems in Illinois		
25	0	at both state and local levels.		
26	2.	The increase of State of Illinois motor fuel tax by up to 10 cents per gallon. The current		
27		distribution formula should be left intact.		
28	3.	As an alternative to increasing the flat motor fuel tax, the creation of a new tax as a		
29		percentage of the wholesale price of fuel. This new tax would be distributed under the		
30		current motor fuel tax distribution formula.		
31	4.	Legislation collecting road user fees from hybrid, alternative fuel and electric highway		
32	-	vehicles.		
33	5.	Legislation to increase the share of state-collected highway user fees allocated to units of		
34	0	local government for road and bridge construction and maintenance needs.		
35	6.	Legislation increasing the state's township bridge program fund to at least \$30 million		
36	-	annually.		
37	7.	Legislation providing for a more equitable formula for allocating motor fuel tax funds to		
38	0	counties based on both vehicle registration and road mileage.		
39	8.	Use of all highway user fees including that part of motor fuel tax funds derived from		
40	0	highway use solely for construction and maintenance of roads, streets, and bridges.		
41	9.	Legislation permitting establishment of transportation impact districts by road districts and		
42	40	counties.		
43	10.	Repeal of current Illinois Department of Transportation (IDOT) requirements stipulating		
44		that contractors must have federally approved apprenticeship and training programs to be		
45		considered a responsible bidder for road projects.		
46	11.	Legislation to prevent the Illinois State Toll Highway Authority from constructing any new		
47		toll highways or extending any existing toll highways unless state law is changed to allow		
48		for strict accountability to the Illinois General Assembly.		
49 50	14/	ill an all la siglations that had do all in the Otata Tall I Balance Authority and the state of the state of the		
50		ill seek legislation that holds the Illinois State Toll Highway Authority accountable and		
51		nsible for the repair and maintenance of all overpass decks that are the result of tollway		
52	const	ruction.		
53	14/- 1			
54	vve b	elieve Illinois highways currently funded by tolls should remain as toll roads.		
55 56				
56				

1	We wil	l oppose:
2	1.	Legislation which would abolish motor fuel tax refunds for non-highway use.
3	2.	Mandatory bike paths on rural roads without adequate state funding.
4	3.	The sale or lease of any Illinois highway system.
5	4.	Formation of any new toll highway authority in Illinois unless existing state law is changed
6	-	to allow for strict accountability to the Illinois General Assembly.
7	5.	Selling or leasing of Illinois' toll highways.
8		
9		Infrastructure
		l support:
11	1.	Proper administrative authorities in the development of standards for the construction of
12		local roads and bridges that correspond with the physical needs of the highway system
13		and the economic ability of local authorities to pay for them.
14	2.	The use of weight limit postings and associated permits only for the purpose of protecting
15		the physical integrity of the road.
16	3.	Legislation requiring weight limit postings intended to protect roadway surfaces during the
17		spring thaw timeframe be based on a per-axle limit rather than on a gross vehicle weight
18		limit.
19	4.	Legislation granting vehicles hauling agricultural commodities from the field to the first
20		point of delivery, an additional axle weight tolerance. That tolerance should match what is
21		allowed by the state statute pertaining to the harvest season permit, but without the need
22		for a written permit.
23	5.	Greater emphasis on roadway improvements and maintenance of existing state highways
24		while incorporating new construction technologies, with reduced emphasis on new
25		expressways and interstates.
26	6.	An approach to funding the replacement and/or maintenance of roads and bridges by the
27		IDOT through improved consultation with the local highway officials and the public as to
28		the necessity of each project considered.
29	7.	Requiring improvements to major highways be designed to a higher standard providing for
30		significantly longer life before repairs are needed.
31	8.	The revision of IDOT design standards on state highways to consider the size of modern
32		
33		farm equipment.
		farm equipment.
34

1	Other
2	We will support:
3	1. Legislation permitting temporary signs within a reasonable distance of federal and state
4	highways, other than interstates, directing traffic to seasonal farm produce outlets.
5	2. Legislation establishing an adopt-a-highway program for rural sections of all roads in the
6	state.
7	
8	We encourage:
9	1. Road maintenance officials to offer landowners/land managers/operators the chance to
10	accept or refuse soil removed from adjacent road ditches.
11	2. State and local highway officials to provide farm and field entrances that accommodate the
12	needs of modern agriculture. This includes encouraging state, county, and township
13	highway departments to use a plastic, bendable marker post instead of metal posts where
14	object markers are used.
15	
16	
17	
18	127. TRANSPORTATION RAILWAYS
19	Financa
20 21	We support:
22	1. Strengthening of existing state laws so the Illinois Commerce Commission (ICC) can deal
23	effectively with unfair rent increases imposed by railroads upon their tenants, and
24	unrealistic sale prices for land offered by the railroads to tenants or other prospective
25	buyers of railroad property.
26	 Legislation requiring full disclosure of the railroad grain transportation bidding process to
27	the individuals who participate in the process after all bids have been made and rail cars
28	have been allocated.
29	
30	We oppose diversion of railroad earnings to holding companies or non-railroad businesses at the
31	expense of maintaining a viable railroad.
32	
33	Infrastructure
34	We support efforts to have more at-grade highway/railroad crossings signalized with warning
35	lights and gates. Where closure of the crossing would impose undue hardships on users of the
36	road, greater flexibility should be shown by the ICC on safety considerations. Efforts should be
37	made to ensure that the ICC considers accident history and emergency access along with other
38	locally important issues in decisions on petitions to close railroad crossings.
39	
40	We support protocols that maintain public safety by requiring railroads to give a minimum of two
41	weeks advance notice of construction intentions to local residents and local government bodies
42	prior to taking formal action on permit applications and prior to temporary railroad crossing
43	closures.
44	M/s success negative bins an entropy of well successes and the answering of wells and
45	We oppose parallel branch line mergers of rail systems and the granting of railroad
46	abandonments which tend to lessen overall transportation competition or where there is or could
47 40	be proven traffic potential.
48	Land Use
49 50	We support legislation and regulations to provide that in the case of a railroad abandonment, the
50 51	current owner of the tract of land from which the railroad right-of-way was obtained be given the
52	right of first refusal for such land, including mineral rights, based upon the fair market value for
53	comparable property rights in the area. If the current owner fails to exercise such option, the
54	adjacent landowners will be offered the next right of refusal.
55	
56	

1		Access
2		upport:
3 4	1.	Expedient placement of "exempt" postings at public road crossings on railroads which are abandoned.
5 6	2.	A requirement that a notice of proposed crossing closure be posted at crossings 30 days in advance of a hearing to consider closure of the crossing.
7	3.	The prompt communication, assessment of damages, cleanup and processing of claims
8 9		incurred by both private landowners and units of local government following a train derailment.
10	4.	Oversight by the ICC of median barriers and crossing safety devices placed in the
11		approach to grade crossings which prohibit and/or hinder the flow of agricultural
12		equipment through grade crossings.
13	5.	Legislation that will allow the Surface Transportation Board, on petition of a state, to
14		declare all or part of a state to be an area of inadequate rail competition, with special rail
15		customer remedies that would apply in such areas.
16		01
17		Other
18 10		upport: Civing outbority to the state to force a railroad to temporarily appear operations on a given
19 20	1.	Giving authority to the state to force a railroad to temporarily cease operations on a given stretch of track due to emergency conditions.
20 21	2.	Maintaining state oversight of railroads under the purview of the ICC.
22	۷.	Maintaining state oversight of failloads drider the purview of the ICC.
23	We w	<i>i</i> ll•
24	1.	Work with the railroad industry and the ICC to establish regulations that require parked
25		trains to maintain a 500-foot distance from ungated and/or unsignaled at-grade crossings
26		in unincorporated areas to provide safe visibility for motorists. Trains parked at
27		businesses should be exempt from this requirement when it is necessary while loading or
28		unloading, but still maintain the maximum setback distance possible.
29	2.	Meet with railroad officials to determine ways to improve rail service to agriculture across
30		Illinois.
31	3.	Encourage rail passenger services to maintain or improve service and increase efforts to
32		become self-sufficient.
33	4.	Continue to monitor high speed rail projects. We will oppose the implementation of these
34		projects unless the following conditions are included:
35		A. Safe and convenient public access is provided across the railroad.
36		B. Owners of private crossings are provided continued access.
37		C. Landowners are fairly compensated for any takings associated with the project.
38 39		
39 40		
40		128. TRANSPORTATION VEHICLE REGULATIONS
42		
43		Vehicles
44	We w	/ill support:
45	1.	Redefinition of "commercial motor vehicle" from the 10,001 pound threshold to that used
46		for the Commercial Driver's License (CDL) program - 26,001 pounds.
47	2.	Legislation to reduce the requirement for semi-annual truck safety inspections to an
48		annual inspection.
49	3.	Legislation to require recreational motor vehicles and recreational trailers to pass a safety
50		inspection on the same basis as trucks and trailers.
51	4.	Legislation permitting second division vehicles with expired safety test decals to be driven
52	~	to a repair facility and to a safety test lane.
53	5.	Efforts to develop regulations which encourage the establishment of more truck safety test
54 55	6	lanes in the state.
55 56	6.	Legislation that would allow annual reporting of mileage on mileage plates.
50		

1	7.	Efforts to allow low-mileage operations to pay a flat annual fee in lieu of submitting
2		quarterly reports as a means of complying with the International Fuel Tax Agreement
3		(IFTA).
4	8.	Legislation to remove the requirement to post a bond to purchase a mileage plate.
5	9.	Proration of renewal fees for farm truck and trailer plates based on the month of
6	0.	application.
7	10.	Legislation establishing uniform maximum weights for all truck and trailer license plate
8	10.	classifications that share the same letter designation.
9	11.	Regulation establishing uniform release mechanisms on all seat belts on newly
	11.	
10	40	manufactured vehicles.
11	12.	Programs and actions that encourage the inclusion of automatic Daytime Running
12	4.0	Lights/Lamps (DRLs) and automatic headlights on newly manufactured vehicles.
13	13.	Legislation to expand the applicability of the harvest season permit to include perishable
14		produce.
15	14.	Legislation to establish higher weight limits for farm wagons and non-licensed trailers.
16		
17	We w	ill seek legislation to:
18	1.	Require that trailers submit to safety test inspections at the same weight classification as
19		required for trucks.
20	2.	Establish a low mileage license for trucks with a reduced number of allowable miles and a
21		commensurate reduction in fee.
22	3.	Decrease the cost of a "farm" truck plate until that cost falls at or below 50 percent of the
23	•	cost of a flat weight plate.
24	4.	Require all rural mail delivery vehicles to have flashing yellow lights on top of the vehicle
25		and a sign on the rear of the vehicle reading "U.S. Postal Service Mail Carrier."
26	5.	Establish uniform truck and trailer lengths on Class III routes, other state highways, local
20	0.	roads, and streets.
	e	
28	6.	Change federal regulations to keep written warnings from appearing on Compliance,
29	7	Safety, and Accountability (CSA) reports.
30	7.	Allow all second division vehicles registered for 8,000 lbs to qualify for Covered Farm
31		Vehicle (CFV) designation.
32		
33		Drivers
34		ill support:
35	1.	Enhanced driver education related to slow moving vehicles, large trucks, horses, and
36		horse drawn vehicles.
37	2.	Limiting the need for bi-annual Department of Transportation (DOT) driver physicals to
38		only those drivers required to have a CDL.
39	3.	A policy change within law enforcement agencies whereby officers will direct trucks to a
40		nearby safe area to conduct their inspection, thus avoiding closure of a traffic lane for that
41		purpose.
42		
43	We w	ill seek legislation to allow a CDL applicant to have a checklist with them during the pre-trip
44		ction portion of the CDL testing process.
45	mopo	
46	We or	ppose the federal regulation requiring that state-licensed physicians submit to training and
47		cation to be eligible to perform DOT physical examinations for truck drivers.
48	Cerun	
40 49		Government Oversight
	Ma	•
50		ill support:
51	1.	Efforts to bring about greater uniformity and reciprocity among states on regulations
F O		
52	6	affecting trucks and truck operators.
53	2.	Efforts to ensure uniform interpretation and application of motor vehicle regulations by all
53 54		Efforts to ensure uniform interpretation and application of motor vehicle regulations by all government administrative and enforcement personnel.
53	2. 3.	Efforts to ensure uniform interpretation and application of motor vehicle regulations by all

1 2	4.	Encouragement of the Division of Motor Vehicles to accept truck license plate renewals at all driver services facilities.
3 4	5.	Efforts to have the County Engineer's office act as a clearing house for overweight and over dimension permits on all county and road district roads.
5	6.	Having more Commercial Drivers License testing facilities be made available in the state
6 7		for written and driving examinations.
8		ill seek legislation to:
9 10	1.	Allow alternative means of posting bond, such as credit cards, for traffic and weight violations by all drivers licensed in the State of Illinois.
11 12	2.	Permit second division vehicles, designed for pulling or carrying freight or cargo, that are visibly empty to forego the procedure of weighing at the scales in order to reduce truck
13 14	3.	traffic congestion at weigh stations. Recognize vehicle license registered weight rate, rather than the vehicle manufacturer's
15 16	0.	gross vehicle weight rating, to determine the eligibility of any vehicle for the purpose of the driver skills test to acquire a driver's license.
17 18		Other
19		ill support:
20 21 22	1.	The establishment of a state agency/transportation industry group designed as a coordinating mechanism to resolve problems associated with the regulation of motor vehicles.
23	2.	Allowing anhydrous ammonia to be transferred from a cargo tank motor vehicle with a
24 25		maximum capacity of 12,000 gallons into containers of 3,000 gallons capacity or less mounted on farm vehicles or into containers of 6,000 gallons mounted on motor-driven
26 27		applicators provided that the cargo tank motor vehicle has been converted to proper industry standards and engineered and regulated equipment.
28		industry standards and engineered and regulated equipment.
29 30 31		ge local law enforcement officials and local civic and public service organizations to ote all terrain vehicle safety programs.
32 33		ill encourage recreational users of roadways (runners/walkers/bikers) to wear reflective ials when on the road from dusk to dawn.
34 35	We wi	ill seek legislation to:
36	1.	Establish a notification procedure that would provide property owners with the necessary
37 38	2.	information to identify vehicles that are towed from their property. Exempt transportation of agricultural products from farm to market from USDOT number
39		and UCR registration.
40 41		
42		
43 44		129. TRANSPORTATION UNMANNED AIRCRAFT SYSTEMS
44 45	We su	ipport:
46	1.	The use of Unmanned Aerial Vehicles (UAVs) for commercial purposes (i.e., agricultural,
47 48	2.	forestry, and other natural resource use). Working with the Federal Aviation Administration (FAA) to review the legal and technical
49		issues related to agricultural UAV use.
50	3.	Reasonable FAA regulations regarding agricultural use and permitting for private and
51 52	4.	commercial applications. Requiring the operator of the UAV to gain the consent, in writing, of the landowner or
53		tenant, if the UAV will be surveying or gathering data above the private property.
54 55	5. 6	The development of guidelines for the safe operation of UAVs for all users.
55 56	6.	Landowners and tenants to be able to fly their fields, for any reason, without it being considered a commercial activity.
		<i>.</i>

1 2 3	7.	Protecting property and privacy rights of farms and livestock operations while encouraging legitimate commercial and recreational uses of UAVs.
3 4		opose:
4 5 6 7	1.	Federal, state, and law enforcement agencies using UAVs for the purpose of regulatory enforcement, litigation, and as a sole source for natural resource inventories used in planning efforts.
8 9	2. 3.	FAA regulations that classify UAVs as fixed-wing aircraft. FAA regulations that require a private pilot's license and third-class medical certification to
10 11 12		operate UAVs under 55 pounds.
